Joystick

Press the joystick up/down/left/right to operate it.

△ ▽ ◀▶ instruct to press the joystick up/down/left/right.

---

Attaching the camera strap

Pull the strap tight so that it does not come loose.
**Inserting and removing the battery and card**

1. **Follow Steps ①, ② and ③ to open the battery/card cover.**

   - ① Lock knob
   - ② Battery/card cover latch
   - ③ Battery/card cover

   ![Battery/Card Cover](image)

   - Turn off the camera before opening the battery/card cover.

2. **Insert the battery while sliding the battery lock knob in the direction of the arrow.**

   ![Battery Lock Knob](image)

   - Insert the battery as illustrated with the + mark toward the battery lock knob. Damage to the battery exterior (scratches, etc.) may produce heat or an explosion.

   - Slide the battery lock knob in the direction of the arrow to unlock, and then remove the battery.

3. **Insert the card straight until it clicks into place.**

   ![Write-Protect Switch](image)

   - Always use SD/SDHC/SDXC cards or Eye-Fi card with this camera. Do not insert other types of memory cards. “Using the card” (p. 58)

   - Do not touch the metallic parts of the card directly.

4. **Follow Steps ① and ② to close the battery/card cover.**

   ![Battery Lock Knob](image)

   - When using the camera, be sure to close and lock the battery/card cover.

   ![Battery/Card Cover](image)

   - Press the card in until it clicks and comes out slightly, then remove the card.
**Charging the battery**

Connect the USB cable and USB-AC adapter to the camera and charge the battery.

⚠️ The battery is not fully charged at shipment. Before use, be sure to charge the battery until the indicator lamp turns off (up to 3 hours).

**Connecting the camera**

- AC outlet
- USB cable (supplied)
- Multi-connector
- Connector cover

When using the camera, be sure to close and lock the connector cover.

⚠️ The included F-2AC USB-AC adapter (hereafter referred to as USB-AC adapter) differs depending on the region where you purchased the camera. If you received a plug-in type USB-AC adapter, plug it directly into AC outlet.

**Indicator lamp**

- On: Charging
- Off: Charged

**When to charge the batteries**

Charge the battery when the error message shown below appears.

- Error message
  - Flashes in red
  - Battery Empty

⚠️
The included USB-AC adapter has been designed to be used for charging and playback. Do not take pictures while the USB-AC adapter is connected to the camera.

Be sure to unplug the power plug of the USB-AC adapter from the wall outlet when the charging is complete or the playback ends.

For details on the battery, see “Battery Handling Precautions” (p. 63). For details on the USB-AC adapter, see “USB-AC adapter” (p. 64).

If the indicator lamp does not light, check the USB cable and USB-AC adapter connections.

The battery can be charged while the camera is connected to the computer via USB. The charging time varies depending on the performance of the computer. (There may be cases in which it takes approx. 10 hours.)
Turning on the camera and making the initial settings

When you turn on the camera for the first time, a screen appears enabling to set the language for the menus and messages displayed in the monitor, and the date and time.

1 Press the ON/OFF button to turn on the camera, press the joystick to \( \Delta \nabla \) to select your language and press the \( \text{OK} \) button.

2 Press the joystick to \( \Delta \nabla \) to select the year for [Y].

3 Press the joystick to \( \text{D} \) to save the setting for [Y].

4 As in Steps 2 and 3, press the joystick to \( \Delta \nabla \) to set [M] (month), [D] (day), [Time] (hours and minutes), and [Y/M/D] (date order), and then press the \( \text{OK} \) button.

5 Press the joystick to \( \leftarrow \rightarrow \) to select the [\( \text{H} \)] time zone and then press the \( \text{OK} \) button.
   - Use \( \Delta \nabla \) to turn daylight saving time ([Summer]) on or off.

   Date and time setting screen

   For precise time setting, press the \( \text{OK} \) button as the time signal strikes 00 seconds.
**Learning how to use the camera**

- Press the **ON/OFF** button to turn on the camera and enter the standby mode. (Press the **ON/OFF** button again to turn off the camera.)
- Select the shooting mode, and press the shutter button to shoot a still image.
- To shoot a movie, press the **button**.
- Set the shooting functions using the function menu or the setup menu.
- To view images, press the **button** to switch to playback mode.
- Set the playback functions using the setup menu.
- To return to standby mode, press the **button** again, or press the shutter button halfway down and then release it.
- Press and hold the **button** while the camera is turned off to start up the camera in the playback mode.
- In this case, pressing the **button** again sets the camera to the standby mode.

**Using the camera guide**

Use the camera guide to look up camera operations.

1. **Press the button in the standby mode screen or the playback screen.**

*1 When set to [Backlight HDR], [Image Size] is limited to [5M] or lower. This is recommended for shooting a fixed subject.

“List of settings available in each shooting mode” (p. 53), “List of SCN settings” (p. 54), “List of MAGIC settings” (p. 56)

1 Press the joystick to in the standby mode screen to select the shooting mode.
   - To select the BEAUTY, SCN, MAGIC and submodes, press the joystick to first to display the submodes, then press the joystick to to select the submode, and press the button.

