Thank you for purchasing an Olympus digital camera. Before you start to use your new camera, please read these instructions carefully to enjoy optimum performance and a longer service life. Keep this manual in a safe place for future reference.

- We recommend that you take test shots to get accustomed to your camera before taking important photographs.
- In the interest of continually improving products, Olympus reserves the right to update or modify information contained in this manual.
Checking the contents of the box

  - **(down)**
  - **button (erase)** (p. 23)
Operation guide

The △ ▽ ◄► symbols displayed during image selection and menu navigation indicate the roles played by the buttons on the arrow pad (p. 6).

On-screen operation guides indicate the roles played by the MENU and  button and zoom lever.

Using the Menu

Use the menu to change camera settings.

⚠️ There may be menus that are unavailable depending on other related settings or the shooting mode.

Function menu

Press ◄ during shooting to display the function menu. The function menu provides access to frequently used shooting settings.

To select the function menu

Use △ ▽ to select a menu and use ◄► to select a menu option. Press the  button to set the function menu.
Setup menu

Press the **MENU** button during shooting or playback to display the setup menu. The setup menu provides access to a variety of camera settings, including options not listed in the function menu, display options, and the time and date.

1. Press the **MENU** button.
   - The setup menu is displayed.

2. Press ▼ to select the page tabs. Use ▲ ▼ to select the desired page tab and press ►.

3. Use ▲ ▼ to select the desired submenu 1 and then press the **OK** button.

4. Use ▲ ▼ to select the desired submenu 2 and then press the **OK** button.
   - Once a setting is selected, the display returns to the previous screen.
   - There may be additional operations. “Menu Settings” (p. 40 to 58)

5. Press the **MENU** button to complete the setting.
Using the Touch Panel

Use the touch panel by touching the screen with your finger.

- The touch panel can be used for operations marked with \[\] in this manual.
- Using a screen protector or gloves may cause poor operability.
- Use a stylus pen (supplied) when it is difficult to operate with your finger.

Using for the live guide (p. 25)
In \[\text{i} \text{AUTO}\] mode, the live guide can be set.

1. Touch \[\text{LIVE GUIDE}\].
   - Touch an item to set the level.

2. Drag the level bar slider vertically to set the level, and touch \[\text{OK}\].
   - Touch \[\text{\_}\] to end the live guide.

Using for the shooting mode
By touching the screen, the subject to be focused on can be set or the picture can be taken.
Every time \[\text{\_}\] is touched, the operation is changed.
- \[\text{\_}\]: The subject that is touched is focused on and the picture is taken automatically.
- \[\text{\_\_}\]: The subject that is touched is AF locked. Press the shutter button to take the picture. Touch \[\text{\_\_}\] to release the AF lock. Focus lock ends when the shutter is released.

Using for the playback mode
The displayed image can be changed or enlarged.

Advancing and rewinding one frame at a time:
Drag the screen to left to advance one frame, and drag the screen to right to rewind one frame.

Zoom:
Touch \[\text{\_\_}\] to enlarge the image.
- When the enlarged image is dragged, the displayed image is also moved.

Index:
Touch \[\text{\_\_}\] to play back the image in index view.
- Touch the image to play back the image in single image view.

Playback (grouped image, panorama image, movie, Photo with Movie Clip, sound recorded with an image):
Touch \[\text{\_\_}\].
- Touch \[\text{\_\_}\] to expand the grouped images.

Preparing the Camera

Inserting the battery and card

1. Insert the battery with the C mark toward the battery lock knob.
   - Damage to the battery exterior (scratches, etc.) may produce heat or an explosion.
   - Insert the battery while sliding the battery lock knob in the direction of the arrow.
   - Insert the card straight until it clicks into place.

2. Battery/card compartment lock
   - When using the camera, be sure to close the battery/card compartment cover.
   - Slide the battery lock knob in the direction of the arrow to unlock, and then remove the battery.
   - Turn off the camera before opening the battery/card compartment cover.
   - Always use SD/SDHC/SDXC cards or Eye-Fi card with this camera. Do not insert other types of memory cards. “Using the card” (p. 70)
   - Do not touch the contact area of the card directly.
   - This camera can be used without a card by storing images in its internal memory.

3. “Number of storable pictures (still images)/Continuous recording length (movies) in the internal memory and cards” (p. 71, 72)

To remove the card

1. Press the card in until it clicks and comes out slightly, then remove the card.

2. Write-protect switch
   - Insert the battery with the C mark toward the battery lock knob.
   - Damage to the battery exterior (scratches, etc.) may produce heat or an explosion.
   - Insert the battery while sliding the battery lock knob in the direction of the arrow.
   - Insert the card straight until it clicks into place.
Charging the battery with the included USB-AC adapter

⚠ The included F-2AC USB-AC adapter (hereafter referred to as USB-AC adapter) differs depending on the region where you purchased the camera. If you received a plug-in type USB-AC adapter, plug it directly into AC outlet.

⚠ The included USB-AC adapter has been designed to be used for charging and playback. Do not take pictures while the AC adapter is connected to the camera.

⚠ When charging completes, be sure to unplug the USB-AC adopter from the outlet.

⚠ The battery can be charged while the camera is connected to the computer. Charging time varies depending on the performance of a computer. (There may be cases in which it takes approx. 10 hours.)

1 Connecting the camera

2 The battery is not fully charged at shipment. Before use, be sure to charge the battery until the indicator lamp turns off (up to 3.5 hours).

⚠ If the indicator lamp does not light, the USB-AC adapter is not connected to the camera correctly, or the battery, camera, or USB-AC adapter may be broken.
When to charge the batteries

Charge the battery when the error message shown below appears.

* Flashes in red

Monitor bottom left Error message

Using the supplied CD for setup

Installation of [ib] computer software is available on Windows computers only.

Windows

1. Insert the supplied CD in a CD-ROM drive.

Windows XP

- A “Setup” dialog will be displayed.

Windows Vista/Windows 7

- An Autorun dialog will be displayed. Click “OLYMPUS Setup” to display the “Setup” dialog.

2. Register your Olympus product.

- Click the “Registration” button and follow the on-screen instructions.

The camera must be connected to the computer for user registration. “Connecting the camera” (p. 12)

3. Install OLYMPUS Viewer 2 and [ib] computer software.

- Check the system requirements before beginning installation.
- Click the “OLYMPUS Viewer 2” or “OLYMPUS ib” button and follow the on-screen instructions to install the software.

OLYMPUS Viewer 2

* Other languages can be selected from the language combo box. For information on using the software, see online help.
3 Copy the camera manual.
   ● Click the “Camera Instruction Manual” button to open the folder containing the camera manuals. Copy the manual for your language to the computer.

Language, date, time, and time zone

You can choose the language in which menus and messages are displayed in the monitor. In addition, the time and date you enter here appears in a variety of roles, including in date stamps and the names of the image files containing pictures taken with the camera.

1 After turning the camera on with the ON/OFF button, select a language using △ ▽ ◄► and press the OK button.
   ! The menus can be used to change the selected language. [Menu] (p. 55)

2 Use △ ▽ to select the year for [Y].

3 Press ► to save the setting for [Y].

4 As in Steps 2 and 3, use △ ▽ ◄► to set [M] (month), [D] (day), [Time] (hours and minutes), and [Y/M/D] (date order), and then press the OK button.
   ! For precise time setting, press the OK button as the time signal strikes 00 seconds.
   ! To change the date and time, adjust the setting from the menu. [Menu] (Date/time) (p. 56)

5 Use ◄► to select the [ ] time zone and then press the OK button.
   ● Use △ ▽ to turn daylight saving time ([Summer]) on or off.

   ! The menus can be used to change the selected time zone. [World Time] (p. 56)
Before Using GPS

The camera’s GPS (Global Positioning System) feature determines your position (latitude and longitude) and stores this information with pictures taken with the camera. The camera uses supplementary orbital data (assisted GPS or A-GPS) for improved signal acquisition. A-GPS data must be updated every 14 days. Before using GPS, you will need to set the camera clock to the correct date and time. (p. 15)

Updating A-GPS Data

1 Install the update software (OLYMPUS A-GPS Utility).
   - Download the update software from the following website and install it on your computer.
   http://sdl.olympus-imaging.com/agps/

2 Connect the camera to the computer and launch the update software.
   “Connecting the camera” (p. 12)

   Once the software has started, follow the on-screen instructions.

Using GPS

1 Select [On] for [GPS Settings] > [GPS] in the \( \gamma \) (Settings Menu 3) tab.
   “Setup menu” (p. 8)

   ● Once the camera has determined the position, and location coordinates will appear in the display.

   The camera may take a few minutes to determine position after a period of disuse.
   If the icon is still flashing after several minutes, the camera is probably having difficulty detecting a signal. Move to an unobstructed outdoor area or otherwise change your location.
2 Press and hold △ in the shooting or playback display.

- Your location will be displayed in the monitor.
- Nearby landmarks in the GPS database will be displayed.

![GPS display with landmarks and options]

- Select a landmark.
- Update GPS data.

⚠️ Some countries or regions may regulate the use of GPS devices. Follow all local regulations.
⚠️ Turn GPS off when on board aircraft and in other locations in which the use of GPS devices is prohibited.
⚠️ The provision of A-GPS data may be terminated without prior notice.
⚠️ Position data may be unavailable or contain errors in the following locations:
  - Locations without a clear view of the sky (indoors, underground or underwater, or near trees or tall buildings)
  - Locations subject to strong magnetic or radio interference (near high-voltage power lines, magnets, electronic devices, or cell phones operating in the 1.5 GHz band)

GPS data may take more time acquire or be unavailable in some locations or at certain times of day.

⚠️ Do not cover the GPS antenna with your hands or metal objects.
⚠️ The camera can not acquire GPS data when the battery is low.
⚠️ The camera is not equipped for GPS navigation.
⚠️ While [Track] is [On], the GPS receiver will continue to draw power from the battery when the camera is off.
[Power Save] turns off automatically when GPS is on.
⚠️ GPS data are not recorded with movies.
Shooting, Playback, and Erasing

Shooting with the optimum aperture value and shutter speed (P mode)

In this mode, automatic shooting settings are activated while also allowing changes to a wide range of other shooting menu functions, such as exposure compensation, white balance, etc. as needed.

1 Set the mode dial to P.

2 Press the ON/OFF button to turn on the camera.

3 Hold the camera and compose the shot.

4 Press the shutter button halfway down to focus on the subject.

- When the camera focuses on the subject, the exposure is locked (shutter speed and aperture value are displayed), and the AF target mark changes to green.
- The camera was unable to focus if the AF target mark flashes red. Try focusing again.

The flash will automatically pop up and fire as required. Select [Flash Off] (p. 21) to prevent the flash firing. To lower flash, press it down with a finger.

Number of storable still pictures (p. 71)
“Focusing” (p. 66)

5 To take the picture, gently press the shutter button all the way down while being careful not to shake the camera.

Press the R button to start recording.

To view images during shooting
Pressing the ▶ button enables playback of images. To return to shooting, either press the ▶ button or press the shutter button halfway down.

To turn off the camera
Press the ON/OFF button again.

Displayed in red during shooting

Sound is recorded with movies.

The effects for the current shooting mode also apply to movies. Some shooting mode effects may not apply to movies.

You can shoot still images during movie recording. “Shooting still images while recording a movie” (p.32)

2 Press the ○ button again to stop recording.

Recording time
Continuous recording length (p. 72)
Using the zoom

Turning the zoom lever adjusts the shooting range.

W side  T side

Zoom bar

1 Optical zoom: 12.5x
2 Digital zoom: 4x

To take larger images
[Digital Zoom]/[Super-Res Zoom]

⚠️ The type and amount of zoom can be identified from the appearance of the zoom bar. The display differs depending on the options selected for [Digital Zoom] (p. 42), [Super-Res Zoom] (p. 44), and [Image Size] (p. 36).

