Preparing the Camera

Inserting the battery and card

1. Battery/card compartment cover
   - Slide the battery lock knob in the direction of the arrow to unlock, and then remove the battery.
   - Turn off the camera before opening the battery/card compartment cover.
   - Always use SD/SDHC/SDXC cards or Eye-Fi card with this camera. Do not insert other types of memory cards. “Using the card” (p. 61)
   - Do not touch the contact area of the card directly.
   - This camera can be used without a card by storing images in its internal memory.

2. Battery lock knob
   - Insert the battery while sliding the battery lock knob in the direction of the arrow.
   - Insert the card straight until it clicks into place.
   - When using the camera, be sure to close the battery/card compartment cover.

3. Write-protect switch
   - “Number of storable pictures (still images)/Recording length (movies) in the internal memory and cards” (p. 62)

To remove the card

1. Press the card in until it clicks and comes out slightly, then grab the card and pull it out.

Charging the battery with the included USB-AC adapter

1. The included F-2AC USB-AC adapter (hereafter referred to as USB-AC adapter) differs depending on the region where you purchased the camera. If you received a plug-in type USB-AC adapter, plug it directly into AC outlet.
The included USB-AC adapter has been designed to be used for charging and playback. Do not take pictures while the AC adapter is connected to the camera.

Be sure to unplug the power plug of the USB-AC adapter from the wall outlet when the charging is complete or the playback ends.

The battery can be charged while the camera is connected to the computer. Charging time varies depending on the performance of a computer. (There may be cases in which it takes approx. 10 hours.)

Connecting the camera

Connecting the camera

Indicator lamp

Indicator lamp

On: Charging
Off: Charged

The battery is not fully charged at the time of purchase. Before use, be sure to charge the battery until the indicator lamp turns off (up to 4 hours).

If the indicator lamp does not light, the camera is not correctly connected or the battery, camera, or USB-AC adapter may not be functioning as expected.

When to charge the batteries

Charge the battery when the error message shown below appears.

Setting up using the supplied CD

Installation of [ib] computer software using the supplied CD is available on Windows computers only.

Windows

1 Insert the supplied CD in a CD-ROM drive.
Windows XP
● A “Setup” dialog will be displayed.

Windows Vista/Windows 7
● An Autorun dialog will be displayed. Click “OLYMPUS Setup” to display the “Setup” dialog.

If the “Setup” dialog is not displayed, select “My Computer” (Windows XP) or “Computer” (Windows Vista/Windows 7) from the start menu. Double-click the CD-ROM (OLYMPUS Setup) icon to open the “OLYMPUS Setup” window and then double-click “Launcher.exe”.

If a “User Account Control” dialog is displayed, click “Yes” or “Continue”.

2 Register your Olympus product.
● Click the “Registration” button and follow the on-screen instructions.

To register the camera, it must be connected to the computer. “Connecting the camera” (p. 12)

If nothing is displayed on the camera screen even after connecting the camera to the computer, the battery may be exhausted. Leave the camera connected to the computer until the battery has charged, then disconnect and reconnect the camera.

3 Install OLYMPUS Viewer 2 and [ib] computer software.

● Check the system requirements before beginning installation.
● Click the “OLYMPUS Viewer 2” or “OLYMPUS ib” button and follow the on-screen instructions to install the software.

Using Shooting Modes

To change the shooting mode

⚠️ The shooting mode (P, iAUTO, BEAUTY, SCN, MAGIC, ) can be changed by using the function menu. “Using the Menu” (p. 8)

⚠️ The default settings of the function are highlighted in .

Shooting with automatic settings (iAUTO mode)

The camera will automatically select the optimal shooting mode for the scene. The shooting condition is decided by the camera and most settings cannot be changed.

1 Set the shooting mode to iAUTO.

The icon changes depending on the scene that the camera automatically selects.

⚠️ In some cases, the camera may not select the desired shooting mode.

⚠️ When the camera cannot identify which is the optimal mode, [Program Auto] will be selected.

Shooting with Beauty Fix effects (BEAUTY mode)

⚠️ Depending on the picture, the editing may not be effective.

1 Set the shooting mode to BEAUTY.

2 Press ▼ to go to the submenu.
3 Use \( \leftarrow \rightarrow \) to select the retouching setting, and press the \( \text{OK} \) button to set.

- [Set 1], [Set 2] or [Set 3] retouches the image according to the Beauty Settings. [Beauty Settings] (p. 49)

4 Point the camera toward the subject. Check the frame appearing around the face detected by the camera, and then press the shutter button to take the picture.

- The unedited image and edited image are both saved.
- If the image cannot be retouched, only the unedited image is saved.
- The [Image Size] of the retouched image is fixed at [5M].

5 To save the image, select [OK] on the review screen and press the \( \text{OK} \) button. To retouch the image additionally, select [Beauty Fix].

2 Use < | > to select [ ] or [ ], and face the camera toward white paper.

- Set the paper to fill the entire screen, and make sure that there is no shadow area.
- Setting the zoom to telephoto (T) is recommended.
- Perform this procedure under the light where the pictures are actually taken.

3 Press theMENU button.

- The camera releases the shutter and the white balance is registered.
- The registered white balance is stored in the camera. The data will not be cleared by turning off the power.
- When the [ ] or [ ] whose white balance has already been registered is selected in Step 2, new white balance will be registered.
When the white area is not large enough or when the color is too bright, too dark, or loud, the white balance cannot be registered. Return to Step 2. Or, set the other white balance.