To select a submode

Icon indicating the submode that is set
Learning about the shooting modes

P (P mode)
The camera will select the appropriate aperture value and shutter speed for the subject. Changes can also be made to various shooting settings, such as exposure compensation, as needed.

iAUTO (iAUTO mode)
The camera will automatically select the optimal shooting mode for the scene. The shooting condition is decided by the camera and settings cannot be changed, excepting some functions.

BEAUTY (BEAUTY mode)
You can shoot with Beauty Fix effects.

1 Point the camera toward the subject. Check the frame appearing around the face detected by the camera, and then press the shutter button to take the picture.

2 To save the image, select [OK] on the review screen and press the button. To retouch the image additionally, select [Beauty Fix].

Beauty Fix
① Use △ ▽ ◄ to select a retouching item, and press the button.

② Check the retouched effects on the review screen, then press the button to start the retouch process and save.

● Settings for Beauty Fix can be registered.

⚠ Depending on the picture, the editing may not be effective.
**SCN (SCN mode)**

You can shoot with the best mode for the subject and shooting scene. The best shooting settings for various scenes are pre-programmed as submodes. Note that functions may be limited in some modes. Refer to the descriptions displayed on the submode selection screen, and select the desired submode.

**To take underwater photos**

The [Snapshot] submode is recommended for shooting underwater.

In the [Snapshot] submode, you can press the OK button to fix the focus distance (AF lock).

Press the OK button again to cancel the AF lock.

**MAGIC (MAGIC mode)**

You can shoot with special effects. Refer to the sample images displayed on the submode selection screen, and select the desired submode.

The best shooting settings for each effect are pre-programmed, so some function settings cannot be changed.

⚠️ Note that some effects may not be applied to movies.
(Panorama mode)

You can shoot and combine multiple images to create an image with a wide angle of view (panoramic image).

Taking pictures with [Auto]
1. Press the shutter button to take the first frame.
2. Move the camera slightly in the direction of the second frame.
3. Press the shutter button to take the first frame. The camera releases the shutter automatically when the pointer and the target mark overlap.

Taking pictures with [Manual]
1. Use \( \Delta \ \nabla \leftarrow \rightarrow \) to specify at which edge the next picture is to be connected.
2. Press the shutter button to take the first frame. The edge of the first frame is displayed faintly on the screen.
3. Compose the next shot so that the edge of the first frame displayed faintly on the screen overlaps the subject of the second frame, and press the shutter button.
4. Repeat step 3 to take a third frame. The camera automatically combines the frames into a single panorama image.

Taking pictures with [PC]
1. Use \( \Delta \ \nabla \leftarrow \rightarrow \) to select the direction that the frames are combined.
2. Press the shutter button to take the first frame. The edge of the first frame is displayed faintly on the screen.
3. Compose the next shot so that the edge of the first frame displayed faintly on the screen overlaps the subject of the second frame, and press the shutter button.
4. Repeat step 3 until the desired number of frames are taken, and then press the \( \bigcirc \) button or MENU button when finished.

Panorama shooting is possible for up to 10 frames. The shot images are combined into a single panorama image by the PC software.

For details on installing the PC software, refer to (p. 40). In addition, refer to the PC software help guide for details on how to make panorama images.
**Viewing images**

1. **Press the** [>] **button.**

   - **Number of frames/Total number of images**
   - **Playback image**

   - **Pictures taken using BEAUTY mode or sequential shooting function are displayed as a group. Press the zoom lever to the T side to play back the image in the group.**

2. **Use [ ] to select an image.**

   - Displays previous image
   - Displays next image

   - **Hold [ ] to fast forward and hold [ ] to reverse.**
   - **Press the [ ] button again to return to the shooting screen.**

**Index view and close-up view**

Index view enables quick selection of a desired image. Close-up view (up to 10x magnification) allows checking of image details.

1. **Press the zoom lever.**

   - **Single-image view**
   - **Close-up view**

   - **To select an image in index view**
   - Use [ ] to select an image, and press the [OK] button to display the selected image in single-image view.

   - **To scroll an image in close-up view**
   - Use [ ] [ ] [ ] to move the viewing area.
Playing back panorama images

Panorama images that were combined together using [Auto] or [Manual] can be scrolled for viewing.

1 Select a panorama image during playback.

2 Press the OK button.

To control panorama image playback

Stop playback: Press the MENU button.
Pause: Press the button.

Control while paused
Press △ ▽ ◄► to scroll the image in the direction of the pressed button.
Press the zoom lever to enlarge/shrink the image.
Press the OK button to restart scrolling.
Playback mode display

- Normal

Still image

- Detailed

- No information

Switching the displays

The displays change in the order of Normal → Detailed → No info. each time Δ (INFO) is pressed.
Erasing images during playback
(Single image erase)

1 Display the image you want to erase and press \( \nabla \) (\( \text{\textcopyright} \)).

2 Press \( \Delta \nabla \) to select [Erase], and press the \( \text{\textcopyright} \) button.

⚠ Multiple images or all images can be erased at a time (p. 31).
## Shooting movies

1. Press the button to start recording.

   ![Lights up red when recording](image)

   - **Recording time**
   - **Recording length (p. 60)**

   - The movie is shot in the set shooting mode. Note that the shooting mode effects may not be obtained for some shooting modes.
   - Sound is also recorded.