Optical zoom:

<table>
<thead>
<tr>
<th>Image size</th>
<th>Zoom bar</th>
</tr>
</thead>
<tbody>
<tr>
<td>16M</td>
<td>[W T]</td>
</tr>
<tr>
<td></td>

Use △▽←→ to move the viewing area.

To stop [Photo Surfing]
Use △▽ to select [ALL], then press the OK button.

**Changing the image information display**

Shooting information settings displayed on the screen can be changed.

1. **Press △ (INFO).**
   - The displayed image information changes in the order shown below each time the button is pressed.

   **Normal**
   ![Normal view]

   **Detailed**
   ![Detailed view]

   ![No information]

   “Reading a histogram” (p. 21)
To change the shooting mode

The shooting mode (P, iAUTO, SCN, BEAUTY, MAGIC, MR, Off) can be changed by rotating the mode dial. "Mode dial" (p. 6)

The default settings of the function are highlighted in .

Shooting with automatic settings (iAUTO mode)

The camera will automatically select the optimal shooting mode for the scene. The shooting condition is decided by the camera and settings cannot be changed, excepting some functions.

1 Set the shooting mode to iAUTO.

The icon changes depending on the scene that the camera automatically selects

In some cases, the camera may not select the desired shooting mode.

When the camera cannot identify the optimal mode, P mode will be selected.

Using the live guide

The live guide can be used to change settings in iAUTO mode.

Guide items

- Change Color Saturation
- Change Color Image
- Change Brightness

1 Press OK to display the live guide.
2 Use △ ▽ to highlight an item and press OK.

Guide item

3 Use △ ▽ to choose a level and check the effect or description.
   - Press the shutter button halfway to select.

Guide item

4 Press the shutter button to take a picture.
   - To clear the live guide from the display, press the MENU button.

Level bar

Pictures may appear grainy at some live guide setting levels.
Changes to the live guide setting levels may not be visible on the screen.

The flash can not be used with the live guide.

Changes to the live guide options cancel previous changes.

Choosing the live guide settings that exceed the limits of the camera exposure meters may result in pictures that are over- or under-exposed.

⚠️ Using the best mode for the shooting scene (SCN mode)

1. Set the shooting mode to SCN.

2. Use ◀▶ to select the mode and then press the OK button.

In SCN modes, the optimum shooting settings are pre-programmed for specific shooting scenes. For this reason, settings may not be changed in some modes.

To take pictures of your pet’s face, select ([Pet Mode - Cat]/[Pet Mode - Dog])

Use ◀▶ to select [ ], [ ], and press the OK button to set.

- [Auto Release] is automatically selected, and when the subject’s face is recognized, the picture is taken automatically.
- To cancel [Auto Release], see “Using the self-timer” (p. 33).

Shooting 3D images (3D mode)

<table>
<thead>
<tr>
<th>Submenu 1</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Auto</td>
<td>Frame the photograph so that the target and pointer overlap; the shutter will be released automatically.</td>
</tr>
<tr>
<td>Manual</td>
<td>After taking the first shot, move the camera to match the image displayed in the monitor and take the second shot manually.</td>
</tr>
</tbody>
</table>

⚠️ Images shot in 3D mode cannot be displayed in 3D on this camera’s monitor.
Depending on the subject or the situation (if the distance between the camera and subject is too short), the image may not look 3D.

The 3D viewing angle varies depending on the subject, etc.

To exit 3D shooting mode without saving an image, press the \textbf{MENU} button.

The \textbf{[Image Size]} (p. 36) is fixed to [16:9].

The zoom ratio is fixed.

The focus, exposure and the white balance are fixed when the first image is taken.

The flash is fixed to [Flash Off].

\textbf{\textit{Shooting with special effects (MAGIC mode)}}

To add expression to your photo, select the desired special effect.

\textbf{1} Set the shooting mode to \textbf{MAGIC}.

\textbf{2} Use \textbf{\textless \textgreater} to select the mode and then press the \textbf{OK} button.

<table>
<thead>
<tr>

</tbody>
</table>

In \textbf{MAGIC} mode, the optimum shooting settings are pre-programmed for each scene effect. For this reason, some settings cannot be changed in some modes.

\textbf{\textit{Shooting with Beauty Fix effects (BEAUTY mode)}}

Depending on the picture, the editing may not be effective.

\textbf{1} Set the shooting mode to \textbf{BEAUTY}.

\textbf{2} Use \textbf{\textless \textgreater} to select the retouching setting, and press the \textbf{OK} button to set.
● [Set 1], [Set 2] or [Set 3] retouches the image according to the Beauty Settings. [Beauty Settings] (p. 57)

3 Point the camera toward the subject. Check the frame appearing around the face detected by the camera, and then press the shutter button to take the picture.

⚠ The unedited image and edited image are both saved.

⚠ If the image cannot be retouched, only the unedited image is saved.

⚠ The [Image Size] of the retouched image is fixed at [5M].

⚠ Only the face detected by the camera is retouched.

4 Select [OK] or [Beauty Fix] on the review screen, and press the button to save or to retouch the image additionally.

Beauty Fix

① Select a retouching item, and press the button.

② Press the button on the review screen.

● Settings for Beauty Fix can be registered. [Beauty Settings] (p. 57)

Creating panoramic images (p mode)

1 Set the shooting mode to .

2 Use to select the mode. When selecting [Auto], press . When selecting other than [Auto], press the button.

<table>
<thead>
<tr>
<th>Submenu</th>
<th>Application</th>
</tr>
</thead>
<tbody>
<tr>
<td>Auto</td>
<td>Panorama images are automatically combined just by swinging the camera in the shooting direction. Press the shutter button once to begin the sequence.</td>
</tr>
<tr>
<td>Manual</td>
<td>Three frames are taken and combined by the camera. The user composes the shots using the guide frame and manually releases the shutter.</td>
</tr>
<tr>
<td>PC</td>
<td>The frames that were taken are combined into a panorama image using the PC software.</td>
</tr>
</tbody>
</table>

3 When shooting with [Auto]

Use to select the angle of view and then press the button.

⚠ For details on installing the PC software, see “Using the supplied CD for setup” (p. 13).
When set to [Auto] or [Manual], [Image Size] (p. 36) is fixed to 2M or equivalent.

The focus, exposure, zoom position (p. 20), and white balance (p. 34) are locked at the first frame.

The flash (p. 21) is fixed to (Flash Off) mode.

To shoot with [Manual]

1. Use ▲ ▼ ◄► to specify at which edge the next picture is to be connected.

2. Press the shutter button to begin shooting. Move the camera slowly in the arrow-marked direction that shown on the monitor.

3. Compose the next shot so that joint area 1 overlaps joint area 2.

4. Press the shutter button to take the next shot.

5. Repeat steps 3 and 4 to take a third frame.

   - After the third frame is taken, the camera automatically processes the frames and the combined panorama image is displayed.

To exit the panorama function without saving an image, press the MENU button.

Taking pictures with [Auto]

1. Point the camera to the start position.
   - Use ▲ ▼ ◄► to select the shooting direction.

2. Press the shutter button to begin shooting. Move the camera slowly in the arrow-marked direction that shown on the monitor.

3. When shooting reaches the end of the guide on the monitor, it finishes automatically.
   - The camera automatically processes the images and the combined panorama image is displayed.
   - To stop shooting in the middle, press the shutter button or button. If the camera pauses for a while, shooting automatically finishes.

4. If the message “Image was not created.” is displayed, shoot again.

5. To exit the panorama function without saving an image, press the MENU button.
Taking pictures with [PC]

1. Use \( \triangle \nabla \leftarrow \rightarrow \) to select the direction that the frames are combined.
2. Press the shutter button to take the first frame, and then point the camera for the second frame. The shooting procedure is same as that of [Manual].
3. Panorama shooting is possible for up to 10 frames.
4. Repeat Step 2 until the number of desired frames is taken, and then press the \( \text{OK} \) button or \( \text{MENU} \) button when finished.

Refer to the PC software help guide for details on how to make panorama images.

Shooting a still image with movie clip (\( \text{Photo with Clip} \) mode)

When shooting a still image, a movie clip that includes before and after the shutter release is recorded simultaneously.

1. Set the shooting mode to \( \text{Photo with Clip} \).

2. Use \( \leftarrow \) to open the function menu. Use \( \leftarrow \rightarrow \) to select the length of movie clip and then press the \( \text{OK} \) button.

<table>
<thead>

</tbody>
</table>

Shooting may not be available in the following conditions; right after entering the shooting mode (such as right after turning power on) or right after a picture is shot.

The image size of the movie is set to [VGA] or [360].

Taken images are displayed as a group. “Playing back grouped images” (p.38)
**Shooting two types of image at a time (MR mode)**

1. **Set the shooting mode to MR (Multi-Record).**

2. **Use \(<\) to select the mode and then press the \(\triangledown\) button.**

   - **Submenu** | **Description**
     - Multi-Framing | The camera takes two images at different angles simultaneously; one wide and one cropped.
     - Multi-File | The camera takes two images in different image sizes simultaneously.
     - MAGIC and Original | The camera takes two images simultaneously; one applying Magic Filter and an unaffected original.

To use [Multi-Framing]
You can track the subject for the close-up shot. Tap \(\triangleright\) to enable tracking.

**Subject Tracking**
1. Tap \(\triangleright\) to turn tracking \(\triangleright\).
2. Select the frame setting and press the \(\triangleright\) button.
3. Align the AF target mark on the subject for zoom angle and press the \(\triangleright\) button.
   - The frame automatically tracks the subject detecting it by color.

**Disabling Subject Tracking**
1. Tap \(\triangleright\) to turn tracking \(\triangleright\).
2. Use \(\triangleright\) \(\triangleright\) \(\triangleright\) or tap to position the frame.
   - Images can not be taken by tapping the monitor.
   - When the camera fails to track the subject, the frame changes to red.
   - The [Image Size] is limited as follows.
     - Still image: \(\triangleright\) or lower
     - S: \(\triangleright\) or lower
     - Movie: \(\triangleright\) or lower

To use [Multi-File]
1. Select the size for the sub image and press the \(\triangleright\) button.
The [Image Size] is limited as follows.

Still image
- Main: [2M] or larger
- Sub: [1M], [VGA], [QVGA]

Movie
- Main: [1080] [720]
- Sub: [368] [180]

To use [MAGIC and Original]

1. Use < or > to select the mode and the press the OK button.

- When shooting movies in this mode, the [Image Size] is limited to [720] or lower.

- When shooting movies in this mode, [Sparkle], [Soft Focus], [Miniature], [Fragmented], and [Dramatic] are not available.

---

**Shooting still images while recording a movie**

1. Set the shooting mode to P or [AUTO].

2. Press the  button to start recording a movie.

3. Press the shutter button to shoot a still image.
   - Press the  button again to stop recording the movie.

- Taken images are displayed as a group. (p.38)

- The still images can be used as index of the movie. (p.38)

- The number of still images that can be shot varies depending on the image size settings. (p.36)

- You can shoot while checking the recordable areas of the still image and movie. (p.21)

- If [Hi] or [AUTO] is selected, only one photo will be taken each time the shutter button is pressed.

- Taken images are displayed as a group. (p.38)
Using Shooting Functions

“Using the Menu” (p. 7)

Shooting closeups (Macro shooting)

This function enables the camera to focus and shoot subjects at close distances.

1 Select the macro option in the function menu.

2 Use < or > to select the setting option, and press the OK button to set.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Macro mode is deactivated.</td>
</tr>
<tr>
<td>Macro</td>
<td>This enables shooting as close as 10 cm/3.9 in.*1 (90 cm/35.4 in.*2) to the subject.</td>
</tr>
<tr>
<td>Super Macro*3</td>
<td>This enables shooting as close as 1 cm/0.4 in. to the subject.</td>
</tr>
</tbody>
</table>

*1 When the zoom is at the widest (W) position.
*2 When the zoom is at the most telephoto (T) position.
*3 The zoom is automatically fixed.

The flash (p. 21) and zoom (p. 20) cannot be set when [Super Macro] (p. 33) is selected.

Using the self-timer

After the shutter button is pressed all the way down, the picture is taken after a short delay.