In the ISO setting, although smaller values result in less sensitivity, sharp images can be taken under fully lit conditions. Larger values result in higher sensitivity, and images can be taken at fast shutter speeds even under low light conditions. However, high sensitivity introduces noise into the resulting picture, which may give it a grainy appearance.

Viewing images on a TV

Using an AV cable

1. Match the camera video signal format ([NTSC]/[PAL]) to that used by the TV.
2. Connect the camera to the TV.

---

Connect to the TV video input jack (yellow) and audio input jack (white).
Using an HDMI cable

1. Match the camera digital signal format ([480p/576p]/[720p]/[1080i]) to that used by the TV.
2. Connect the camera to the TV.
3. Turn the TV on and select the HDMI input to which the camera is connected.
4. Turn the camera on and use \( \triangle \updownarrow \leftarrow \rightarrow \) to view images.

⚠️ Different countries and regions use different video signal standards. Before connecting the camera, choose a video signal standard that matches that used by the TV.

⚠️ Do not connect the HDMI cable when the camera is connected to a computer or other device using the USB cable.

See the instruction manual provided with your TV for more information.

⚠️ When the camera and TV are connected by both an AV cable and an HDMI cable, the HDMI cable will take priority.

⚠️ Images and other information may be cropped for display on the TV.

Using a remote control

1. Select [On] for [HDMI Control] and turn the camera off.
2. Connect the camera to the TV using an HDMI cable. “Using an HDMI cable” (p. 46)
3. First turn on the TV, and then turn on the camera.
   - Follow the on-screen guide displayed by the TV to operate the camera.

⚠️ With some TVs, operations cannot be performed with the TV remote control even though the operation guide is displayed on the screen.

⚠️ If operations cannot be performed with the TV remote control, set [HDMI Control] to [Off] and use the controls on the camera.

Direct printing (PictBridge*)

By connecting the camera to a PictBridge-compatible printer, you can print images directly without using a computer.

To find out if your printer supports PictBridge, refer to the printer’s instruction manual.

*1 PictBridge is a standard for connecting digital cameras and printers of different makers and printing out pictures directly.

The printing modes, paper sizes, and other parameters that can be set with the camera vary depending on the printer that is used. For details, refer to the printer’s instruction manual.

For details on the available paper types, loading paper, and installing ink cassettes, refer to the printer’s instruction manual.

**Print Reservations (DPOF*1)**

In print reservations, the number of prints and date imprint option are saved in the image on the card. This enables easy printing at a printer or print shop supporting DPOF by using only the print reservations on the card without a computer or a camera.

* DPOF is a standard for storing automatic printout information from digital cameras.

⚠️ Print reservations can be set only for the images stored on the card. Insert a card with recorded images before making print reservations.

⚠️ DPOF reservations set by another DPOF device cannot be changed by this camera. Make changes using the original device. Making new DPOF reservations with this camera will erase the reservations made by the other device.

⚠️ DPOF print reservations can be made for up to 999 images per card.

Usage Tips

If the camera does not work as intended, or if an error message is displayed on the screen, and you are unsure of what to do, refer to the information below to fix the problem(s).

Troubleshooting

Battery

“The camera does not work even when batteries are installed”.

- Insert recharged batteries in the correct direction.
  “Inserting the battery and card” (p. 11), “Charging the battery with the included USB-AC adapter” (p. 11)
- Battery performance may have been reduced temporarily due to low temperature. Take the batteries out of the camera, and warm them by putting them in your pocket for a while.

Card/Internal memory

“An error message is displayed”.

“Error message” (p. 56)

Shutter button

“No picture is taken when the shutter button is pressed”.

- Cancel sleep mode.
  To save battery power, the camera automatically goes into sleep mode and the monitor turns off if there is no operation for 3 minutes when the camera is turned on. No picture is taken even if the shutter button is fully pressed in this mode. Operate the zoom lever or other buttons to restore the camera from sleep mode before taking a picture. If the camera is left for another 12 minutes, it automatically turns off. Press the ON/OFF button to turn the camera on.
- Press the  button to switch to the shooting mode.
- Wait until $ (flash charge) stops blinking before taking pictures.

Monitor

“Difficult to see”.

- Condensation may have occurred. Turn off the power, and wait for the camera body to become acclimated to the surrounding temperature and dry out before taking pictures.

“Vertical lines appear on the monitor”.

- This condition may occur when the camera is pointed at an extremely bright subject under a clear sky and so on. The lines may appear on the recorded movie.

“The light is caught in the picture”.

- Shooting with flash in dark situations results in an image with many flash reflections on dust in the air.

Date and time function

“Date and time settings return to the default setting”.

- If the batteries are removed and left out of the camera for about a day¹, the date and time settings return to the default setting, and must be reset.
  ¹ The time until the date and time settings return to the default setting varies depending on how long the batteries have been loaded.

“Language, date, time, and time zone” (p. 15)

Miscellaneous

“The camera makes a noise when taking pictures”.

- The camera may activate the lens and make a noise even if no operation is performed. This is because the camera automatically performs actions of auto focus as far as it is ready to shoot.

Shooting tips

When you are unsure of how to take a picture that you envision, refer to the information below.