2. Press the button again to stop recording.

### Playing back movies

Select a movie, and press the button.

![Movie](image)  ![During playback](image)

### Operations while playback is paused

- **Elapsed time/Total shooting time**
- **During pause**

- **Cueing**
  - Use ▲ to display the first frame and press ▼ to display the last frame.

- **Advancing and rewinding one frame at a time**
  - Press ► or ◀ to advance or rewind one frame at a time. Hold ► or ◀ pressed for continuous advance or rewind.

- **Resuming playback**
  - Press the button to resume playback.

### To stop movie playback

Press the MENU button.

- To play back movies on the computer, the included PC software is recommended. For the first use of the PC software, connect the camera to the computer, then launch the software.
Menu settings

Some shooting menu functions cannot be set in certain shooting modes. For details, refer to “List of settings available in each shooting mode” (p. 53).

*6 Image Size is limited to [ISO Auto] or lower when drive setting is set to [High-Speed1] or [High-Speed2].

**Registering one touch white balance**

Select [One Touch 1] or [One Touch 2], face the camera toward a piece of white paper or other white object, and press the MENU button.

- The camera releases the shutter and the white balance is registered. When the white balance was previously registered, the registered data is updated.
- The registered white balance data will not be cleared by turning off the power.
- Perform this procedure under the light where the pictures will be actually taken.
- When the camera settings are changed, the white balance must be registered again.

⚠️ When the white balance cannot be registered, check that the white paper fills the screen, and then perform the procedure again.
Using the setup menu

Press the **MENU** button during shooting or playback to display the setup menu. The setup menu provides access to a variety of camera settings, such as shooting and playback functions, time and date settings, and display options.

1. Press the **MENU** button.
   - The setup menu is displayed.

2. Press `<` to select the page tabs. Use `△ ▽` to select the desired page tab and press `▸`.

3. Use `△ ▽` to select the desired submenu 1 and then press the **OK** button.

4. Use `△ ▽` to select the desired submenu 2 and then press the **OK** button.
   - Once a setting is selected, the display returns to the Submenu 1.
   - There may be additional operations.

5. Press the **MENU** button to complete the setting.
The default settings of the function are highlighted in.

For the operation method, refer to “Using the setup menu” (p. 24).

</table>

Warning: When set to [Auto] or [On], [ESP/ ] is automatically fixed to [ESP].

Selecting the image quality for still images [Compression]

<table>
<thead>
<tr>
<th>Submenu 2</th>
<th>Application</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fine</td>
<td>Shooting at high quality.</td>
</tr>
<tr>
<td>Normal</td>
<td>Shooting at normal quality.</td>
</tr>
</tbody>
</table>

Warning: “Number of storable pictures (still images)/Recording length (movies) in the internal memory and cards” (p. 59, 60)
To focus on a moving subject continuously (AF Tracking)

1. Hold the camera to align the AF target mark on the subject and press the OK button.
2. When the camera recognizes the subject, the AF target mark automatically tracks the subject movement to focus on it continuously.
3. To cancel the tracking, press the OK button.

- Depending on the subjects or the shooting conditions, the camera may be unable to lock the focus or fail to track the subject movement.
- When the camera fails to track the subject movement, the AF target mark changes to red.

Selecting the method for measuring the brightness [ESP/ ]

<table>
<thead>
<tr>
<th>Submenu 2</th>
<th>Application</th>
</tr>
</thead>
<tbody>
<tr>
<td>ESP</td>
<td>Shoots to obtain a balanced brightness over the entire screen (Meters the brightness at the center and surrounding areas of the screen separately).</td>
</tr>
<tr>
<td>(spot)</td>
<td>Shoots the subject at the center during backlighting (Meters the brightness at the center of the screen).</td>
</tr>
</tbody>
</table>

- When set to [ESP], the center may appear dark when shooting against strong backlighting.

Shooting at higher magnifications than optical zoom [Digital Zoom]

<table>
<thead>
<tr>
<th>Submenu 2</th>
<th>Application</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Disable digital zoom.</td>
</tr>
<tr>
<td>On</td>
<td>Enable digital zoom.</td>
</tr>

</tbody>
</table>

⚠ When erasing pictures in the internal memory, do not insert the card into the camera.

⚠ Protected images cannot be erased.
To individually select and erase images

- [Sel. Image]
  1. Use △ ▽ to select [Sel. Image], and press the OK button.
  2. Use △ ▽ ◄► to select the image to be erased, and press the OK button to add a ✓ mark to the image.
     - Press to the T end to return to the single frame display.