1 Select the self-timer option in the function menu.

2 Use < or > to select the setting option, and press the OK button to set.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>The self-timer is deactivated.</td>
</tr>
<tr>
<td>12 sec</td>
<td>The self-timer lamp turns on for approx. 10 seconds, then blinks for approx. 2 seconds, and then the picture is taken.</td>
</tr>
<tr>
<td>2 sec</td>
<td>The self-timer lamp blinks for approx. 2 seconds, then the picture is taken.</td>
</tr>
<tr>
<td>Auto Release*1</td>
<td>When your pet (cat or dog) turns its head towards the camera, its face is recognized and the picture is taken automatically.</td>
</tr>
</tbody>
</table>

*1 [Auto Release] is displayed only when the SCN mode is [宠物] or [宠物].

To cancel the self-timer after it starts
Press the MENU button.
Adjusting the brightness (Exposure compensation)

The standard brightness (appropriate exposure) set by the camera based on the shooting mode (except for [AUTO]) can be adjusted brighter or darker to obtain a desired shot.

1. Select the exposure compensation option in the function menu.

2. Use ◀▶ to select the desired brightness, and press the OK button.

Adjusting to a natural color scheme (White balance)

For more natural coloring, choose a white balance option suited to the scene.

1. Select the white balance option in the function menu.

2. Use ◀▶ to select the setting option, and press the OK button to set.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>WB Auto</td>
<td>The camera automatically adjusts the white balance according to the shooting scene.</td>
</tr>
<tr>
<td>☀️</td>
<td>For shooting outdoors under a clear sky.</td>
</tr>
<tr>
<td>☁️</td>
<td>For shooting outdoors under a cloudy sky.</td>
</tr>
<tr>
<td>⭐️</td>
<td>For shooting under tungsten lighting.</td>
</tr>
<tr>
<td>🌃</td>
<td>For shooting under white fluorescent lighting.</td>
</tr>
<tr>
<td>🌃1</td>
<td>For setting the subtle shades of color that cannot be adjusted by Auto, Sunny, Cloudy, Incandescent, or Fluorescent.</td>
</tr>
</tbody>
</table>

Using the one touch white balance

① Select the white balance option in the function menu.
② Use ◀▶ to select [ Vanessa ] or [ Q ], and face the camera toward white paper.
   - Set the paper to fill the entire screen, and make sure that there is no shadow area.
   - Setting the zoom to telephoto (T) is recommended.
   - Perform this procedure under the light where the pictures are actually taken.
③ Press the MENU button.
   - The camera releases the shutter and the white balance is registered.
   - The registered white balance is stored in the camera. The data will not be cleared by turning off the power.
   - When the [ Vanessa ] or [ Q ] whose white balance has already been registered is selected in Step ②, new white balance will be registered.
When the white area is not large enough or when the color is too bright, too dark, or loud, the white balance cannot be registered. Return to Step 2. Or, set the other white balance.

Selecting the ISO sensitivity

1 Select the ISO setting option in the function menu.

2 Use < or > to select the setting option, and press the OK button to set.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ISO Auto</td>
<td>The camera automatically adjusts the sensitivity according to the shooting scene.</td>
</tr>
<tr>
<td>High ISO Auto</td>
<td>The camera uses a higher sensitivity compared to [ISO Auto] to minimize blur caused by a moving subject or by camera shake.</td>
</tr>
<tr>
<td>Value</td>
<td>The ISO sensitivity is fixed to the selected value.</td>
</tr>
</tbody>
</table>

ISO stands for International Organization for Standardization. ISO standards specify the sensitivity for digital cameras and film, thus codes such as “ISO 100” are used to represent sensitivity.

In the ISO setting, although smaller values result in less sensitivity, sharp images can be taken under fully lit conditions. Larger values result in higher sensitivity, and images can be taken at fast shutter speeds even under low light conditions. However, high sensitivity introduces noise into the resulting picture, which may give it a grainy appearance.

Sequential shooting (Drive)

Pictures are taken sequentially while the shutter button is held down.

1 Select the drive option in the function menu.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>One frame is shot each time the shutter button is pressed.</td>
</tr>
<tr>
<td>1</td>
<td>The camera takes sequential shots at approximately 2.3 frames/sec.</td>
</tr>
<tr>
<td>2</td>
<td>The camera takes sequential shots at approximately 10 frames/sec.</td>
</tr>
<tr>
<td>3</td>
<td>The camera takes sequential shots at approximately 15 frames/sec.</td>
</tr>
<tr>
<td>+</td>
<td>The camera takes sequential shots at approximately 60 frames/sec.</td>
</tr>
<tr>
<td>AUTO</td>
<td>The camera takes up to 16 photos at regular intervals while holding the shutter button.</td>
</tr>
</tbody>
</table>
The [Image Size] is limited. [\(\text{Hi}\)] [\(\text{Hi}\)] [\(\text{Auto}\): [\(3\text{M}\)] or lower

With settings other than [\(\text{O}\)], the flash (p. 21) is fixed to [\(\text{Flash Off}\)].

Digital zoom (p. 42) is not available with high-speed sequential shooting or [\(\text{Auto}\)]. The ISO sensitivity is fixed to [ISO Auto].

With settings other than [\(\text{O}\)], the focus, exposure and the white balance are fixed when the first frame is shot.

## Selecting the Size of Photographs

1. Select an image size in the function menu.

2. Use \(\updownarrow\) to select the setting option, and press the \(\text{OK}\) button to set.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>

<td>Suitable for playing pictures on a widescreen TV and for printing on A5 or 5&quot;x7&quot;.</td>
</tr>
</tbody>
</table>
Playing back panorama images

Panorama images that were combined together using [Auto] or [Manual] can be scrolled for viewing.

“Creating panoramic images (H mode)” (p. 28)

1 Select a panorama image during playback.

“Viewing images” (p. 22)

Press the A button.

Current viewing area

To control panorama image playback

Zoom in/Zoom out: Press the OK button to pause playback. Then turn the zoom lever to enlarge/shrink the image.

Playback direction: Press △ ▽ ◀▶ to pause playback and scroll the image in the direction of the pressed button.

Pause: Press the OK button.

Restart scrolling: Press the OK button.

Stop playback: Press the MENU button.

Playing back 3D images

3D images shot with this camera can be played back on 3D-compatible devices connected to this camera using an HDMI cable (sold separately).

“Shooting 3D images (3D mode)” (p. 26)

When playing back 3D images, read the warnings in the instruction manual for the 3D-compatible devices carefully.

1 Connect the 3D-compatible device and camera using the HDMI cable.

For the connection and setting method, see “Connection via HDMI cable” (p. 54)

2 Use ◀▶ to select [3D Show] and then press the OK button.

3 Use ◀▶ to select the 3D image to play back and then press the OK button.
To start a slideshow, press the **MENU** button. To stop the slideshow, press the **MENU** or **OK** button.

3D images are composed of JPEG files and MPO files. If any files are deleted on a computer, playback of 3D images may not be possible.

**Playing back grouped images**

Depending on the settings, the taken images are displayed as a group during playback. Several operations are available for the grouped images; such as expanding to view or erase images respectively, or erasing the grouped images collectively.

<table>
<thead>
<tr>
<th>T side</th>
<th>Expands (except for the <strong>12/02/26</strong> images).</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• Select the image and press the <strong>OK</strong> button to display the images respectively.</td>
</tr>
<tr>
<td></td>
<td>• Use &lt;&lt;&gt;&gt; to view the previous/next frame.</td>
</tr>
</tbody>
</table>

| **OK** button | Playback/pauses playback. |

| △ ▽          | Adjusts the volume when playing back images with sound. |

If a group frame is erased, all images in that group are erased collectively. If the group includes images you want to keep, expand the group and protect them respectively.

**Sequential images frame**

- The sequentially shot images are played back automatically.
- Expand to view the images in index view.

**Movie with still images frame**

- The movie clip and the still images are played back.
- Expand to view the images in index view.
- Pause the playback and turn the zoom lever to the W side to display the still images as a chapter index of the movie. Select the still image and press the **OK** button to play back the movie from that point.
(Multi-Record) frame

- The images are played back.
- Expand to display two images side-by-side.
- Turn the zoom lever during playback to switch between two images.

<td></td>
</tr>
</tbody>
</table>

1. Use < | > to select an image.
2. Use ▲ ▼ to select an image size and press the ( OK ) button.
   - The resized image is saved as a separate image.

3. Press the ( OK ) button after you have selected the area to trim.
   - The edited image is saved as a separate image.

Adding sound to still images [R]

(Playback Menu) ➤ Edit ➤ R

1. Use < | > to select an image.
2. Aim the microphone toward the sound source.
3. Press the ( OK ) button.
   - Recording starts.
   - The camera adds (records) sound for approx. 4 seconds while playing back the image.
Adjusting Exposure for Faces
[Beauty Fix]

(Playback Menu) ➤ Edit ➤ Beauty Fix

Depending on the picture, the editing may not be effective.

1. Select a picture using ◀▶ and press the OK button.
2. Select an option using ▲▼ and press the OK button.
3. Select [OK] or [Beauty Fix] in the confirmation dialog and press the OK button to save the retouched copy or make additional changes.
   ● The retouched image is saved as a separate image.

[Image Size] is set to [5M] or below.

Beauty Fix

1. Select an option and press the OK button.

2. A confirmation dialog will be displayed; press the OK button.

Brightening areas that are dark due to backlight or other reasons
[Shadow Adj]

(Playback Menu) ➤ Edit ➤ Shadow Adj

1. Use ◀▶ to select an image, and press the OK button.
   ● The edited image is saved as a separate image.

Depending on the picture, the editing may not be effective.

The retouching process may lower the image resolution.

Retouching red eyes in flash shooting
[Redeye Fix]

(Playback Menu) ➤ Edit ➤ Redeye Fix

1. Use ◀▶ to select an image, and press the OK button.
   ● The edited image is saved as a separate image.

Depending on the picture, the editing may not be effective.

The retouching process may lower the image resolution.

Changing the landmark information recorded on the images [Landmark]

(Playback Menu) ➤ Edit ➤ Landmark

You can change the landmark information (such as place names and names of buildings) recorded on the images when they were shot using the GPS function to different landmark information registered near the place where you shot the images.

Refer to “Recording the shooting location and time information on the images shot [GPS Settings]” (p. 58).
1. Select the image using < → , and press the OK button.
   - If the target landmark is at a distance from the position recorded on the images, it may not be displayed.
   - A list of the landmarks registered near the position recorded on the images are displayed.
2. Select the new landmark to be recorded on the image using △ ▽ , and press the OK button.

**Rotating images [.isDirectory]**

- Use < → to select an image.
- Press the OK button to rotate the image.
- If necessary, repeat Steps 1 and 2 to make settings for other images, and press the MENU button.

⚠️ The new picture orientations will be saved even after the power is turned off.

**Capturing still images from movies [Movie Trimming]**

- Use < → to select the movie and press the OK button.
- Press the MENU button to display the frame to be captured and press the OK button.

● The selected frame is recorded as a still image.

**Trimming long movies [Movie Trimming]**

- Use < → to select the movie and press the OK button.
- Press the OK button to display the frame to start erasing, and then press the OK button.
- Use < → to display the frame to end erasing, and then press the OK button.
- Use △ ▽ to select [Erase] and press the OK button.

  - To cancel trimming, select [Cancel].

⚠️ Movie trimming is processed by seconds. The movie length is automatically adjusted so that the selected start and end frames are included.

**When editing movies in a group**

1. Expand the desired group. "Playing back grouped images" (p.38)
2. Use < → to select the movie and press the OK button.

   - When you perform trimming on the group which includes two movies without expanding it, both movies are edited.
   - When you expand the group to edit respective movie, the edited movie can be saved respectively as [New File].
**Erasing images [Erase]**

(Playback Menu) ➤ Erase

<table>

</tr>
</tbody>
</table>

⚠️ When erasing pictures in the internal memory, do not insert the card into the camera.

⚠️ Protected images cannot be erased.