Focusing

“Focusing on the subject”
- Taking a picture of a subject not in the center of the monitor
  After focusing on an object at the same distance as the subject, compose the shot, and take the picture.
  Pressing the shutter button halfway (p. 17)
- Set [AF Mode] (p. 35) to [Face/iESP]
- Taking a picture in [AF Tracking] mode (p. 35)
  The camera tracks the subject movement automatically to focus on it continuously.
- Taking a picture of a shadowy subject
  Using the AF illuminator makes focusing easier.
  [AF Illuminat.] (p. 36)
- Taking a picture of subjects where autofocus is difficult
  In the following cases, after focusing on an object (by pressing the shutter button halfway down) with high contrast at the same distance as the subject, compose the shot, and take the picture.

  Object with no vertical lines*1
  *1 It is also effective to compose the shot by holding the camera vertically to focus, and then returning to the horizontal position to take the picture.

  When objects are at different distances

  Fast-moving object

  The subject is not in the center of the frame

  Subjects with low contrast

  When extremely bright objects appear in the center of the monitor
**Camera shake**

“Taking pictures without camera shake”
- Taking pictures using [Image Stabilizer] (p. 35)
- Select (Sport) in SCN mode (p. 26)
  The (Sport) mode uses a fast shutter speed and can reduce the blur incurred by a moving subject.

“Taking pictures at a high ISO sensitivity”
If a high ISO sensitivity is selected, pictures can be taken at a high shutter speed even at locations where a flash cannot be used.
“Selecting the ISO sensitivity” (p. 32)

**Exposure (brightness)**

“Taking pictures with the right brightness”
- Taking pictures using [Fill In] (p. 19) flash
  A subject against backlight is brightened.
- Taking pictures using exposure compensation (p. 31)
  Adjust the brightness while viewing the screen for taking the picture. Normally, taking pictures of white subjects (such as snow) results in images that are darker than the actual subject. Use the exposure compensation to adjust in the positive (+) direction to express whites as they appear. When taking pictures of black subjects, on the other hand, it is effective to adjust in the negative (-) direction.

**Color hue**

“Taking pictures with colors at the same shade as they appear”
- Taking pictures by selecting white balance (p. 31)
  Best results in most environments can normally be obtained with the [WB Auto] setting, but for some subjects, you should try experimenting with different settings. (This is especially true for sunshade under a clear sky, mixed natural and artificial light settings, and so on.)

**Image quality**

“Taking sharper pictures”
- Taking pictures with the optical zoom
  Avoid using digital zoom (p. 18) to take pictures.
- Taking pictures at a low ISO sensitivity
  If the picture is taken with a high ISO sensitivity, noise (small colored spots and color unevenness that were not in the original image) can occur, and the image can appear grainy. The resulting image is grainier than with low ISO sensitivity as well.
  “Selecting the ISO sensitivity” (p. 32)

**Batteries**

“Making batteries last longer”
- Set [Power Save] (p. 48) to [On]
Playback/Editing tips

**Playback**

“Playing images in the internal memory and card”
- Remove the card when playing pictures in the internal memory
  “To remove the card” (p. 11)

**Editing**

“Erasing the sound recorded to a still image”
- Record over the sound with silence when playing back the image
  “Adding sound to still images [R]” (p. 39)
Appendix

Camera care

Exterior
• Wipe gently with a soft cloth. If the camera is very dirty, soak the cloth in mild soapy water and wring well. Wipe the camera with the damp cloth and then dry it with a dry cloth. If you have used the camera at the beach, use a cloth soaked in clean water and wrung well.

Monitor
• Wipe gently with a soft cloth.

Lens
• Blow dust off the lens with a commercial blower, then wipe gently with a lens cleaner.

Do not use strong solvents such as benzene or alcohol, or chemically treated cloth.

Mold may form on the lens surface if the lens is left dirty.

Battery/USB-AC adapter
• Wipe gently with a soft, dry cloth.

Storage
• When storing the camera for extended periods, remove the battery, USB-AC adapter and card, and keep in a cool, dry place that is well ventilated.
• Periodically insert the battery and test the camera functions.

Avoid leaving the camera in places where chemical products are handled since this may result in corrosion.

Using a separately sold USB-AC adapter

The USB-AC adapter F-3AC (sold separately) can be used with this camera. Do not use any USB-AC adapter other than the dedicated one. When using F-3AC, be sure to use the USB cable included with this camera. Do not use any other USB-AC adapter with this camera. Shooting is not available when using the F-3AC.

Using a separately sold charger

A charger (UC-50: sold separately) can be used to charge the battery.

Using your charger and USB-AC adapter abroad

• The charger and USB-AC adapter can be used in most home electrical sources within the range of 100 V to 240 V AC (50/60Hz) around the world. However, depending on the country or area you are in, the AC wall outlet may be shaped differently and the charger and USB-AC adapter may require a plug adapter to match the wall outlet. For details, ask at your local electrical shop or travel agent.
• Do not use travel voltage converters as they could damage your charger and USB-AC adapter.
Using the card

Cards compatible with this camera
SD/SDHC/SDXC/Eye-Fi card (commercially available) (for compatibility card details, visit the Olympus website.)

- The Eye-Fi card may become hot during use.
- When using an Eye-Fi card, the battery may run out faster.
- When using an Eye-Fi card, the camera may function more slowly.

SD/SDHC/SDXC card write-protect switch
The SD/SDHC/SDXC card body has a write-protect switch.
If you set the switch to the “LOCK” side, you will not be able to write to the card, delete data or format. Return the switch to enable writing.