  3. Repeat Step 2 to select the images to be erased, and then press the MENU button to erase the selected images.

  4. Use △ ▽ to select [Yes], and press the OK button.
     - The images with a ✓ mark are erased.

To erase all images [All Erase]

  1. Use △ ▽ to select [All Erase], and press the OK button.
  2. Use △ ▽ to select [Yes], and press the OK button.

Saving print settings to the image data

- [Print Order]
  1. “Print Reservations” (p. 46)

  2. Print reservation can be set only for still images that are recorded to the card.

Protecting images ➤ [5]

  1. Protected images cannot be erased by [Erase] (p. 18, 31), [Sel. Image] (p. 31), [Erase Group] (p. 31), or [All Erase] (p. 31), but all images are erased by [Memory Format]/[Format] (p. 33).

  1. Use ◄► to select an image.
  2. Press the OK button.
     - Press the OK button again to cancel the settings.
  3. If necessary, repeat Steps 1 and 2 to protect other images, and press the MENU button.

Setting images to upload to Internet using OLYMPUS Viewer 2

- [Upload Order]
  1. Use ◄► to select an image.
  2. Press the OK button.
     - Press the OK button again to cancel the settings.
  3. If necessary, repeat Steps 1 and 2 to make settings for other images, and press the MENU button.

  1. Only JPEG files can be ordered.
  2. For details on OLYMPUS Viewer 2, refer to “Installing the PC software and registering user” (p. 41).
  3. For details on uploading images, refer to OLYMPUS Viewer 2 “Help”.

¹ The number for the folder name is reset to 100, and the one for the file name is reset to 0001.

Adjusting the image processing function [Pixel Mapping]

⚠ This function has already been adjusted at factory shipping, and no adjustment is needed right after purchase. Approximately once a year is recommended.

⚠ For best results, wait at least one minute after taking or viewing pictures before performing pixel mapping. If the camera is turned off during pixel mapping, be sure to perform it again.

To adjust the image processing function

Press the  button when [Start] (Submenu 2) is displayed.

- The check and adjustment of the image processing function starts.
Adjusting the brightness of the monitor

To adjust the monitor brightness

1. Use ▲ ▼ to adjust the brightness while viewing the screen, and then press the OK button.

Playing back images on a TV

The TV video signal system varies depending on the countries and regions. Before viewing camera images on your TV, select the video output according to your TV’s video signal type.

<table>
<thead>
<tr>
<th>Submenu 2</th>
<th>Submenu 3</th>
<th>Application</th>
</tr>
</thead>
<tbody>
<tr>
<td>NTSC/PAL</td>
<td>NTSC</td>
<td>Connecting the camera to a TV in North America, Taiwan, Korea, Japan, and so on.</td>

</tr>
<tr>
<td>HDMI Out</td>
<td>480p/576p</td>
<td>Set the signal format to be given priority. If the TV setting does not match, it is changed automatically.</td>
</tr>
<tr>
<td></td>
<td>720p</td>
<td></td>
</tr>
<tr>
<td></td>
<td>1080i</td>
<td></td>
</tr>
<tr>
<td>HDMI Control</td>
<td>Off</td>
<td>Operate with the camera.</td>
</tr>
<tr>
<td></td>
<td>On</td>
<td>Operate with the TV remote control.</td>
</tr>
</tbody>
</table>

The factory default settings differ according to the region where the camera is sold.

To play back camera images on a TV

- Connection via AV cable

1. Use the camera to select the same video signal system as the one of connected TV ([NTSC]/[PAL]).
2. Connect the TV and camera.
● Connection via HDMI cable

1. On the camera, select the digital signal format that will be connected ([480p/576p]/[720p]/[1080i]).
2. Connect the TV and camera.
3. Turn on the TV, and change “INPUT” to “VIDEO (an input jack connected to the camera)”.
4. Turn on the camera, and use △ ▽ ◀ ▶ to select the image for playback.

⚠️ When the camera is connected to the computer by the USB cable, do not connect the HDMI cable to the camera.

For details on changing the input source of the TV, refer to the TV’s instruction manual.

⚠️ When the camera and TV are connected by both an AV cable and an HDMI cable, the HDMI cable will take priority.

⚠️ Depending on the TV’s settings, the displayed images and information may become cropped.

**To operate images with the TV remote control**

1. Set [HDMI Control] to [On], and turn off the camera.
2. Connect the camera and TV with an HDMI cable. “Connection via HDMI cable” (p. 37)
3. First turn on the TV, and then turn on the camera.
   - Operate by following the operation guide that is displayed on the TV.

⚠️ With some TVs, operations cannot be performed with the TV remote control even though the operation guide is displayed on the screen.

⚠️ If operations cannot be performed with the TV remote control, set [HDMI Control] to [Off] and operate using the camera.
Saving battery power between shots [Power Save]

<table>
<thead>
<tr>
<th>Submenu 2</th>
<th>Application</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Cancels [Power Save].</td>
</tr>
<tr>
<td>On</td>
<td>When the camera is not being used for approx. 10 seconds, the monitor automatically turns off to save battery power.</td>
</tr>
</tbody>
</table>

To resume standby mode
Press any button.