**To individually select and erase images [Sel. Image]**

1. Use △ ▽ to select [Sel. Image], and press the OK button.
2. Use ◀ ▶ to select the image to be erased, and press the OK button to add a ✓ mark to the image.
   - Turn the zoom lever to the W end to display an index view. Images can be quickly selected using the △ ▽ ◀ ▶ buttons. Turn to the T end to return to the single frame display.
3. Repeat Step 2 to select the images to be erased, and then press the MENU button to erase the selected images.
4. Use △ ▽ to select [Yes], and press the OK button.
   - The images with a ✓ mark are erased.

**To erase all images [All Erase]**

1. Use △ ▽ to select [All Erase], and press the OK button.
2. Use △ ▽ to select [Yes], and press the OK button.

**Protecting images [🔒]**

(Playback Menu) ➤ 🔒

ทำความสะอาดภาพ [Erase] ทำความสะอาดภาพ [Erase]

Protected images cannot be erased by [Erase] (p. 23, 49), [Sel. Image] (p. 49), [Erase Group] (p. 49) or [All Erase] (p. 49), but all images are erased by [Memory Format]/[Format] (p. 50).

1. Use ◀ ▶ to select an image.
2. Press the OK button.
   - Press the OK button again to cancel the settings.
3. If necessary, repeat Steps 1 and 2 to protect other images, and press the MENU button.

**Select images for upload to the Internet using the supplied OLYMPUS Viewer 2 software [Upload Order]**

(Playback Menu) ➤ Edit ➤ Upload Order

1. Use ◀ ▶ to select an image.
2. Press the OK button.
   - Press the OK button again to cancel the settings.
3. Repeat Steps 1 and 2 as required.
4. Press the MENU button.

⚠️ Only JPEG files can be selected for upload.

⚠️ See on-line help for upload instructions.

⚠️ GPS data recorded with images can not be deleted. Select [Off] for [GPS Settings] if you do not wish to reveal the locations where photographs were taken.
Menus for Other Camera Settings

</tr>
</tbody>
</table>

*1 The number for the folder name is reset to 100, and the one for the file name is reset to 0001.
Adjusting the image processing function [Pixel Mapping]

[Settings Menu 2] → Pixel Mapping

This function has already been adjusted at factory shipping, and no adjustment is needed right after purchase. Approximately once a year is recommended.

For best results, wait at least one minute after taking or viewing pictures before performing pixel mapping. If the camera is turned off during pixel mapping, be sure to perform it again.

To adjust the image processing function
Press the [button when [Start] (Submenu 2) is displayed.

- The check and adjustment of the image processing function starts.

Adjusting the brightness of the monitor [/favicon]

[Settings Menu 2] → !

To adjust the monitor brightness
1. Use ▲▼ to adjust the brightness while viewing the screen, and then press the [button.

Playing back images on a TV [TV Out]

[Settings Menu 2] → TV Out

The TV video signal system varies depending on the countries and regions. Before viewing camera images on your TV, select the video output according to your TV’s video signal type.

<table>
<thead>
<tr>
<th>Submenu 2</th>
<th>Submenu 3</th>
<th>Application</th>
</tr>
</thead>
<tbody>
<tr>
<td>NTSC/PAL</td>
<td>NTSC</td>
<td>Connecting the camera to a TV in North America, Taiwan, Korea, Japan, and so on.</td>
</tr>
<tr>
<td></td>
<td>PAL</td>
<td>Connecting the camera to a TV in European countries, China, and so on.</td>
</tr>
<tr>
<td>HDMI Out</td>
<td>480p/576p, 720p, 1080i</td>
<td>Set the signal format to be given priority. If the TV setting does not match, it is changed automatically.</td>
</tr>
<tr>
<td>HDMI Control</td>
<td>Off</td>
<td>Operate with the camera.</td>
</tr>
<tr>
<td></td>
<td>On</td>
<td>Operate with the TV remote control.</td>
</tr>
</tbody>
</table>

The factory default settings differ according to the region where the camera is sold.
To play back camera images on a TV

- Connection via AV cable
  1. Use the camera to select the same video signal system as the one of connected TV ([NTSC]/[PAL]).
  2. Connect the TV and camera.

- Connection via HDMI cable
  1. On the camera, select the digital signal format that will be connected ([480p/576p]/[720p]/[1080i]).
  2. Connect the TV and camera.
  3. Turn on the TV, and change “INPUT” to “VIDEO (an input jack connected to the camera)”.
  4. Turn on the camera, and use </> to select the image for playback.

⚠️ When the camera is connected to the computer by the USB cable, do not connect the HDMI cable to the camera.
For details on changing the input source of the TV, refer to the TV’s instruction manual.

When the camera and TV are connected by both an AV cable and an HDMI cable, the HDMI cable will take priority.

Depending on the TV’s settings, the displayed images and information may become cropped.

**To operate images with the TV remote control**

1. Set [HDMI Control] to [On], and turn off the camera.
2. Connect the camera and TV with an HDMI cable. “Connection via HDMI cable” (p. 54)
3. First turn on the TV, and then turn on the camera.
   - Operate by following the operation guide that is displayed on the TV.

With some TVs, operations cannot be performed with the TV remote control even though the operation guide is displayed on the screen.

If operations cannot be performed with the TV remote control, set [HDMI Control] to [Off] and operate using the camera.

### Saving battery power between shots

**[Power Save]**

- **(Settings Menu 2) ➤ Power Save**

<table>
<thead>
<tr>
<th>Submenu 2</th>
<th>Application</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Cancels [Power Save].</td>
</tr>
<tr>
<td>On</td>
<td>When the camera is not being used for approx. 10 seconds, the monitor automatically turns off to save battery power.</td>
</tr>
</tbody>
</table>

- **To resume standby mode**
  Press any button.

### Changing the display language

- **(Settings Menu 2) ➤ **

<table>
<thead>
<tr>
<th>Submenu 2</th>
<th>Application</th>
</tr>
</thead>
<tbody>
<tr>
<td>Languages</td>
<td>The language for the menus and error messages displayed on the monitor is selected.</td>
</tr>
</tbody>
</table>
**Setting the date and time [**]**

* (Settings Menu 2) ➤ **

“Language, date, time, and time zone” (p. 15).

**To select the date display order**

1. Press D after setting Minute, and use △ † to select the date display order.
2. Press the OK button to set.

**To check the date and time**

Press the INFO button while the camera is turned off. The current time is displayed for approx. 3 seconds.

---

**Choosing home and alternate time zones [World Time]**

* (Settings Menu 3) ➤ World Time

You will not be able to select a time zone using [World Time] if the camera clock has not first been set using [**].

<table>
<thead>
<tr>
<th>Submenu 2</th>
<th>Submenu 3</th>
<th>Application</th>
</tr>
</thead>
<tbody>
<tr>
<td>Home/Alternate</td>
<td>†</td>
<td>The time in the home time zone (the time zone selected for  †  in submenu 2).</td>

⚠️ [Auto Time Adjust] applies only when 🏡 (home time zone) is selected for [World Time].

⚠️ Track logs are stored in the GPSLOG folder on the memory card. A new file is created each time you select [Save]. Multiple files will be created if:
- The date changes during tracking
- You choose another option for [Track]

Tracking ends automatically when:
- The battery is exhausted
- The camera is left off for more than 24 hours

For information on such topics as viewing GPS tracks, see the manual for your GPS tracking software.
Direct printing (PictBridge*1)

By connecting the camera to a PictBridge-compatible printer, you can print images directly without using a computer.

To find out if your printer supports PictBridge, refer to the printer’s instruction manual.

*1 PictBridge is a standard for connecting digital cameras and printers of different makers and printing out pictures directly.

The printing modes, paper sizes, and other parameters that can be set with the camera vary depending on the printer that is used. For details, refer to the printer's instruction manual.

For details on the available paper types, loading paper, and installing ink cassettes, refer to the printer's instruction manual.

Printing images at the printer’s standard settings [Easy Print]

In the setup menu, set [USB Connection] to [Print].

“USB Connection” (p. 51)

1 Display the image to be printed on the monitor.

“Viewing images” (p. 22)

2 Turn on the printer, and then connect the printer and camera.

3 Press ► to start printing.

4 To print another image, use ◀► to select an image, and press the OK button.

To exit printing

After a selected image is displayed on the screen, disconnect the USB cable from the camera and printer.
Changing the printer’s settings for printing [Custom Print]

1. Follow Steps 1 and 2 for [Easy Print] (p. 59) and press the OK button.

2. Use \( \triangle \) \( \nabla \) to select the print mode, and press the OK button.

<table>
<thead>
<tr>
<th>Submenu 2</th>
<th>Application</th>
</tr>
</thead>
<tbody>
<tr>
<td>Print</td>
<td>This prints the image selected in Step 6.</td>
</tr>
<tr>
<td>All Print</td>
<td>This prints all images stored in the internal memory or card.</td>
</tr>
<tr>
<td>Multi Print</td>
<td>This prints one image in a multiple layout format.</td>
</tr>
<tr>
<td>All Index</td>
<td>This prints an index of all images stored in the internal memory or card.</td>
</tr>
<tr>
<td>Print Order*</td>
<td>This prints images based on the print reservation data on the card.</td>
</tr>
</tbody>
</table>

* [Print Order] is available only when print reservations have been made. “Print Reservations (DPOF)” (p. 62)

3. Use \( \triangle \) \( \nabla \) to select [Size] (Submenu 3), and press \( \triangleright \).

   ! If the [Printpaper] screen is not displayed, the [Size], [Borderless], and [Pics/Sheet] are set to the printer’s standard.

4. Use \( \triangle \) \( \nabla \) to select the [Borderless] or [Pics/Sheet] settings, and press the OK button.

<table>
<thead>
<tr>
<th>Submenu 4</th>
<th>Application</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off/On*</td>
<td>The image is printed with a border around it ([Off]). The image is printed to fill the entire paper ([On]).</td>
</tr>
<tr>
<td></td>
<td>(The number of images per sheet varies depending on the printer.)</td>
</tr>
<tr>
<td>Off</td>
<td>The number of images per sheet ([Pics/Sheet]) is selectable only when [Multi Print] is selected in Step 3.</td>
</tr>
</tbody>
</table>

* The available settings for [Borderless] vary depending on the printer.

5. Use \( \leftarrow \) \( \rightarrow \) to select an image.

6. Press \( \triangle \) to make a print reservation for the current image. Press \( \nabla \) to make the detailed printer settings for the current image.
To make the detailed printer settings

1. Use △ ▽ ◄► to select the setting, and press the OK button.

<table>
<thead>
<tr>
<th>Submenu 5</th>
<th>Submenu 6</th>
<th>Application</th>
</tr>
</thead>
<tbody>
<tr>
<td>[X]</td>
<td>0 to 10</td>
<td>This selects the number of prints.</td>

</tr>
</tbody>
</table>

To crop an image [□]

1. Use the zoom lever to select the size of the cropping frame, use △ ▽ ◄ ► to move the frame, and then press the OK button.

2. Use △ ▽ to select [OK], and press the OK button.

7. If necessary, repeat Steps 5 and 6 to select the image to be printed, make the detailed settings, and set [Single Print].

8. Press the OK button.

9. Use △ ▽ to select [Print], and press the OK button.
   - Printing starts.
   - When [Option Set] is selected in [All Print] mode, [Print Info] screen is displayed.
   - When printing is finished, the [Print Mode Select] screen is displayed.

To cancel printing

1. Press the MENU button while [Do Not Remove USB Cable] is displayed.
2. Select [Cancel] using △ ▽ and then press the OK button.

10. Press the MENU button.

11. When the message [Remove USB Cable] is displayed, disconnect the USB cable from the camera and printer.
Print Reservations (DPOF”1)

In print reservations, the number of prints and date imprint option are saved in the image on the card. This enables easy printing at a printer or print shop supporting DPOF by using only the print reservations on the card without a computer or a camera.

”1 DPOF is a standard for storing automatic printout information from digital cameras.