Checking the image saving location
The memory indicator shows whether the internal memory or card is being used during shooting and playback.

Current memory indicator

- : Internal memory is being used
- : Card is being used

Even if [Memory Format]/[Format], [Erase], [Sel. Image], or [All Erase] is performed, the data in the card is not completely erased. When disposing of the card, damage the card to prevent the disclosure of personal data.

Readout/recording process of the card
During shooting, the current memory indicator lights up in red while the camera is writing data. Never open the battery/card compartment cover or unplug the USB cable. This can not only damage the image data but also render the internal memory or card unusable.
Number of storable pictures (still images)/Recording length (movies) in the internal memory and cards

⚠️ The figures for the number of storable still pictures and recording length are approximate. The actual capacity varies with shooting conditions and the card used.

If the product is used without observing the information given under this symbol, injury or death may result.

**CAUTION**
If the product is used without observing the information given under this symbol, minor personal injury, damage to the equipment, or loss of valuable data may result.

**WARNING!**
TO AVOID THE RISK OF FIRE OR ELECTRICAL SHOCK, NEVER DISASSEMBLE, EXPOSE THIS PRODUCT TO WATER OR OPERATE IN A HIGH HUMIDITY ENVIRONMENT.

### General Precautions

**Read All Instructions** — Before you use the product, read all operating instructions. Save all manuals and documentation for future reference.

**Cleaning** — Always unplug this product from the wall outlet before cleaning. Use only a damp cloth for cleaning. Never use any type of liquid or aerosol cleaner, or any type of organic solvent to clean this product.

**Attachments** — For your safety, and to avoid damaging the product, use only accessories recommended by Olympus.

**Water and Moisture** — For precautions on products with weatherproof designs, read the weatherproofing sections.

**Location** — To avoid damage to the product, mount the product securely on a stable tripod, stand, or bracket.

**Power Source** — Connect this product only to the power source described on the product label.

**Lightning** — If a lightning storm occurs while using a USB-AC adapter, remove it from the wall outlet immediately.

**Foreign Objects** — To avoid personal injury, never insert a metal object into the product.

**Heat** — Never use or store this product near any heat source such as a radiator, heat register, stove, or any type of equipment or appliance that generates heat, including stereo amplifiers.

### Handling the Camera

**WARNING**
- Do not use the camera near flammable or explosive gases.
- Do not use the flash and LED (including AF illuminator) on people (infants, small children, etc.) at close range.
    - You must be at least 1 m (3 ft.) away from the faces of your subjects. Firing the flash too close to the subject’s eyes could cause a momentary loss of vision.
- Keep young children and infants away from the camera.
    - Always use and store the camera out of the reach of young children and infants to prevent the following dangerous situations which could cause serious injury:
        - Becoming entangled in the camera strap, causing strangulation.
        - Accidentally swallowing the battery, cards or other small parts.
        - Accidentally firing the flash into their own eyes or those of another child.
        - Accidentally being injured by the moving parts of the camera.
- Do not look at the sun or strong lights with the camera.
- Do not use or store the camera in dusty or humid places.
- Do not cover the flash with a hand while firing.
- Use SD/SDHC/SDXC memory cards or Eye-Fi cards only. Never use other types of cards.
- If you accidentally insert another type of card into the camera, contact an authorized distributor or service center. Do not try to remove the card by force.
- If you find that the USB-AC adapter is extremely hot or notice any unusual odors, noise, or smoke around it, unplug the power plug from wall outlet immediately and stop using it. Then, contact an authorized distributor or service center.
CAUTION

- Stop using the camera immediately if you notice any unusual odors, noise, or smoke around it.
- Never remove the batteries with bare hands, which may cause a fire or burn your hands.
- Never hold or operate the camera with wet hands.
- Do not leave the camera in places where it may be subject to extremely high temperatures.
- Doing so may cause parts to deteriorate and, in some circumstances, cause the camera to catch fire. Do not use the charger or USB-AC adapter if it is covered (such as a blanket). This could cause overheating, resulting in fire.
- Handle the camera with care to avoid getting a low-temperature burn.
- When the camera contains metal parts, overheating can result in a low-temperature burn. Pay attention to the following:
  - When used for a long period, the camera will get hot. If you hold on to the camera in this state, a low-temperature burn may be caused.
  - In places subject to extremely cold temperatures, the temperature of the camera’s body may be lower than the environmental temperature. If possible, wear gloves when handling the camera in cold temperatures.
- Be careful with the strap.
  - Be careful with the strap when you carry the camera. It could easily catch on stray objects and cause serious damage.
- To protect the high-precision technology contained in this product, never leave the camera in the places listed below, no matter if in use or storage:
  - Places where temperatures and/or humidity are high or go through extreme changes. Direct sunlight, beaches, locked cars, or near other heat sources (stove, radiator, etc.) or humidifiers.
  - In sandy or dusty environments.
  - Near flammable items or explosives.
  - In wet places, such as bathrooms or in the rain. When using products with weatherproof designs, read their manuals as well.
  - In places prone to strong vibrations.
  - Never drop the camera or subject it to severe shocks or vibrations.
  - When attaching the camera to or removing it from a tripod, rotate the tripod screw, not the camera.
  - Before transporting the camera, remove a tripod and all other non-OLYMPUS accessories.
  - Do not touch electric contacts on cameras.
  - Do not leave the camera pointed directly at the sun. This may cause lens or shutter curtain damage, color failure, ghosting on the image pickup device, or may possibly cause fires.
  - Do not push or pull severely on the lens.