Changing the display language [Language]

<table>
<thead>
<tr>
<th>Submenu 2</th>
<th>Application</th>
</tr>
</thead>
<tbody>
<tr>
<td>Languages</td>
<td>The language for the menus and error messages displayed on the monitor is selected.</td>
</tr>
</tbody>
</table>

Setting the date and time [Clock]

1. Press the joystick to \(\triangle\) \(\triangledown\) to select the year for [Y].
2. Press the joystick to \(\triangleright\) to save the setting for [Y].
3. As in Steps 2 and 3, press the joystick to \(\triangle\) \(\triangledown\) \(\langle\rangle\) to set [M] (month), [D] (day), [Time] (hours and minutes), and [Y/M/D] (date order), and then press the \(\circ\) button.

! For precise time setting, press the \(\circ\) button as the time signal strikes 00 seconds.

To check the date and time
Press the \(\text{?}\) button while the camera is turned off. The current time is displayed for approx. 3 seconds.

Choosing home and alternate time zones [World Time]

! You will not be able to select a time zone using [World Time] if the camera clock has not first been set using [\(\triangle\)].

<table>
<thead>
<tr>
<th>Submenu 2</th>
<th>Submenu 3</th>
<th>Application</th>
</tr>
</thead>
<tbody>
<tr>
<td>(\text{Home/Alternate})</td>
<td>(\text{Home/Alternate})</td>
<td>The time in the home time zone (the time zone selected for (\text{\text{Home/Alternate}}) in submenu 2).</td>
</tr>
<tr>
<td>(\text{Home/Alternate})</td>
<td>(\text{\text{Home/Alternate}})</td>
<td>The time in the travel destination time zone (the time zone selected for (\text{\text{Home/Alternate}}) in submenu 2).</td>
</tr>
<tr>
<td>(\text{Home/Alternate})</td>
<td>(\text{\text{Home/Alternate}})</td>
<td>Select the home time zone ((\text{\text{Home/Alternate}})).</td>
</tr>
<tr>
<td>(\text{Home/Alternate})</td>
<td>(\text{\text{Home/Alternate}})</td>
<td>Select the travel destination time zone ((\text{\text{Home/Alternate}})).</td>
</tr>
</tbody>
</table>

\(\text{\text{Home/Alternate}}\) In areas where daylight saving time is in effect, use \(\triangle\) \(\triangledown\) to turn daylight saving time ([Summer]) on.

\(\text{\text{Home/Alternate}}\) When you select a time zone, the camera automatically calculates the time difference between the selected zone and the home time zone (\(\text{\text{Home/Alternate}}\)) to display the time in the travel destination time zone (\(\text{\text{Home/Alternate}}\)).
Registering the settings for Beauty Fix

[Beauty Settings]

1. Depending on the picture, the editing may not be effective.
2. Use △ ▽ to select a retouching setting, and press the OK button.
3. Press the shutter button to take a portrait picture.
4. Select a retouching item, and press the OK button.
5. Press the OK button on the review screen to save the image.
   - Registration is complete.

Using the LED illuminator as an auxiliary light

[LED Illuminator]

<table>
<thead>
<tr>
<th>Submenu 2</th>
<th>Application</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Disables the LED illuminator.</td>
</tr>
<tr>
<td>On</td>
<td>Enables the LED illuminator.</td>
</tr>
</tbody>
</table>

To use the LED illuminator

Press and hold the 2 button down until the LED illuminator lights up.

- If you perform an operation when the LED illuminator is on, it will illuminate up to approx. 90 seconds.

The LED illuminator turns off if no operation is performed for approx. 30 seconds.

Even when the camera’s power is turned off, if the 2 button is pressed until the LED illuminator lights up, it lights for 30 seconds.

To turn the LED illuminator off

Press and hold the 2 button down, until the LED illuminator turns off.
Connecting with a computer

Set [USB Connection] in the setup menu of the camera beforehand. (p. 34)

Connecting the camera

When [USB Connection] is set to [Auto], connect the camera and the computer, select [Storage] or [MTP] at the screen for selecting the connection method, and then press the button.

System requirements

- Windows : Windows XP Home Edition/Professional (SP1 or later)/Windows Vista/Windows 7
- Macintosh : Mac OS X v10.3 or later

⚠️ When using another system other than Windows XP (SP2 or later)/Windows Vista/Windows 7, set to [Storage].

⚠️ Even if a computer has USB ports, proper operation is not guaranteed in the following cases:
  - Computers with USB ports installed using an expansion card, etc.
  - Computers without a factory-installed OS and home-built computers

⚠️ When the computer does not support SDXC cards, a message may appear urging to format the internal memory or card. (Formatting will completely erase all images, so do not format.)
Installing the PC software and registering user

Windows

1 Insert the supplied CD in a CD-ROM drive.

Windows XP
- A “Setup” dialog will be displayed.

Windows Vista/Windows 7
- An Autorun dialog will be displayed. Click “OLYMPUS Setup” to display the “Setup” dialog.