!” Print reservations can be set only for the images stored on the card. Insert a card with recorded images before making print reservations.

!” DPOF reservations set by another DPOF device cannot be changed by this camera. Make changes using the original device. Making new DPOF reservations with this camera will erase the reservations made by the other device.

!” DPOF print reservations can be made for up to 999 images per card.

Single-frame print reservations [1]

1 Display the setup menu.

“Setup menu” (p. 8)

2 From the Settings Menu 1 9, select [Print Order] and then press the OK button.

3 Use  ▲  ▼ to select [1], and press the OK button.

4 Use ▶  ◀ to select the image for print reservation. Use ▲  ▼ to select the quantity. Press the OK button.

5 Use ▲  ▼ to select the [ ] (date print) screen option, and press the OK button.

<table>
<thead>
<tr>
<th>Submenu 2</th>
<th>Application</th>
</tr>
</thead>
<tbody>
<tr>
<td>No</td>
<td>This prints the image only.</td>
</tr>
<tr>
<td>Date</td>
<td>This prints the image with the shooting date.</td>
</tr>
<tr>
<td>Time</td>
<td>This prints the image with the shooting time.</td>
</tr>
</tbody>
</table>

6 Use ▲  ▼ to select [Set], and press the OK button.
### Reserving one print each of all images on the card [ALL]

1. Follow Steps 1 and 2 in [p. 62].
2. Use △ ▽ to select [ALL], and press the OK button.
3. Follow Steps 5 and 6 in [p. 62].

### Resetting all print reservation data

1. Follow Steps 1 and 2 in [p. 62].
2. Select either [ ] or [ALL], and press the OK button.
3. Use △ ▽ to select [Reset], and press the OK button.

### Resetting the print reservation data for selected images

1. Follow Steps 1 and 2 in [p. 62].
2. Use △ ▽ to select [ ], and press the OK button.
3. Use △ ▽ to select [Keep] and press the OK button.
4. Use ◀▶ to select the image with the print reservation you want to cancel. Use △ ▽ to set the print quantity to “0”.
5. If necessary, repeat Step 4, and then press the OK button when finished.
6. Use △ ▽ to select the [ ] (date print) screen option, and press the OK button.
   - The settings are applied to the remaining images with the print reservation data.
7. Use △ ▽ to select [Set], and press the OK button.
Usage Tips

If the camera does not work as intended, or if an error message is displayed on the screen, and you are unsure of what to do, refer to the information below to fix the problem(s).

Troubleshooting

Battery

“The camera does not work even when batteries are installed”.

- Insert recharged batteries in the correct direction.
  “Inserting the battery and card” (p. 11), “Charging the battery with the included USB-AC adapter” (p. 12)
- Battery performance may have been reduced temporarily due to low temperature. Take the batteries out of the camera, and warm them by putting them in your pocket for a while.

Card/Internal memory

“An error message is displayed”.

“Error message” (p. 65)

Shutter button

“No picture is taken when the shutter button is pressed”.

- Cancel sleep mode.
  To save battery power, the camera automatically goes into sleep mode and the monitor turns off if there is no operation for 3 minutes when the camera is turned on. No picture is taken even if the shutter button is fully pressed in this mode. Operate the zoom lever or other buttons to restore the camera from sleep mode before taking a picture. If the camera is left for another 12 minutes, it automatically turns off. Press the ON/OFF button to turn the camera on.
- Press the button to switch to the shooting mode.
- Wait until (flash charge) stops blinking before taking pictures.
- With prolonged camera use, the internal temperature may increase, resulting in automatic shutdown. If this occurs, remove the battery from the camera and wait until the camera has sufficiently cooled. The camera’s external temperature may also increase during use, however this is normal and does not indicate malfunction.

Monitor

“Difficult to see”.

- Condensation may have occurred. Turn off the power, and wait for the camera body to become acclimated to the surrounding temperature and dry out before taking pictures.

“The light is caught in the picture”.

- Shooting with flash in dark situations results in an image with many flash reflections on dust in the air.

Date and time function

“Date and time settings return to the default setting”.

- If the batteries are removed and left out of the camera for about 3 days¹, the date and time settings return to the default setting, and must be reset.
  ° The time until the date and time settings return to the default setting varies depending on how long the batteries have been loaded.

“Language, date, time, and time zone” (p. 15)

Miscellaneous

“The camera makes a noise when taking pictures”.

- The camera may activate the lens and make a noise even if no operation is performed. This is because the camera automatically performs actions of auto focus as far as it is ready to shoot.

“The compass heading is not correct or the compass needle flashes”.

- The compass does not function as expected in the vicinity of strong electromagnetic fields such as those produced by televisions, microwaves, large electric motors, radio transmitters, and high-voltage power lines. Normal function can sometimes be restored by moving the camera through a figure eight while rotating your wrist.
Error message

When one of the messages below is displayed on the monitor, check the corrective action.

<table>
<thead>

*1 Before erasing important images, download them to a computer.
*2 All data will be erased.
*3 This is displayed, for instance, when the printer’s paper tray has been removed. Do not operate the printer while making the print settings on the camera.
*4 This camera may be unable to print images taken by other cameras.
Shooting tips

When you are unsure of how to take a picture that you envision, refer to the information below.

Focusing

“Focusing on the subject”

- Taking a picture of a subject not in the center of the screen
  After focusing on an object at the same distance as the subject, compose the shot, and take the picture.
  Pressing the shutter button halfway. (p. 18)
- Set [AF Mode] (p. 41) to [Face/iESP]
- Taking a picture in [AF Tracking] mode (p. 41)
  The camera tracks the subject movement automatically to focus on it continuously.
- Taking a picture of a shadowy subject
  Using the AF illuminator makes focusing easier. [AF Illuminat.] (p. 42)
- Taking a picture of subjects where autofocus is difficult
  In the following cases, after focusing on an object (by pressing the shutter button halfway down) with high contrast at the same distance as the subject, compose the shot, and take the picture.

  Subjects with low contrast

  When extremely bright objects appear in the center of the screen

  Object with no vertical lines*1

  It is also effective to compose the shot by holding the camera vertically to focus, and then returning to the horizontal position to take the picture.

  When objects are at different distances

  Fast-moving object

  The subject is not in the center of the frame
Camera shake

“Taking pictures without camera shake”
- Taking pictures using [Image Stabilizer] (p. 42)
  The image pickup device*1 shifts to correct for camera shake even if the ISO sensitivity is not increased. This function is also effective when taking pictures at a high zoom magnification.
  *1 A device that takes light received through the lens and converts it into electric signals.
- Shooting movies using [IS Movie Mode] (p. 42)
- Select [Sport] in the scene mode (p. 26)
  The [Sport] mode uses a fast shutter speed and can reduce the blur incurred by a moving subject.
- Taking pictures at a high ISO sensitivity
  If a high ISO sensitivity is selected, pictures can be taken at a high shutter speed even at locations where a flash cannot be used.
  “Selecting the ISO sensitivity” (p. 35)

Exposure (brightness)

“Taking pictures with the right brightness”
- Taking pictures of a subject against a backlight
  Faces or backgrounds are bright even when shot against backlight.
  [Shadow Adjust] (p. 40)
- Taking pictures using [Face/iESP] (p. 41)
  Appropriate exposure is obtained for a face against backlight, and the face is brightened.
- Taking pictures using [ ] for [ESP/] (p. 41)
  Brightness is matched with a subject in the center of the screen and the image is not affected by background light.
- Taking pictures using [Fill In] (p. 21) flash
  A subject against backlight is brightened.
- Taking pictures of a white beach or snow scene
  Set the mode to [Beach & Snow] (p. 26)
- Taking pictures using exposure compensation (p. 34)
  Adjust the brightness while viewing the screen for taking the picture. Normally, taking pictures of white subjects (such as snow) results in images that are darker than the actual subject. Use the exposure compensation to adjust in the positive (+) direction to express whites as they appear. When taking pictures of black subjects, on the other hand, it is effective to adjust in the negative (-) direction.

Color hue

“Taking pictures with colors at the same shade as they appear”
- Taking pictures by selecting white balance (p. 34)
  Best results in most environments can normally be obtained with the [WB Auto] setting, but for some subjects, you should try experimenting with different settings. (This is especially true for sunshade under a clear sky, mixed natural and artificial light settings, and so on.)

Image quality

“Taking sharper pictures”
- Taking pictures with the optical zoom
  Avoid using digital zoom (p. 42) to take pictures.
- Taking pictures at a low ISO sensitivity
  If the picture is taken with a high ISO sensitivity, noise (small colored spots and color unevenness that were not in the original image) can occur, and the image can appear grainy.
  “Selecting the ISO sensitivity” (p. 35)
**Batteries**

“Making batteries last longer”
- Avoid any of the following operations when not actually taking pictures because they deplete the battery power
  - Repeatedly pressing the shutter button halfway.
  - Repeatedly using the zoom.
- Set [Power Save] (p. 55) to [On]

**Playback/Editing tips**

**Playback**

“Playing images in the internal memory and card”
- Remove the card and display the images in internal memory
  - “Inserting the battery and card” (p. 11)

“Viewing images with high picture quality on a high-definition TV”
- Connect the camera to the TV using an HDMI cable (sold separately)
  - “To play back camera images on a TV” (p. 54)

**Editing**

“Erasing the sound recorded to a still image”
- Record over the sound with silence when playing back the image
  - “Adding sound to still images [ IntelliJ]” (p. 46)
Appendix

Camera care

Exterior
- Wipe gently with a soft cloth. If the camera is very dirty, soak the cloth in mild soapy water and wring well. Wipe the camera with the damp cloth and then dry it with a dry cloth. If you have used the camera at the beach, use a cloth soaked in clean water and wrung well.

Monitor
- Wipe gently with a soft cloth.

Lens
- Blow dust off the lens with a commercial blower, then wipe gently with a lens cleaner.

⚠️ Do not use strong solvents such as benzene or alcohol, or chemically treated cloth.

⚠️ Mold may form on the lens surface if the lens is left dirty.

Battery/USB-AC adapter
- Wipe gently with a soft, dry cloth.

Storage
- When storing the camera for extended periods, remove the battery, USB-AC adapter and card, and keep in a cool, dry place that is well ventilated.
- Periodically insert the battery and test the camera functions.

⚠️ Avoid leaving the camera in places where chemical products are handled since this may result in corrosion.

Using a separately sold USB-AC adapter

The USB-AC adapter F-3AC (sold separately) can be used with this camera. Do not use any AC adapter other than the dedicated one. When using F-3AC, be sure to use the USB cable included with this camera. Do not use any other AC adapter with this camera.

Using a separately sold charger

A charger (UC-50: sold separately) can be used to charge the battery.

Using your charger and USB-AC adapter abroad

- The charger and USB-AC adapter can be used in most home electrical sources within the range of 100 V to 240 V AC (50/60Hz) around the world. However, depending on the country or area you are in, the AC wall outlet may be shaped differently and the charger and USB-AC adapter may require a plug adapter to match the wall outlet. For details, ask at your local electrical shop or travel agent.
- Do not use travel voltage converters as they could damage your charger and USB-AC adapter.
**Using the card**

**Cards compatible with this camera**
SD/SDHC/SDXC/Eye-Fi card (commercially available) (for compatibility card details, visit the Olympus website.)

![SD/SDHC/SDXC card](image)

- The Eye-Fi card may become hot during use.
- When using an Eye-Fi card, the battery may run out faster.
- When using an Eye-Fi card, the camera may function more slowly.

**SD/SDHC/SDXC card write-protect switch**
The SD/SDHC/SDXC card body has a write-protect switch.

If you set the switch to the “LOCK” side, you will not be able to write to the card, delete data or format. Return the switch to enable writing.

**Checking the image saving location**
The memory indicator shows whether the internal memory or card is being used during shooting and playback.

**Current memory indicator**
- **IN**: Internal memory is being used
- **SD**: Card is being used

![Current memory indicator](image)

- Even if [Memory Format]/[Format], [Erase], [Sel. Image], or [All Erase] is performed, the data in the card is not completely erased. When disposing of the card, damage the card to prevent the disclosure of personal data.