- Before storing the camera for a long period, remove the batteries. Select a cool, dry location for storage to prevent condensation or mold from forming inside the camera. After storage, test the camera by turning it on and pressing the shutter button to make sure that it is operating normally.
- The camera may malfunction if it is used in a location where it is subject to a magnetic/electromagnetic field, radio waves, or high voltage, such as near a TV set, microwave, video game, loud speakers, large screen unit, TV/radio tower, or transmission towers. In such cases, turn the camera off and on again before further operation.
- Always observe the operating environment restrictions described in the camera’s manual.

### Battery Handling Precautions

Follow these important guidelines to prevent batteries from leaking, overheating, burning, exploding, or causing electrical shocks or burns.

DANGER

- The camera uses a lithium ion battery specified by Olympus. Charge the battery with the specified USB-AC adapter or charger. Do not use any other USB-AC adapters or chargers.
- Never heat or incinerate batteries.
- Take precautions when carrying or storing batteries to prevent them from coming into contact with any metal objects such as jewelry, pins, fasteners, etc.
- Never store batteries where they will be exposed to direct sunlight, or subjected to high temperatures in a hot vehicle, near a heat source, etc.
- To prevent causing battery leaks or damaging their terminals, carefully follow all instructions regarding the use of batteries. Never attempt to disassemble a battery or modify it in any way, solder, etc.
- If battery fluid gets into your eyes, flush your eyes immediately with clear, cold running water and seek medical attention immediately.
- Always store batteries out of the reach of small children. If a child accidentally swallows a battery, seek medical attention immediately.
- If you cannot remove the battery from the camera, contact an authorized distributor or service center. Do not try to remove the battery by force. Damage to the battery exterior (scratches, etc.) may produce heat or an explosion.
**WARNING**

- Keep batteries dry at all times.
- To prevent batteries from leaking, overheating, or causing a fire or explosion, use only batteries recommended for use with this product.
- Insert the battery carefully as described in the operating instructions.
- If rechargeable batteries have not been recharged within the specified time, stop charging them and do not use them.
- Do not use a battery if it is cracked or broken.
- If a battery leaks, becomes discolored or deformed, or becomes abnormal in any other way during operation, stop using the camera.
- If a battery leaks fluid onto your clothing or skin, remove the clothing and flush the affected area with clean, running cold water immediately. If the fluid burns your skin, seek medical attention immediately.
- Never subject batteries to strong shocks or continuous vibration.

**CAUTION**

- Before loading, always inspect the battery carefully for leaks, discoloration, warping, or any other abnormality.
- The battery may become hot during prolonged use. To avoid minor burns, do not remove it immediately after using the camera.
- Always unload the battery from the camera before storing the camera for a long period.
- This camera uses one Olympus lithium ion battery (LI-50B). No other type of batteries can be used. There is a risk of explosion if the battery is replaced with the incorrect battery type.
- Power consumption by the camera varies depending on which functions are used.
- During the conditions described below, power is consumed continuously and the battery becomes exhausted quickly.
  - The zoom is used repeatedly.
  - The shutter button is pressed halfway repeatedly in shooting mode, activating the auto focus.
  - A picture is displayed on the screen for an extended period of time.
  - The camera is connected to a printer.
  - Using an exhausted battery may cause the camera to turn off without displaying the battery level warning.
- The Olympus lithium ion battery is designed to be used only for the Olympus digital camera. Do not use the battery to other devices.
- If the battery’s terminals get wet or greasy, camera contact failure may result. Wipe the battery well with a dry cloth before use.
- Always charge a battery when using it for the first time, or if it has not been used for a long period.
- When operating the camera with battery power at low temperatures, try to keep the camera and spare battery as warm as possible. A battery that has run down at low temperatures may be restored after it is warmed at room temperature.
- Before going on a long trip, and especially before traveling abroad, purchase extra batteries. A recommended battery may be difficult to obtain while traveling.
- When storing the battery for a long period, select a cool location for storage.
- Please recycle batteries to help save our planet’s resources. When you throw away dead batteries, be sure to cover their terminals and always observe local laws and regulations.

**USB-AC adapter**

- The included USB-AC adapter F-2AC is designed to be used only with this camera. Other cameras cannot be charged with this USB-AC adapter.
- Do not connect the included USB-AC adapter F-2AC to equipment other than this camera.
- For plug-in type USB-AC adapter: The included USB-AC adapter F-2AC is intended to be correctly orientated in a vertical or floor mount position.

**Use Only Dedicated Rechargeable Battery, Battery Charger and USB-AC adapter**

We strongly recommend that you use only the genuine Olympus dedicated rechargeable battery, battery charger and USB-AC adapter with this camera. Using a non-genuine rechargeable battery, battery charger and/or USB-AC adapter may result in fire or personal injury due to leakage, heating, ignition or damage to the battery. Olympus does not assume any liability for accidents or damage that may result from the use of a battery, battery charger and/or USB-AC adapter that are not genuine Olympus accessories.

