Erases unwanted images.

Auto: Auto Flash - The flash fires automatically.
Red-eye reduction flash - Reduces the incidence of red-eye by emitting pre-flashes to shrink pupil size before taking the picture.
Slow synchronization + Red-eye reduction flash - This mode is suitable for portraits when you want to use slow synchronization, yet reduce the red-eye phenomenon.
Slow synchronization (1st curtain) - The flash fires just after the shutter fully opens.
Slow synchronization (2nd curtain) - 2nd curtain flash fires just before the shutter closes.
Flash off - The flash does not fire.
Flash always fires, Suitable for taking subjects 11m from behind by strong light.
Flash on - The flash fires. Suitable for when flash photography is not permitted. In this mode, the flash can be used as an AF illuminator when it is necessary.
Manual flash: You can also set the amount of light by turning the main dial to adjust the intensity.

RECORD MODES
Your camera is equipped with multiple record modes, which determine the quality and size of the images you take. Below is a general description of the commonly used modes. For a detailed description of all record modes, refer to the Instruction Manual.

a. Turn the camera on and set the MODE button to the desired mode.
b. Press the MENU button, then press [OK].
c. Use the arrow pad to select "[ALL ERASE]", then press the OK button.
d. Use the arrow pad to select "[YES]", then press the OK button.

HOW TO ERASE ALL PICTURES
WARNING - PERFORMING THESE STEPS WILL DELETE ALL STORED PICTURES!

E-MAILING A PICTURE
Using the OLYMPUS Master software (included), you can share your pictures with others by using the built-in e-mail feature.

After installing OLYMPUS Master, open the program and click "E-mail" in the toolbar. Select the images to attach to the e-mail within the thumbnail area, and drag and drop them into the register area.

At this time, you can receive your pictures to make them more manageable for e-mail. This helps you stay within the e-mail capacity limitations set by your e-mail provider.

When finished, click the "Launch Mailer" button at the bottom of the window. Your default e-mail program will open, and the selected picture(s) will automatically be attached to a new message.