**Readout/recording process of the card**
During shooting, the current memory indicator lights up in red while the camera is writing data. Never open the battery/card compartment cover or unplug the USB cable. This can not only damage the image data but also render the internal memory or card unusable.
Number of storable pictures (still images)/Continuous recording length (movies) in the internal memory and cards

⚠️ The figures in the following tables are quoted only as a rough guideline. The actual number of storable pictures or continuous recording lengths will differ according to the shooting conditions and memory cards used.

⚠️ The figures in the table below are the number of the storable pictures when using the internal memory formatted. [Memory Format]/[Format] (p. 50)

**Concerning GPS**

**Place Names for Locations Outside Japan**

**Terms and Conditions**

**Personal Use Only**

You agree to use this Data together with this digital camera for the solely personal, non-commercial purposes for which you were licensed, and not for service bureau, time-sharing or other similar purposes. Accordingly, but subject to the restrictions set forth in the following paragraphs, you may copy this Data only as necessary for your personal use to (i) view it, and (ii) save it, provided that you do not remove any copyright notices that appear and do not modify the Data in any way. You agree not to otherwise reproduce, copy, modify, decompile, disassemble or reverse engineer any portion of this Data, and may not transfer or distribute it in any form, for any purpose, except to the extent permitted by mandatory laws. Multi-disc sets may only be transferred or sold as a complete set as provided by OLYMPUS IMAGING CORPORATION and not as a subset thereof.

**Restrictions**

Except where you have been specifically licensed to do so by OLYMPUS IMAGING CORPORATION, and without limiting the preceding paragraph, you may not use this Data (a) with any products, systems, or applications installed or otherwise connected to or in communication with vehicles, capable of vehicle navigation, positioning, dispatch, real time route guidance, fleet management or similar applications; or (b) with or in communication with any positioning devices or any mobile or wireless-connected electronic or computer devices, including without limitation cellular phones, palmtop and handheld computers, pagers, and personal digital assistants or PDAs.

**Warning**

The Data may contain inaccurate or incomplete information due to the passage of time, changing circumstances, sources used and the nature of collecting comprehensive geographic data, any of which may lead to incorrect results.

**No Warranty**

This Data is provided to you “as is,” and you agree to use it at your own risk. </table>

*1 The continuous recording length is up to 29 minutes in the HD quality specified.

⚠️ The maximum file size of a single movie is 4 GB, regardless of the capacity of the card.

---

**Increasing the number of pictures that can be taken**

Either erase unwanted images, or connect the camera to a computer or other device to save the images, and then erase the images in the internal memory or card. [Erase] (p. 23, 49), [Sel. Image], [Erase Group], [All Erase] (p. 49), [Memory Format]/[Format] (p. 50)
Some States, Territories and Countries do not allow certain warranty exclusions, so to that extent the above exclusion may not apply to you.

**Disclaimer of Liability:**
OLYMPUS IMAGING CORPORATION AND ITS LICENSORS (INCLUDING THEIR LICENSORS AND SUPPLIERS) SHALL NOT BE LIABLE TO YOU: IN RESPECT OF ANY CLAIM, DEMAND OR ACTION, IRRESPECTIVE OF THE NATURE OF THE CAUSE OF THE CLAIM, DEMAND OR ACTION ALLEGING ANY LOSS, INJURY OR DAMAGES, DIRECT OR INDIRECT, WHICH MAY RESULT FROM THE USE OR POSSESSION OF THE INFORMATION; OR FOR ANY LOSS OF PROFIT, REVENUE, CONTRACTS OR SAVINGS, OR ANY OTHER DIRECT, INDIRECT, INCIDENTAL, SPECIAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF YOUR USE OF OR INABILITY TO USE THIS INFORMATION, ANY DEFECT IN THE INFORMATION, OR THE BREACH OF THESE TERMS OR CONDITIONS, WHETHER IN AN ACTION IN CONTRACT OR TORT OR BASED ON A WARRANTY, EVEN IF OLYMPUS IMAGING CORPORATION OR ITS LICENSORS HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. Some States, Territories and Countries do not allow certain liability exclusions or damages limitations, so to that extent the above may not apply to you.

**Export Control**
You agree not to export from anywhere any part of the Data provided to you or any direct product thereof except in compliance with, and with all licenses and approvals required under, applicable export laws, rules and regulations.

**Entire Agreement**
These terms and conditions constitute the entire agreement between OLYMPUS IMAGING CORPORATION (and its licensors, including their licensors and suppliers) and you pertaining to the subject matter hereof, and supersedes in their entirety any and all written or oral agreements previously existing between us with respect to such subject matter.

**Governing Law**
The above terms and conditions shall be governed by the laws of the State of Illinois, without giving effect to (i) its conflict of laws provisions, or (ii) the United Nations Convention for Contracts for the International Sale of Goods, which is explicitly excluded. You agree to submit to the jurisdiction of the State of Illinois for any and all disputes, claims and actions arising from or in connection with the Data provided to you hereunder.

**United States Government End Users**
If the Data is being acquired by or on behalf of the United States government or any other entity seeking or applying rights similar to those customarily claimed by the United States government, the Data is a “commercial item” as that term is defined at 48 C.F.R. (“FAR”) 2.101, is licensed in accordance with the End-User Terms under which this Data was provided, and each copy of the Data delivered or otherwise furnished shall be marked and embedded as appropriate with the following “Notice of Use,” and shall be treated in accordance with such Notice:

**NOTICE OF USE**
CONTRACTOR (MANUFACTURER/ SUPPLIER) NAME: NAVTEQ
CONTRACTOR (MANUFACTURER/SUPPLIER) ADDRESS: 425 West Randolph Street, Chicago, Illinois 60606
This Data is a commercial item as defined in FAR 2.101 and is subject to the End-User Terms under which this Data was provided. © 1993-2011 NAVTEQ. All rights reserved.
If the Contracting Officer, federal government agency, or any federal official refuses to use the legend provided herein, the Contracting Officer, federal government agency, or any federal official must notify NAVTEQ prior to seeking additional or alternative rights in the Data.

**Place Names for Locations in Japan**
- The extraction by any means of all or part of these data (whether pertaining to landmarks, countries, regions, states, provinces, territories, prefectures, municipalities, or other territorial divisions) from image data files in which they are included is forbidden.
- Neither you nor any third party shall, by any means, reproduce, copy, modify, disassemble, decompile, reverse engineer, or in any other way attempt to analyze or determine the nature of the data incorporated in this camera.

### SAFETY PRECAUTIONS

#### CAUTION

**RISK OF ELECTRIC SHOCK**

DO NOT OPEN

CAUTION: TO REDUCE THE RISK OF ELECTRICAL SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED OLYMPUS SERVICE PERSONNEL.

- **DANGER**

  If the product is used without observing the information given under this symbol, serious injury or death may result.

- **WARNING**

  If the product is used without observing the information given under this symbol, injury or death may result.

- **CAUTION**

  If the product is used without observing the information given under this symbol, minor personal injury, damage to the equipment, or loss of valuable data may result.

#### WARNING!

TO AVOID THE RISK OF FIRE OR ELECTRICAL SHOCK, NEVER DISASSEMBLE, EXPOSE THIS PRODUCT TO WATER OR OPERATE IN A HIGH HUMIDITY ENVIRONMENT.

### General Precautions

**Read All Instructions** — Before you use the product, read all operating instructions. Save all manuals and documentation for future reference.

**Cleaning** — Always unplug this product from the wall outlet before cleaning. Use only a damp cloth for cleaning. Never use any type of liquid or aerosol cleaner, or any type of organic solvent to clean this product.

**Attachments** — For your safety, and to avoid damaging the product, use only accessories recommended by Olympus.

**Water and Moisture** — For precautions on products with weatherproof designs, read the weatherproofing sections.
Location — To avoid damage to the product, mount the product securely on a stable tripod, stand, or bracket.

Power Source — Connect this product only to the power source described on the product label.

Lightning — If a lightning storm occurs while using a USB-AC adapter, remove it from the wall outlet immediately.

Foreign Objects — To avoid personal injury, never insert a metal object into the product.

Heat — Never use or store this product near any heat source such as a radiator, heat register, stove, or any type of equipment or appliance that generates heat, including stereo amplifiers.

Handling the Camera

⚠️ WARNING
- Do not use the camera near flammable or explosive gases.
- Do not use the flash and LED (including AF illuminator) on people (infants, small children, etc.) at close range.
  - You must be at least 1 m (3 ft.) away from the faces of your subjects. Firing the flash too close to the subject’s eyes could cause a momentary loss of vision.
- Keep young children and infants away from the camera.
  - Always use and store the camera out of the reach of young children and infants to prevent the following dangerous situations which could cause serious injury:
    - Becoming entangled in the camera strap, causing strangulation.
    - Accidentally swallowing the battery, cards or other small parts.
    - Accidentally firing the flash into their own eyes or those of another child.
    - Accidentally being injured by the moving parts of the camera.
- Do not look at the sun or strong lights with the camera.
- Do not use or store the camera in dusty or humid places.
- Do not cover the flash with a hand while firing.
- Use SD/SDHC/SDXC memory cards or Eye-Fi cards only. Never use other types of cards.
  - If you accidently insert another type of card into the camera, contact an authorized distributor or service center. Do not try to remove the card by force.
- If you find that the USB-AC adapter is extremely hot or notice any unusual odors, noise, or smoke around it, unplug the power plug from wall outlet immediately and stop using it. Then, contact an authorized distributor or service center.

⚠️ CAUTION
- Stop using the camera immediately if you notice any unusual odors, noise, or smoke around it.
- Never remove the batteries with bare hands, which may cause a fire or burn your hands.
- Never hold or operate the camera with wet hands.
- Do not leave the camera in places where it may be subject to extremely high temperatures.
  - Doing so may cause parts to deteriorate and, in some circumstances, cause the camera to catch fire. Do not use the charger or USB-AC adapter if it is covered (such as a blanket). This could cause overheating, resulting in fire.
- Handle the camera with care to avoid getting a low-temperature burn.
  - When the camera contains metal parts, overheating can result in a low-temperature burn. Pay attention to the following:
    - When used for a long period, the camera will get hot. If you hold on to the camera in this state, a low-temperature burn may be caused.
    - In places subject to extremely cold temperatures, the temperature of the camera’s body may be lower than the environmental temperature. If possible, wear gloves when handling the camera in cold temperatures.
- Be careful with the strap.
  - Be careful with the strap when you carry the camera. It could easily catch on stray objects and cause serious damage.
  - To protect the high-precision technology contained in this product, never leave the camera in the places listed below, no matter if in use or storage:
    - Places where temperatures and/or humidity are high or go through extreme changes. Direct sunlight, beaches, locked cars, or near other heat sources (stove, radiator, etc.) or humidifiers.
    - In sandy or dusty environments.
    - Near flammable items or explosives.
    - In wet places, such as bathrooms or in the rain. When using products with weatherproof designs, read their manuals as well.
    - In places prone to strong vibrations.
    - Never drop the camera or subject it to severe shocks or vibrations.
    - When attaching the camera to or removing it from a tripod, rotate the tripod screw, not the camera.
    - Before transporting the camera, remove a tripod and all other non-OLYMPUS accessories.
    - Do not touch electric contacts on cameras.
• Do not leave the camera pointed directly at the sun. This may cause lens or shutter curtain damage, color failure, ghosting on the image pickup device, or may possibly cause fires.
• Do not push or pull severely on the lens.
• Before storing the camera for a long period, remove the batteries. Select a cool, dry location for storage to prevent condensation or mold from forming inside the camera. After storage, test the camera by turning it on and pressing the shutter button to make sure that it is operating normally.
• The camera may malfunction if it is used in a location where it is subject to a magnetic/electromagnetic field, radio waves, or high voltage, such as near a TV set, microwave, video game, loud speakers, large monitor unit, TV/radio tower, or transmission towers. In such cases, turn the camera off and on again before further operation.
• Always observe the operating environment restrictions described in the camera’s manual.