   ! If the “Setup” dialog is not displayed, select “My Computer” (Windows XP) or “Computer” (Windows Vista/Windows 7) from the start menu. Double-click the CD-ROM (OLYMPUS Setup) icon to open the “OLYMPUS Setup” window and then double-click “Launcher.exe”.

   ! If a “User Account Control” dialog is displayed, click “Yes” or “Continue”.

2 Register your Olympus product.
- Click the “Registration” button and follow the on-screen instructions.

   ! To register the camera must be connected to the computer. “Connecting the camera” (p. 40)

   ! If nothing is displayed on the camera screen even after connecting the camera to the computer, the battery may be exhausted. Charge the battery and then connect the camera again.

3 Install OLYMPUS Viewer 2.
- Check the system requirements before beginning installation.
- Click the “OLYMPUS Viewer 2” button and follow the on-screen instructions to install the software.

⚠️ See online help for information on using the software.

#### 4 Install the camera manual.
- Click the “Camera Instruction Manual” button and follow the on-screen instructions.

### Macintosh

#### 1 Insert the supplied CD in a CD-ROM drive.
- Double-click the CD (OLYMPUS Setup) icon on the desktop.
- Double-click the “Setup” icon to display the “Setup” dialog.

#### 2 Install OLYMPUS Viewer 2.
- Check the system requirements before beginning installation.
- Click the “OLYMPUS Viewer 2” button and follow the on-screen instructions to install the software.

⚠️ You can register via “Registration” in OLYMPUS Viewer 2 “Help”.

### OLYMPUS Viewer 2

⚠️ Other languages can be selected from the language combo box. For information on using the software, see online help.

#### 3 Copy the camera manual.
- Click the “Camera Instruction Manual” button to open the folder containing the camera manuals. Copy the manual for your language to the computer.
Direct printing (PictBridge)

By connecting the camera to a PictBridge-compatible printer, you can print images directly without using a computer.

To find out if your printer supports PictBridge, refer to the printer’s instruction manual.

⚠ The printing modes, paper sizes, and other parameters that can be set with the camera vary depending on the printer that is used. For details, refer to the printer’s instruction manual.

⚠ For details on the available paper types, loading paper, and installing ink cassettes, refer to the printer’s instruction manual.

⚠ In the setup menu, set [USB Connection] to [Print]. [USB Connection] (p. 34)

Printing images at the printer’s standard settings [Easy Print]

1 Display the image to be printed on the monitor.

⚠ “Viewing images” (p. 15)

2 Turn on the printer, and then connect the printer and camera.

3 Press ▶ to start printing.

4 To print another image, use ◀▶ to select an image, and press the OK button.

To exit printing

After a selected image is displayed on the screen, disconnect the USB cable from the camera and printer.
Changing the printer's settings for printing [Custom Print]

1 Display the image to be printed on the monitor.
   “Viewing images” (p. 15)

2 Turn on the printer, and then connect the printer and camera.

3 Press the \( \text{OK} \) button.

4 Use \( \Delta \nabla \) to select the print mode, and press the \( \text{OK} \) button.

<table>

</tr>
</tbody>
</table>

To crop an image [□]

1. Use the zoom lever to select the size of the cropping frame, use ▲ ▼ ◄ ► to move the frame, and then press the ◄ ► button.

2. Use ▲ ▼ to select [OK], and press the ◄ ► button.

9. If necessary, repeat Steps 6 and 7 to select the image to be printed, make the detailed settings, and set [Single Print].

10. Press the ◄ ◄ ◄ ◄ ◄ button.

11. Use ▲ ▼ to select [Print], and press the ◄ ◄ ◄ ◄ ◄ button.
   - Printing starts.
   - When [Option Set] is selected in [All Print] mode, [Print Info] screen is displayed.
   - When printing is finished, the [Print Mode Select] screen is displayed.

To cancel printing

1. Press the MENU button while [Do Not Remove USB Cable] is displayed.
2. Select [Cancel] using ▲ ▼ and then press the ◄ ◄ ◄ ◄ ◄ button.

12. Press the MENU button.

13. When the message [Remove USB Cable] is displayed, disconnect the USB cable from the camera and printer.
**Print Reservations**

In print reservations, the number of prints and date imprint option are saved in the image on the card. This enables easy printing at a printer or print shop supporting DPOF by using only the print reservations on the card without a computer or a camera.

⚠️ Print reservations can be set only for the images stored on the card.

⚠️ DPOF reservations set by another DPOF device cannot be changed by this camera. Make changes using the original device. Making new DPOF reservations with this camera will erase the reservations made by the other device.

⚠️ DPOF print reservations can be made for up to 999 images per card.