**Monitor**

- Do not push the monitor forcibly; otherwise the image may become vague, resulting in a playback mode failure or damage to the monitor.
- A strip of light may appear on the top/bottom of the monitor, but this is not a malfunction.
• When a subject is viewed diagonally in the camera, the edges may appear zigzagged on the monitor. This is not a malfunction; it will be less noticeable in playback mode.
• In places subject to low temperatures, the monitor may take a long time to turn on or its color may change temporarily. When using the camera in extremely cold places, it is a good idea to occasionally place it in a warm place. The monitor exhibiting poor performance due to low temperatures will recover in normal temperatures.
• The monitor of this product is manufactured with high-quality accuracy, however, there may be a stuck or dead pixel on the monitor. These pixels do not have any influence on the image to be saved. Because of the characteristics, the unevenness of the color or brightness may also be found depending on the angle, but this is due to the structure of the monitor. This is not a malfunction.

FCC Notice
• Radio and Television Interference
• Changes or modifications not expressly approved by the manufacturer may void the user’s authority to operate this equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.
• This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.
• However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
  • Adjust or relocate the receiving antenna.
  • Increase the distance between the camera and receiver.
  • Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
  • Consult your dealer or an experienced radio/TV technician for help. Only the OLYMPUS-supplied USB cable should be used to connect the camera to USB enabled personal computers (PC).

Any unauthorized changes or modifications to this equipment would void the user’s authority to operate it.

OLYMPUS WORLDWIDE LIMITED WARRANTY - IMAGING PRODUCTS
Olympus warrants that the enclosed Olympus® imaging product(s) and related Olympus® accessories (individually a “Product” and collectively the “Products”) will be free from defects in materials and workmanship under normal use and service for a period of one (1) year from the date of purchase. If any Product proves to be defective within the one-year warranty period, the customer must return the defective Product to any of Olympus Service Centers, following the procedure set forth below (See “WHAT TO DO WHEN SERVICE IS NEEDED”).
Olympus, at its sole discretion, will repair, replace, or adjust the defective Product, provided that Olympus investigation and factory inspection disclose that (a) such defect developed under normal and proper use and (b) the Product is covered under this limited warranty.
Repair, replacement, or adjustment of defective Products shall be Olympus’s sole obligation and the customer’s sole remedy hereunder.
The customer is liable and shall pay for shipment of the Products to the Olympus Service Center.
Olympus shall not be obligated to perform preventive maintenance, installation, deinstallation, or maintenance. Olympus reserves the right to (i) use reconditioned, refurbished, and/or serviceable used parts (that meet Olympus’s quality assurance standards) for warranty or any other repairs and (ii) make any internal or external design and/or feature changes on or to its products without any liability to incorporate such changes on or to the Products.
WHAT IS NOT COVERED BY THIS LIMITED
WARRANTY
Excluded from this limited warranty and not warranted by
Olympus in any fashion, either express, implied, or by statute,
are:
(a) products and accessories not manufactured by Olympus
and/or not bearing the “OLYMPUS” brand label (the
warranty coverage for products and accessories of other
manufacturers, which may be distributed by Olympus, is the
responsibility of the manufacturers of such products and
accessories in accordance with the terms and duration of
such manufacturers’ warranties);
(b) any Product which has been disassembled, repaired,
tampered with, altered, changed, or modified by persons
other than Olympus’s own authorized service personnel
unless repair by others is made with the written consent of
Olympus;
(c) defects or damage to the Products resulting from wear,
tear, misuse, abuse, negligence, sand, liquids, impact,
improper storage, nonperformance of scheduled operator
and maintenance items, battery leakage, use of non-
“OLYMPUS” brand accessories, consumables, or supplies,
or use of the Products in combination with non-compatible
devices;
(d) software programs;
(e) supplies and consumables (including but not limited to
lamps, ink, paper, film, prints, negatives, cables and
batteries); and/or
(f) Products which do not contain a validly placed and recorded
Olympus serial number, unless they are a model on which
Olympus does not place and record serial numbers.

EXCEPT FOR THE LIMITED WARRANTY SET FORTH
ABOVE, OLYMPUS MAKES NO AND DISCLAIMS ALL OTHER
REPRESENTATIONS, GUARANTIES, CONDITIONS, AND
WARRANTIES CONCERNING THE PRODUCTS, WHETHER
DIRECT OR INDIRECT, EXPRESS OR IMPLIED, OR ARISING
UNDER ANY STATUTE, ORDINANCE, COMMERCIAL
USAGE OR OTHERWISE, INCLUDING BUT NOT LIMITED
TO ANY WARRANTY OR REPRESENTATION AS TO THE
SUITABILITY, DURABILITY, DESIGN, OPERATION, OR
CONDITION OF THE PRODUCTS (OR ANY PART THEREOF)
OR THE MERCHANTABILITY OF THE PRODUCTS OR THEIR
FITNESS FOR A PARTICULAR PURPOSE, OR RELATING
TO THE INFRINGEMENT OF ANY PATENT, COPYRIGHT,
OR OTHER PROPRIETARY RIGHT USED OR INCLUDED
THERIN.

IF ANY IMPLIED WARRANTIES APPLY AS A MATTER OF
LAW, THEY ARE LIMITED IN DURATION TO THE LENGTH OF
THIS LIMITED WARRANTY.

SOME STATES MAY NOT RECOGNIZE A DISCLAIMER OR
LIMITATION OF WARRANTIES AND/OR LIMITATION OF
LIABILITY SO THE ABOVE DISCLAIMERS AND EXCLUSIONS
MAY NOT APPLY.

THE CUSTOMER MAY ALSO HAVE DIFFERENT AND/OR
ADDITIONAL RIGHTS AND REMEDIES THAT VARY FROM
STATE TO STATE.