### Battery Handling Precautions

Follow these important guidelines to prevent batteries from leaking, overheating, burning, exploding, or causing electrical shocks or burns.

⚠️ **DANGER**

- The camera uses a lithium ion battery specified by Olympus. Charge the battery with the specified USB-AC adapter or charger. Do not use any other USB-AC adapters or chargers.
- Never heat or incinerate batteries.
- Take precautions when carrying or storing batteries to prevent them from coming into contact with any metal objects such as jewelry, pins, fasteners, etc.
- Never store batteries where they will be exposed to direct sunlight, or subjected to high temperatures in a hot vehicle, near a heat source, etc.
- To prevent causing battery leaks or damaging their terminals, carefully follow all instructions regarding the use of batteries. Never attempt to disassemble a battery or modify it in any way, solder, etc.
- If battery fluid gets into your eyes, flush your eyes immediately with clear, cold running water and seek medical attention immediately.
- Always store batteries out of the reach of small children. If a child accidentally swallows a battery, seek medical attention immediately.

⚠️ **CAUTION**

- Before loading, always inspect the battery carefully for leaks, discoloration, warping, or any other abnormality.
- The battery may become hot during prolonged use. To avoid minor burns, do not remove it immediately after using the camera.
- Always unload the battery from the camera before storing the camera for a long period.
- This camera uses one Olympus lithium ion battery (LI-50B). No other type of batteries can be used.
- There is a risk of explosion if the battery is replaced with the incorrect battery type.
- Power consumption by the camera varies depending on which functions are used.
- During the conditions described below, power is consumed continuously and the battery becomes exhausted quickly.
  - The zoom is used repeatedly.
  - The shutter button is pressed halfway repeatedly in shooting mode, activating the auto focus.
  - A picture is displayed on the monitor for an extended period of time.
  - The camera is connected to a printer.

If you cannot remove the battery from the camera, contact an authorized distributor or service center. Do not try to remove the battery by force. Damage to the battery exterior (scratches, etc.) may produce heat or an explosion.

⚠️ **WARNING**

- Keep batteries dry at all times.
- To prevent batteries from leaking, overheating, or causing a fire or explosion, use only batteries recommended for use with this product.
- Insert the battery carefully as described in the operating instructions.
- If rechargeable batteries have not been recharged within the specified time, stop charging them and do not use them.
- Do not use a battery if it is cracked or broken.
- If a battery leaks, becomes discolored or deformed, or becomes abnormal in any other way during operation, stop using the camera.
- If a battery leaks fluid onto your clothing or skin, remove the clothing and flush the affected area with clean, running cold water immediately. If the fluid burns your skin, seek medical attention immediately.
- Never subject batteries to strong shocks or continuous vibration.
• Using an exhausted battery may cause the camera to turn off without displaying the battery level warning.
• This camera uses a lithium ion battery specified by Olympus. Do not use any other type of battery.
• If the battery’s terminals get wet or greasy, camera contact failure may result. Wipe the battery well with a dry cloth before use.
• Always charge a battery when using it for the first time, or if it has not been used for a long period.
• When operating the camera with battery power at low temperatures, try to keep the camera and spare battery as warm as possible. A battery that has run down at low temperatures may be restored after it is warmed at room temperature.
• Before going on a long trip, and especially before traveling abroad, purchase extra batteries. A recommended battery may be difficult to obtain while traveling.
• When storing the battery for a long period, select a cool location for storage.
• Please recycle batteries to help save our planet’s resources. When you throw away dead batteries, be sure to cover their terminals and always observe local laws and regulations.

USB-AC adapter
• The included USB-AC adapter F-2AC is designed to be used only with this camera. Other cameras cannot be charged with this USB-AC adapter.
• Do not connect the included USB-AC adapter F-2AC to equipment other than this camera.
• For plug-in type USB-AC adapter: The included USB-AC adapter F-2AC is intended to be correctly orientated in a vertical or floor mount position.

Use Only Dedicated Rechargeable Battery, Battery Charger and USB-AC adapter
We strongly recommend that you use only the genuine Olympus dedicated rechargeable battery, battery charger and USB-AC adapter with this camera. Using a non-genuine rechargeable battery, battery charger and/or USB-AC adapter may result in fire or personal injury due to leakage, heating, ignition or damage to the battery. Olympus does not assume any liability for accidents or damage that may result from the use of a battery, battery charger and/or USB-AC adapter that are not genuine Olympus accessories.

Monitor
• Do not push the monitor forcibly; otherwise the image may become vague, resulting in a playback mode failure or damage to the monitor.
• A strip of light may appear on the top/bottom of the monitor, but this is not a malfunction.
• When a subject is viewed diagonally in the camera, the edges may appear zigzagged on the monitor. This is not a malfunction; it will be less noticeable in playback mode.
• In places subject to low temperatures, the monitor may take a long time to turn on or its color may change temporarily. When using the camera in extremely cold places, it is a good idea to occasionally place it in a warm place. The monitor exhibiting poor performance due to low temperatures will recover in normal temperatures.
• The monitor of this product is manufactured with high-quality accuracy, however, there may be a stuck or dead pixel on the monitor. These pixels do not have any influence on the image to be saved. Because of the characteristics, the unevenness of the color or brightness may also be found depending on the angle, but this is due to the structure of the monitor. This is not a malfunction.

Legal and Other Notices
• Olympus makes no representations or warranties regarding any damages, or benefit expected by using this unit lawfully, or any request from a third person, which are caused by the inappropriate use of this product.
• Olympus makes no representations or warranties regarding any damages or any benefit expected by using this unit lawfully which are caused by erasing picture data.

Disclaimer of Warranty
• Olympus makes no representations or warranties, either expressed or implied, by or concerning any content of these written materials or software, and in no event shall be liable for any implied warranty of merchantability or fitness for any particular purpose or for any consequential, incidental or indirect damages (including but not limited to damages for loss of business profits, business interruption and loss of business information) arising from the use or inability to use these written materials or software or equipment. Some countries do not allow the exclusion or limitation of liability for consequential or incidental damages or of the implied warranty, so the above limitations may not apply to you.
• Olympus reserves all rights to this manual.
**Warning**

Unauthorized photographing or use of copyrighted material may violate applicable copyright laws. Olympus assumes no responsibility for unauthorized photographing, use or other acts that infringe upon the rights of copyright owners.

**Copyright Notice**

All rights reserved. No part of these written materials or this software may be reproduced or used in any form or by any means, electronic or mechanical, including photocopying and recording or the use of any type of information storage and retrieval system, without the prior written permission of Olympus. Olympus reserves the right to alter the features and contents of this publication or software without obligation or advance notice.

**FCC Notice**

- Radio and Television Interference
- Changes or modifications not expressly approved by the manufacturer may void the user’s authority to operate this equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.
- This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.
- However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
  - Adjust or relocate the receiving antenna.
  - Increase the distance between the camera and receiver.
  - Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
  - Consult your dealer or an experienced radio/TV technician for help. Only the OLYMPUS-supplied USB cable should be used to connect the camera to USB enabled personal computers (PC).

Any unauthorized changes or modifications to this equipment would void the user’s authority to operate it.

**For customers in North and South America**

**For customers in USA**

Declaration of Conformity
Model Number: SH-25MR
Trade Name: OLYMPUS
Responsible Party:

OLYMPUS IMAGING AMERICA INC.
Address: 3500 Corporate Parkway, P.O. Box 610, Center Valley, PA 18034-0610, U.S.A.
Telephone Number: 484-896-5000
Tested To Comply With FCC Standards
FOR HOME OR OFFICE USE

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference.
(2) This device must accept any interference received, including interference that may cause undesired operation.

**For customers in CANADA**

This Class B digital apparatus complies with Canadian ICES-003. Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

This Category II radiocommunication device complies with Industry Canada Standard RSS-310.

**OLYMPUS WORLDWIDE LIMITED WARRANTY - IMAGING PRODUCTS**

Olympus warrants that the enclosed Olympus® imaging product(s) and related Olympus® accessories (individually a “Product” and collectively the “Products”) will be free from defects in materials and workmanship under normal use and service for a period of one (1) year from the date of purchase. If any Product proves to be defective within the one-year warranty period, the customer must return the defective Product to any of Olympus Service Centers, following the procedure set forth below (See “WHAT TO DO WHEN SERVICE IS NEEDED”).

Olympus, at its sole discretion, will repair, replace, or adjust the defective Product, provided that Olympus investigation and factory inspection disclose that (a) such defect developed under normal and proper use and (b) the Product is covered under this limited warranty.
Repair, replacement, or adjustment of defective Products shall be Olympus’s sole obligation and the customer’s sole remedy hereunder.

The customer is liable and shall pay for shipment of the Products to the Olympus Service Center. Olympus shall not be obligated to perform preventive maintenance, installation, deinstallation, or maintenance. Olympus reserves the right to (i) use reconditioned, refurbished, and/or serviceable used parts (that meet Olympus’s quality assurance standards) for warranty or any other repairs and (ii) make any internal or external design and/or feature changes on or to its products without any liability to incorporate such changes on or to the Products.

WHAT IS NOT COVERED BY THIS LIMITED WARRANTY

Excluded from this limited warranty and not warranted by Olympus in any fashion, either express, implied, or by statute, are:

(a) products and accessories not manufactured by Olympus and/or not bearing the “OLYMPUS” brand label (the warranty coverage for products and accessories of other manufacturers, which may be distributed by Olympus, is the responsibility of the manufacturers of such products and accessories in accordance with the terms and duration of such manufacturers’ warranties);

(b) any Product which has been disassembled, repaired, tampered with, altered, changed, or modified by persons other than Olympus’s own authorized service personnel unless repair by others is made with the written consent of Olympus;

(c) defects or damage to the Products resulting from wear, tear, misuse, abuse, negligence, sand, liquids, impact, improper storage, nonperformance of scheduled operator and maintenance items, battery leakage, use of non-“OLYMPUS” brand accessories, consumables, or supplies, or use of the Products in combination with non-compatible devices;

(d) software programs;

(e) supplies and consumables (including but not limited to lamps, ink, paper, film, prints, negatives, cables and batteries); and/or

(f) Products which do not contain a validly placed and recorded Olympus serial number, unless they are a model on which Olympus does not place and record serial numbers.

EXCEPT FOR THE LIMITED WARRANTY SET FORTH ABOVE, OLYMPUS MAKES NO AND DISCLAIMS ALL OTHER REPRESENTATIONS, GUARANTIES, CONDITIONS, AND WARRANTIES CONCERNING THE PRODUCTS, WHETHER DIRECT OR INDIRECT, EXPRESS OR IMPLIED, OR ARISING UNDER ANY STATUTE, ORDINANCE, COMMERCIAL USAGE OR OTHERWISE, INCLUDING BUT NOT LIMITED TO ANY WARRANTY OR REPRESENTATION AS TO THE SUITABILITY, DURABILITY, DESIGN, OPERATION, OR CONDITION OF THE PRODUCTS (OR ANY PART THEREOF) OR THE MERCHANTABILITY OF THE PRODUCTS OR THEIR FITNESS FOR A PARTICULAR PURPOSE, OR RELATING TO THE INFRINGEMENT OF ANY PATENT, COPYRIGHT, OR OTHER PROPRIETARY RIGHT USED OR INCLUDED THEREIN. IF ANY IMPLIED WARRANTIES APPLY AS A MATTER OF LAW, THEY ARE LIMITED IN DURATION TO THE LENGTH OF THIS LIMITED WARRANTY.

SOME STATES MAY NOT RECOGNIZE A DISCLAIMER OR LIMITATION OF WARRANTIES AND/OR LIMITATION OF LIABILITY SO THE ABOVE DISCLAIMERS AND EXCLUSIONS MAY NOT APPLY.

THE CUSTOMER MAY ALSO HAVE DIFFERENT AND/OR ADDITIONAL RIGHTS AND REMEDIES THAT VARY FROM STATE TO STATE.