**Single-frame print reservations [ ]**

1. Display the setup menu. 
   “Using the setup menu” (p. 24)

2. From the playback menu [ ], select [Print Order] and then press the [ ] button.

3. Use [ ] to select [ ], and press the [ ] button.

4. Use [ ] to select the image for print reservation. Use [ ] to select the quantity. Press the [ ] button.

5. Use [ ] to select the [ ] (date print) screen option, and press the [ ] button.

<table>
<thead>
<tr>
<th>Submenu 2</th>
<th>Application</th>

<tr>
<td>Date</td>
<td>This prints the image with the shooting date.</td>
</tr>
<tr>
<td>Time</td>
<td>This prints the image with the shooting time.</td>
</tr>
</tbody>
</table>

6. Use [ ] to select [Set], and press the [ ] button.

**Reserving one print each of all images on the card [ ]**

1. Follow Steps 1 and 2 in [ ] (p. 46).

2. Use [ ] to select [ ], and press the [ ] button.

3. Follow Steps 5 and 6 in [ ].

**Resetting all print reservation data**

1. Follow Steps 1 and 2 in [ ] (p. 46).

2. Select either [ ] or [ ], and press the [ ] button.

3. Use [ ] to select [Reset], and press the [ ] button.
Resetting the print reservation data for selected images

1. Follow Steps 1 and 2 in [①] (p. 46).

2. Use ▲▼ to select [①], and press the OK button.

3. Use ▲▼ to select [Keep] and press the OK button.

4. Use ◀▶ to select the image with the print reservation you want to cancel. Use ▲▼ to set the print quantity to “0”.

5. If necessary, repeat Step 4, and then press the OK button when finished.

6. Use ▲▼ to select the [⑨] (date print) screen option, and press the OK button.
   - The settings are applied to the remaining images with the print reservation data.

7. Use ▲▼ to select [Set], and press the OK button.
Usage Tips

If the camera does not work as intended, or if an error message is displayed on the screen, and you are unsure of what to do, refer to the information below to fix the problem(s).

Troubleshooting

Battery

“The camera does not work even when batteries are installed”.

- Insert recharged batteries in the correct direction.
  “Inserting and removing the battery and card” (p. 4),
  “Charging the battery” (p. 5)
- Battery performance may have been reduced temporarily due to low temperature. Take the batteries out of the camera, and warm them by putting them in your pocket for a while.

Card/Internal memory

“An error message is displayed”.

“Error message” (p. 49)

Shutter button

“No picture is taken when the shutter button is pressed”.

- Cancel sleep mode.
  To save battery power, the camera automatically goes into sleep mode and the monitor turns off if there is no operation for 3 minutes when the camera is turned on. No picture is taken even if the shutter button is fully pressed in this mode. Operate the zoom lever or other buttons to restore the camera from sleep mode before taking a picture. If the camera is left for another 12 minutes, it automatically turns off. Press the ON/OFF button to turn the camera on.
- Press the button to switch to the shooting mode.
- Wait until (flash charge) stops blinking before taking pictures.

- With prolonged camera use, the internal temperature may increase, resulting in automatic shutdown. If this occurs, remove the battery from the camera and wait until the camera has sufficiently cooled.
  The camera’s external temperature may also increase during use, however this is normal and does not indicate malfunction.

Monitor

“Difficult to see”.

- Condensation may have occurred. Turn off the power, and wait for the camera body to become acclimated to the surrounding temperature and dry out before taking pictures.

“The light is caught in the picture”.

- Shooting with flash in dark situations results in an image with many flash reflections on dust in the air.

Date and time function

“Date and time settings return to the default setting”.

- If the batteries are removed and left out of the camera for about 3 days**, the date and time settings return to the default setting, and must be reset.
  ** The time until the date and time settings return to the default setting varies depending on how long the batteries have been loaded.
  “Turning on the camera and making the initial settings” (p. 7)

Miscellaneous

“The camera makes a noise when taking pictures”.

- The camera may activate the lens and make a noise even if no operation is performed. This is because the camera automatically performs actions of auto focus as far as it is ready to shoot.
## Error message

When one of the messages below is displayed on the monitor, check the corrective action.

<table>
<thead>

"¹ Before erasing important images, download them to a computer.
"² All data will be erased.
"³ This is displayed, for instance, when the printer’s paper tray has been removed. Do not operate the printer while making the print settings on the camera.
"⁴ This camera may be unable to print images taken by other cameras.
Shooting tips

When you are unsure of how to take a picture that you envision, refer to the information below.

Focusing

“Focusing on the subject”

- Taking a picture of a subject not in the center of the monitor
  After focusing on an object at the same distance as the subject, compose the shot, and take the picture.
  Pressing the shutter button halfway (p. 9)
- Set [AF Mode] (p. 25) to [Face/iESP]
- Taking a picture in [AF Tracking] mode (p. 25)
  The camera tracks the subject movement automatically to focus on it continuously.
- Taking a picture of a shadowy subject
  Using the AF illuminator makes focusing easier.
  [AF Illuminat.] (p. 27)
- Taking a picture of subjects where autofocus is difficult
  In the following cases, after focusing on an object (by pressing the shutter button halfway down) with high contrast at the same distance as the subject, compose the shot, and take the picture.

Subjects with low contrast

When extremely bright objects appear in the center of the monitor

Object with no vertical lines*1

*1 It is also effective to compose the shot by holding the camera vertically to focus, and then returning to the horizontal position to take the picture.