THE CUSTOMER ACKNOWLEDGES AND AGREES THAT
OLYMPUS SHALL NOT BE RESPONSIBLE FOR ANY
 DAMAGES THAT THE CUSTOMER MAY INCUR FROM
DELAYED SHIPMENT, PRODUCT FAILURE, PRODUCT
DESIGN, SELECTION, OR PRODUCTION, IMAGE OR DATA
LOSS OR IMPAIRMENT OR FROM ANY OTHER CAUSE,
WHETHER LIABILITY IS ASSERTED IN CONTRACT, TORT
(INCLUDING NEGLIGENCE AND STRICT PRODUCT
LIABILITY) OR OTHERWISE. IN NO EVENT SHALL
OLYMPUS BE LIABLE FOR ANY INDIRECT, INCIDENTAL,
CONSEQUENTIAL OR SPECIAL DAMAGES OF ANY KIND
(INCLUDING WITHOUT LIMITATION LOSS OF PROFITS OR
LOSS OF USE), WHETHER OR NOT OLYMPUS SHALL BE
OR SHOULD BE AWARE OF THE POSSIBILITY OF SUCH
POTENTIAL LOSS OR DAMAGE.
Representations and warranties made by any person, including but not limited to dealers, representatives, salespersons, or agents of Olympus, which are inconsistent or in conflict with or in addition to the terms of this limited warranty, shall not be binding upon Olympus unless reduced to writing and approved by an expressly authorized officer of Olympus. This limited warranty is the complete and exclusive statement of warranty which Olympus agrees to provide with respect to the Products and it shall supersede all prior and contemporaneous oral or written agreements, understandings, proposals, and communications pertaining to the subject matter hereof. This limited warranty is exclusively for the benefit of the original customer and cannot be transferred or assigned.

WHAT TO DO WHEN SERVICE IS NEEDED
The customer must transfer any image or other data saved on a Product to another image or data storage medium and/or remove any film from the Product prior to sending the Product to Olympus for service.

IN NO EVENT SHALL OLYMPUS BE RESPONSIBLE FOR SAVING, KEEPING OR MAINTAINING ANY IMAGE OR DATA SAVED ON A PRODUCT RECEIVED BY IT FOR SERVICE, OR ON ANY FILM CONTAINED WITHIN A PRODUCT RECEIVED BY IT FOR SERVICE, NOR SHALL OLYMPUS BE RESPONSIBLE FOR ANY DAMAGES IN THE EVENT ANY IMAGE OR DATA IS LOST OR IMPAIRED WHILE SERVICE IS BEING PERFORMED (INCLUDING, WITHOUT LIMITATION, DIRECT, INDIRECT, INCIDENTAL, CONSEQUENTIAL OR SPECIAL DAMAGES, LOSS OF PROFITS OR LOSS OF USE), WHETHER OR NOT OLYMPUS SHALL BE OR SHOULD BE AWARE OF THE POSSIBILITY OF SUCH POTENTIAL LOSS OR IMPAIRMENT.

Package the Product carefully using ample padding material to prevent damage in transit and either deliver it to the Authorized Olympus Dealer that sold you the Product or ship it postage prepaid and insured to any of our Olympus Service Centers. When returning Products for service, your package should include the following:
1 Sales receipt showing date and place of purchase.
2 Copy of this limited warranty bearing the Product serial number corresponding to the serial number on the Product (unless it is a model on which Olympus does not place and record serial numbers).
3 A detailed description of the problem.
4 Sample prints, negatives, digital prints (or files on disk) if available and related to the problem.
When service is completed, the Product will be returned to you postage prepaid.

WHERE TO SEND PRODUCT FOR SERVICE

Provisions of warranty

1. If this product proves to be defective, although it has been used properly (in accordance with the written Handling Care and Operating instructions supplied with it), during the applicable national warranty period and has been purchased from an authorized Olympus distributor within the business area of Olympus Europa Holding GmbH as stipulated on the website: http://www.olympus.com this product will be repaired, or at Olympus’s option replaced, free of charge. To claim under this warranty the customer must take the product before the end of the applicable national warranty period to the dealer where the product was purchased or any other Olympus service station within the business area of Olympus Europa Holding GmbH as stipulated on the website: http://www.olympus.com. During the one year period of the World Wide Guarantee the customer may turn the product in at any Olympus service station. Please notice that not in all countries such Olympus service station exists.

2. The customer shall transport the product to the dealer or Olympus authorized service station at his own risk and shall be responsible for any costs incurred in transporting the product.

Provisions of Guarantee

1. OLYMPUS IMAGING CORP., Shinjuku Monolith, 2-3-1 Nishi-Shinjuku, Shinjuku-ku, Tokyo 163-0914, Japan grants a one year World Wide Guarantee. This worldwide Guarantee must be presented at an Olympus authorized repair service station before any repair can be made under conditions of this Guarantee. This Guarantee is valid only if the Guarantee Certificate and proof of purchase are presented at the Olympus repair service station. Please note that this Guarantee is in addition to and does not affect the customer’s legal warranty rights under the applicable national legislation governing the sale of consumer goods mentioned above.

