CAMERA DIAGRAM AND CONTROLS

HOW TO USE THE MODE DIAL
P Program shooting
Allows you to adjust both the aperture and shutter speed automatically.

A Aperture priority shooting
Allows you to set the aperture manually. The camera sets the shutter speed automatically.

S Shutter priority shooting
Allows you to set the shutter speed manually. The camera sets the aperture automatically.

M Manual shooting
Allows you to set both the aperture and shutter speed manually.

ISO button
(White balance) button
Setting ISO sensitivity
WB (White balance) button
Selects the white balance appropriate to the light source from the following options: Auto, preset white balance settings, customized white balance settings or registered white balance.

M-Mode button
(M-Mode) button
Selects image quality.

Flash mode button
(Flash mode) button
Selects a flash mode from auto-flash, red-eye reduction flash, slow synchronization, or flash off.

Camera on

HOW TO USE THE BUTTONS AND CONTROL DIAL

This camera has a variety of functions to enable you to optimize settings for various shooting conditions. You can set the functions using the buttons and the control dial while viewing the monitor.

Exposure compensation button
(Exposure compensation) button
Sets the exposure compensation value.

WB (White balance) button
Selects the white balance appropriate to the light source from the following options: Auto, preset white balance settings, customized white balance settings or registered white balance.

M-Mode button
(M-Mode) button
Selects image quality.

Flash mode button
(Flash mode) button
Selects a flash mode from auto-flash, red-eye reduction flash, slow synchronization or flash off.

Camera on

HOW TO USE THE AUTOFOCUS

a. While positioning the AF frame over the subject, press and hold the shutter button halfway.
b. The AF confirmation mark indicating that the focus and exposure are locked remains lit as long as the shutter button is kept depressed.
c. Press the shutter button completely to take the picture.

FLASH MODES
This camera features multiple flash modes. You can select the appropriate flash mode to suit the situation.

AUTO
- Auto flash - The camera detects if the flash is needed.

SLOW1
- Slow synchronization (1st curtain) - The flash fires right after the shutter fully opens.

SLOW2
- Slow synchronization (2nd curtain) - 2nd curtain flash fires just before the shutter closes.

SLOW3
- Slow synchronization + red-eye reduction flash - The flash fires when you want to use slow synchronization, yet also reduce the red-eye phenomenon.

FILL FLASH - Flash fires always. Suitable for taking subjects lit from behind by strong light.

FILL + RED-EYE REDUCTION - Flash fires + red-eye reduction flash. The mode makes it possible to fire the flash regardless of the light conditions and also to reduce red-eye phenomenon.

FLASH MODE

IMAGE QUALITY MODES
Your camera is equipped with multiple image quality modes, which determine the quality and file size of the pictures you take. Below is a general description of the commonly used modes. For a detailed description of all quality modes, refer to the Advanced Manual.