THE CUSTOMER ACKNOWLEDGES AND AGREES THAT OLYMPUS SHALL NOT BE RESPONSIBLE FOR ANY DAMAGES THAT THE CUSTOMER MAY INCUR FROM DELAYED SHIPMENT, PRODUCT FAILURE, PRODUCT DESIGN, SELECTION, OR PRODUCTION, IMAGE OR DATA LOSS OR IMPAIRMENT OR FROM ANY OTHER CAUSE, WHETHER LIABILITY IS ASSERTED IN CONTRACT, TORT (INCLUDING NEGLIGENCE AND STRICT PRODUCT LIABILITY) OR OTHERWISE. IN NO EVENT SHALL OLYMPUS BE LIABLE FOR ANY INDIRECT, INCIDENTAL, CONSEQUENTIAL OR SPECIAL DAMAGES OF ANY KIND (INCLUDING WITHOUT LIMITATION LOSS OF PROFITS OR LOSS OF USE), WHETHER OR NOT OLYMPUS SHALL BE OR SHOULD BE AWARE OF THE POSSIBILITY OF SUCH POTENTIAL LOSS OR DAMAGE.

Representations and warranties made by any person, including but not limited to dealers, representatives, salespersons, or agents of Olympus, which are inconsistent or in conflict with or in addition to the terms of this limited warranty, shall not be binding upon Olympus unless reduced to writing and approved by an expressly authorized officer of Olympus.
This limited warranty is the complete and exclusive statement of warranty which Olympus agrees to provide with respect to the Products and it shall supersede all prior and contemporaneous oral or written agreements, understandings, proposals, and communications pertaining to the subject matter hereof. This limited warranty is exclusively for the benefit of the original customer and cannot be transferred or assigned.

WHAT TO DO WHEN SERVICE IS NEEDED
The customer must transfer any image or other data saved on a Product to another image or data storage medium and/or remove any film from the Product prior to sending the Product to Olympus for service.

IN NO EVENT SHALL OLYMPUS BE RESPONSIBLE FOR SAVING, KEEPING OR MAINTAINING ANY IMAGE OR DATA SAVED ON A PRODUCT RECEIVED BY IT FOR SERVICE, OR ON ANY FILM CONTAINED WITHIN A PRODUCT RECEIVED BY IT FOR SERVICE, NOR SHALL OLYMPUS BE RESPONSIBLE FOR ANY DAMAGES IN THE EVENT ANY IMAGE OR DATA IS LOST OR IMPAIRED WHILE SERVICE IS BEING PERFORMED (INCLUDING, WITHOUT LIMITATION, DIRECT, INDIRECT, INCIDENTAL, CONSEQUENTIAL OR SPECIAL DAMAGES, LOSS OF PROFITS OR LOSS OF USE), WHETHER OR NOT OLYMPUS SHALL BE OR SHOULD BE AWARE OF THE POSSIBILITY OF SUCH POTENTIAL LOSS OR IMPAIRMENT.

Package the Product carefully using ample padding material to prevent damage in transit and either deliver it to the Authorized Olympus Dealer that sold you the Product or ship it postage prepaid and insured to any of our Olympus Service Centers. When returning Products for service, your package should include the following:

1. Sales receipt showing date and place of purchase.
2. Copy of this limited warranty bearing the Product serial number corresponding to the serial number on the Product (unless it is a model on which Olympus does not place and record serial numbers).
3. A detailed description of the problem.
4. Sample prints, negatives, digital prints (or files on disk) if available and related to the problem.

When service is completed, the Product will be returned to you postage prepaid.

WHERE TO SEND PRODUCT FOR SERVICE
See “WORLDWIDE WARRANTY” for the nearest service center.

INTERNATIONAL WARRANTY SERVICE
International warranty service is available under this warranty.

For customers in Europe

“CE” mark indicates that this product complies with the European requirements for safety, health, environment and customer protection. “CE” mark cameras are intended for sales in Europe.

For customers in the EU: Hereby, Olympus Imaging Corp. and Olympus Europa Holding GmbH declare that this SH-25MR is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.

For details visit: http://olympus-europa.com/

This symbol [crossed-out wheeled bin WEEE Annex IV] indicates separate collection of waste electrical and electronic equipment in the EU countries.

Please do not throw the equipment into the domestic refuse.

Please use the return and collection systems available in your country for the disposal of this product.

This symbol [crossed-out wheeled bin Directive 2006/66/EC Annex II] indicates separate collection of waste batteries in the EU countries.

Please do not throw the batteries into the domestic refuse. Please use the return and collection systems available in your country for the disposal of the waste batteries.

Provisions of warranty

1. If this product proves to be defective, although it has been used properly (in accordance with the written Handling Care and Operating instructions supplied with it), during the applicable national warranty period and has been purchased from an authorized Olympus distributor within the business area of Olympus Europa Holding GmbH as stipulated on the website: http://www.olympus.com this product will be repaired, or at Olympus's option replaced, free of charge. To claim under this warranty the customer must take the product before the end of the applicable national warranty period to the dealer where the product was purchased or any other Olympus service station within the business area of Olympus Europa Holding GmbH as stipulated on the website: http://www.olympus.com. During the one year period of the World
Wide Guarantee the customer may turn the product in at any Olympus service station. Please notice that not in all countries such Olympus service station exists.

2 The customer shall transport the product to the dealer or Olympus authorized service station at his own risk and shall be responsible for any costs incurred in transporting the product.

**Provisions of Guarantee**

1 "OLYMPUS IMAGING CORP., Shinjuku Monolith, 2-3-1 Nishi-Shinjuku, Shinjuku-ku, Tokyo 163-0914, Japan grants a one year World Wide Guarantee. This worldwide Guarantee must be presented at an Olympus authorized repair service station before any repair can be made under conditions of this Guarantee. This Guarantee is valid only if the Guarantee Certificate and proof of purchase are presented at the Olympus repair service station. Please note that this Guarantee is in addition to and does not affect the customer’s legal warranty rights under the applicable national legislation governing the sale of consumer goods mentioned above.

2 This Guarantee does not cover the following and the customer will be required to pay repair charge, even for defects occurring within the Guarantee period referred to above.

a. Any defect that occurs due to mishandling (such as an operation performed that is not mentioned in the Handling Care or other sections of the instructions, etc.)

b. Any defect that occurs due to repair, modification, cleaning, etc. performed by anyone other than Olympus or an Olympus authorized service station.

c. Any defect or damage that occurs due to transport, a fall, shock, etc. after purchase of the product.

d. Any defect or damage that occurs due to fire, earthquake, flood damage, thunderbolt, other natural disasters, environmental pollution and irregular voltage sources.

e. Any defect that occurs due to careless or improper storage (such as keeping the product under conditions of high temperature and humidity, near insect repellents such as naphthalene or harmful drugs, etc.), improper maintenance, etc.

f. Any defect that occurs due to exhausted batteries, etc.

g. Any defect that occurs due to sand, mud, etc. entering the inside of the product casing.

h. When the Guarantee Certificate is not returned with the product.

i. When any alterations whatsoever are made to the Guarantee Certificate regarding the year, month and date of purchase, the customer’s name, the dealer’s name, and the serial number.

j. When proof of purchase is not presented with this Guarantee Certificate.

3 This Guarantee applies to the product only; the Guarantee does not apply to any other accessory equipment, such as the case, strap, lens cap and batteries.

4 Olympus’s sole liability under this Guarantee shall be limited to repairing or replacing the product. Any liability under the Guarantee for indirect or consequential loss or damage of any kind incurred or suffered by the customer due to a defect of the product, and in particular any loss or damage caused to any lenses, films, other equipment or accessories used with the product or for any loss resulting from a delay in repair or loss of data, is excluded. Compelling regulations by law remain unaffected by this.

**Notes regarding Guarantee maintenance**

1 This Guarantee will only be valid if the Guarantee Certificate is duly completed by Olympus or an authorized dealer or other documents contain sufficient proof. Therefore, please make sure that your name, the name of the dealer, the serial number and the year, month and date of purchase are all completed or the original invoice or the sales receipt (indicating the dealer’s name, the date of purchase and product type) is attached to this Guarantee Certificate. Olympus reserves the right to refuse free-of-charge service if neither Guarantee Certificate is completed nor the above document is attached or if the information contained in it is incomplete or illegible.

2 Since this Guarantee Certificate will not be re-issued, keep it in a safe place.

* Please refer to the list on the web site: http://www.olympus.com for the authorized international Olympus service network.

### For customers in Asia

**Provisions of warranty**

1 If this product proves to be defective, although it has been used properly (in accordance with the written Handling Care and Operating instructions supplied with it), during a period of up to one year from the date of purchase this product will be repaired, or at Olympus’s option replaced, free of charge. To claim under warranty the customer must take the product and this Warranty certificate before the end of the one year warranty period to the dealer where the product was purchased or any Olympus authorized service station listed in the instructions and request the necessary repairs.
The customer shall transport the product to the dealer or Olympus authorized service station at his own risk and shall be responsible for any costs incurred in transporting the product.

This warranty does not cover the following and the customer will be required to pay repair charge, even for defects occurring within the one year period referred to above.

a. Any defect that occurs due to mishandling (such as an operation performed that is not mentioned in the Handling Care or other sections of the instructions, etc.)
b. Any defect that occurs due to repair, modification, cleaning, etc. performed by anyone other than Olympus or an Olympus authorized service station.
c. Any defect or damage that occurs due to transport, a fall, shock, etc. after purchase of the product.
d. Any defect or damage that occurs due to fire, earthquake, flood damage, thunderbolt, other natural disasters, environmental pollution and irregular voltage sources.
e. Any defect that occurs due to careless or improper storage (such as keeping the product under conditions of high temperature and humidity, near insect repellents such as naphthalene or harmful drugs, etc.), improper maintenance, etc.
f. Any defect that occurs due to exhausted batteries, etc.
g. Any defect that occurs due to sand, mud, etc. entering the inside of the product casing.
h. When this Warranty Certificate is not returned with the product.
i. When any alterations whatsoever are made to the Warranty Certificate regarding the year, month and date of purchase, the customer’s name, the dealer’s name, and the serial number.
j. When proof of purchase is not presented with this Warranty Certificate.

This Warranty applies to the product only; the Warranty does not apply to any other accessory equipment, such as the case, strap, lens cap and batteries.

Olympus’ sole liability under this warranty shall be limited to repairing or replacing the product and any liability for indirect or consequential loss or damage of any kind incurred or suffered by the customer due to a defect in the product, and in particular any loss or damage caused to any film or lenses or other equipment or accessories used with the product or for any loss resulting from delay in repair, is excluded.

Notes:

1. This Warranty is in addition to and does not affect the customer’s statutory right.

2. If you have any queries regarding this Warranty, call any of the Olympus authorized service stations listed in the instructions.

Notes regarding warranty maintenance

1. This Warranty will only be valid if the Warranty Certificate is duly completed by Olympus or the dealer. Make sure that your name, the name of the dealer, the serial number and the year, month and date of purchase are all completed.

2. Since this Warranty Certificate will not be re-issued, keep it in a safe place.

3. Any request for repair by a customer in same country where the product was purchased shall be subject to the terms of the warranty issued by the Olympus distributor in that country. Where the local Olympus distributor does not issue a separate warranty or where the customer is not in the country where the product was purchased the terms of this worldwide warranty shall apply.

4. Where applicable, this Warranty is valid worldwide. The Olympus authorized service stations listed in this Warranty will gladly honor it.

* Please refer to the appended list for the authorized international Olympus service network.

Disclaimer of Warranty

Olympus makes no representations or warranties, either expressed or implied, by or concerning any content if these written materials or software, and in no event shall be liable for any implied warranty of merchantability or fitness for any particular purpose or for any consequential, incidental or indirect damages (including but not limited to damages for loss of business profits, business interruption and loss of business information) arising from the use of inability to use these written materials or software. Some states do not allow the exclusion or limitation of liability for consequential or incidental damages, so the above limitations may not apply to you.

For customer in Thailand

This telecommunication equipment conforms to NTC technical requirement.