2. This Guarantee does not cover the following and the customer will be required to pay repair charge, even for defects occurring within the Guarantee period referred to above.

   a. Any defect that occurs due to mishandling (such as an operation performed that is not mentioned in the Handling Care or other sections of the instructions, etc.)
   b. Any defect that occurs due to repair, modification, cleaning, etc. performed by anyone other than Olympus or an Olympus authorized service station.
   c. Any defect or damage that occurs due to transport, a fall, shock, etc. after purchase of the product.
   d. Any defect or damage that occurs due to fire, earthquake, flood damage, thunderbolt, other natural disasters, environmental pollution and irregular voltage sources.
   e. Any defect that occurs due to careless or improper storage (such as keeping the product under conditions of high temperature and humidity, near insect repellents such as naphthalene or harmful drugs, etc.), improper maintenance, etc.
   f. Any defect that occurs due to exhausted batteries, etc.
   g. Any defect that occurs due to sand, mud, etc. entering the inside of the product casing.
   h. When the Guarantee Certificate is not returned with the product.
   i. When any alterations whatsoever are made to the Guarantee Certificate regarding the year, month and date of purchase, the customer’s name, the dealer’s name, and the serial number.
   j. When proof of purchase is not presented with this Guarantee Certificate.

3. This Guarantee applies to the product only; the Guarantee does not apply to any other accessory equipment, such as the case, strap, lens cap and batteries.

4. Olympus’s sole liability under this Guarantee shall be limited to repairing or replacing the product. Any liability under the Guarantee for indirect or consequential loss or damage of any kind incurred or suffered by the customer due to a defect of the product, and in particular any loss or damage caused to any lenses, films, other equipment or accessories used with the product or for any loss resulting from a delay in repair or loss of data, is excluded. Compelling regulations by law remain unaffected by this.

Notes regarding Guarantee maintenance

1. This Guarantee will only be valid if the Guarantee Certificate is duly completed by Olympus or an authorized dealer or other documents contain sufficient proof. Therefore, please make sure that your name, the name of the dealer, the serial number and the year, month and date of purchase are all completed or the original invoice or the sales receipt (indicating the dealer’s name, the date of purchase and product type) is attached to this Guarantee Certificate. Olympus reserves the right to refuse free-of-charge service if neither Guarantee Certificate is completed nor the above document is attached or if the information contained in it is incomplete or illegible.

2. Since this Guarantee Certificate will not be re-issued, keep it in a safe place.

* Please refer to the list on the web site: http://www.olympus.com for the authorized international Olympus service network.
For customers in Asia

Provisions of warranty

1 If this product proves to be defective, although it has been used properly (in accordance with the written Handling Care and Operating instructions supplied with it), during a period of up to one year from the date of purchase this product will be repaired, or at Olympus's option replaced, free of charge. To claim under warranty the customer must take the product and this Warranty certificate before the end of the one year warranty period to the dealer where the product was purchased or any Olympus authorized service station listed in the instructions and request the necessary repairs.

2 The customer shall transport the product to the dealer or Olympus authorized service station at his own risk and shall be responsible for any costs incurred in transporting the product.

3 This warranty does not cover the following and the customer will be required to pay repair charge, even for defects occurring within the one year period referred to above.
   a. Any defect that occurs due to mishandling (such as an operation performed that is not mentioned in the Handling Care or other sections of the instructions, etc.)
   b. Any defect that occurs due to repair, modification, cleaning, etc. performed by anyone other than Olympus or an Olympus authorized service station.
   c. Any defect or damage that occurs due to transport, a fall, shock, etc. after purchase of the product.
   d. Any defect or damage that occurs due to fire, earthquake, flood damage, thunderbolt, other natural disasters, environmental pollution and irregular voltage sources.
   e. Any defect that occurs due to careless or improper storage (such as keeping the product under conditions of high temperature and humidity, near insect repellents such as naphthalene or harmful drugs, etc.), improper maintenance, etc.
   f. Any defect that occurs due to exhausted batteries, etc.
   g. Any defect that occurs due to sand, mud, etc. entering the inside of the product casing.
   h. When this Warranty Certificate is not returned with the product.
   i. When any alterations whatsoever are made to the Warranty Certificate regarding the year, month and date of purchase, the customer's name, the dealer’s name, and the serial number.
   j. When proof of purchase is not presented with this Warranty Certificate.

4 This Warranty applies to the product only; the Warranty does not apply to any other accessory equipment, such as the case, strap, lens cap and batteries.

5 Olympus’ sole liability under this warranty shall be limited to repairing or replacing the product and any liability for indirect or consequential loss or damage of any kind incurred or suffered by the customer due to a defect in the product, and in particular any loss or damage caused to any film or lenses or other equipment or accessories used with the product or for any loss resulting from delay in repair, is excluded.

Notes:

1 This Warranty is in addition to and does not affect the customer's statutory right.

2 If you have any queries regarding this Warranty, call any of the Olympus authorized service stations listed in the instructions.

Notes regarding warranty maintenance

1 This Warranty will only be valid if the Warranty Certificate is duly completed by Olympus or the dealer. Make sure that your name, the name of the dealer, the serial number and the year, month and date of purchase are all completed.

2 Since this Warranty Certificate will not be re-issued, keep it in a safe place.

3 Any request for repair by a customer in same country where the product was purchased shall be subject to the terms of the warranty issued by the Olympus distributor in that country. Where the local Olympus distributor does not issue a separate warranty or where the customer is not in the country where the product was purchased the terms of this worldwide warranty shall apply.

4 Where applicable, this Warranty is valid worldwide. The Olympus authorized service stations listed in this Warranty will gladly honor it.

* Please refer to the appended list for the authorized international Olympus service network.