When objects are at different distances

Fast-moving object

The subject is not in the center of the frame
Camera shake

“Taking pictures without camera shake”

● Taking pictures using [Image Stabilizer] (p. 26)
  The image pickup device*1 shifts to correct for camera shake even if the ISO sensitivity is not increased. This function is also effective when taking pictures at a high zoom magnification.
  *1 A device that takes light received through the lens and converts it into electric signals.

● Shooting movies using [IS Movie Mode] (p. 28)
  Select [Sport] in the scene mode (p. 11)
  The [Sport] mode uses a fast shutter speed and can reduce the blur incurred by a moving subject.

● Taking pictures at a high ISO sensitivity
  If a high ISO sensitivity is selected, pictures can be taken at a high shutter speed even at locations where a flash cannot be used.
  “ISO sensitivity” (p. 22)

Exposure (brightness)

“Taking pictures with the right brightness”

● Taking pictures of a subject against a backlight
  Faces or backgrounds are bright even when shot against backlight.
  [Shadow Adjust] (p. 25)

● Taking pictures using [Face/iESP] (p. 25)
  Appropriate exposure is obtained for a face against backlight, and the face is brightened.

● Taking pictures using [ ] for [ESP/ ] (p. 26)
  Brightness is matched with a subject in the center of the screen and the image is not affected by background light.

● Taking pictures using [ ] (p. 21) flash
  A subject against backlight is brightened.

● Taking pictures of a white beach or snow scene
  Select [Beach & Snow] in the scene mode (p. 11).

● Taking pictures using exposure compensation (p. 22)
  Adjust the brightness while viewing the screen for taking the picture. Normally, taking pictures of white subjects (such as snow) results in images that are darker than the actual subject. Use the exposure compensation to adjust in the positive (+) direction to express whites as they appear. When taking pictures of black subjects, on the other hand, it is effective to adjust in the negative (-) direction.

Color hue

“Taking pictures with colors at the same shade as they appear”

● Taking pictures by selecting white balance (p. 22)
  Best results in most environments can normally be obtained with the [WB Auto] setting, but for some subjects, you should try experimenting with different settings. (This is especially true for sunshade under a clear sky, mixed natural and artificial light settings, and so on.)
Image quality

“Taking sharper pictures”
- Taking pictures with the optical zoom or super-resolution zoom
  Avoid using digital zoom (p. 26) to take pictures.
- Taking pictures at a low ISO sensitivity
  If the picture is taken with a high ISO sensitivity, noise (small colored spots and color unevenness that were not in the original image) can occur, and the image can appear grainy.
  “ISO sensitivity” (p. 22)

Batteries

“Making batteries last longer”
- Set [Power Save] (p. 38) to [On]

Playback/Editing tips

Playback

“Playing images in the internal memory and card”
- Remove the card and display the images in internal memory
  - “Inserting and removing the battery and card” (p. 4)

“Viewing images with high picture quality on a high-definition TV”
- Connect the camera to the TV using an HDMI cable (sold separately)
  - “Playing back images on a TV [TV Out]” (p. 36)

Editing

“Erasing the sound recorded to a still image”
- Record over the sound with silence when playing back the image
  “Adding sound to still images [ ]” (p. 30)
### List of settings available in each shooting mode

For details on **SCN**, refer to “List of **SCN** settings” (p. 54).
For details on shaded areas, refer to “List of **MAGIC** settings” (p. 56).

Appendix

Camera care

Exterior
• Wipe gently with a soft cloth. If the camera is very dirty, soak the cloth in mild soapy water and wring well. Wipe the camera with the damp cloth and then dry it with a dry cloth. If you have used the camera at the beach, use a cloth soaked in clean water and wrung well.
• Foreign materials may be attached to the camera when using the camera in conditions with foreign materials such as dirt, dust or sand. If you continue to use the camera in such conditions, it could cause damage to the camera. To avoid such damage, wash the camera using the following method.
  1. Close and lock the battery/card cover and connector cover firmly. (p. 4, 5)
  2. Fill a bucket or other container with fresh water, immerse the camera facing downward in the bucket and shake the camera thoroughly. And rinse the camera by placing it directly under a strong stream of tap water with pressing the button.

Lens
• Blow dust off the lens with a commercial blower, then wipe gently with a lens cleaner.
  ❗ Do not use strong solvents such as benzene or alcohol, or chemically treated cloth.
  ❗ Mold may form on the lens surface if the lens is left dirty.

Battery/USB-AC adapter
• Wipe gently with a soft, dry cloth.

Storage
• When storing the camera for extended periods, remove the battery, USB-AC adapter and card, and keep in a cool, dry place that is well ventilated.
• Periodically insert the battery and test the camera functions.
  ❗ Avoid leaving the camera in places where chemical products are handled since this may result in corrosion.

Using a separately sold USB-AC adapter

The USB-AC adapter F-3AC (sold separately) can be used with this camera. Do not use any USB-AC adapter other than the dedicated one. When using F-3AC, be sure to use the USB cable included with this camera. Do not use any other USB-AC adapter with this camera.

Using a separately sold charger

A charger (UC-50: sold separately) can be used to charge the battery.

Monitor
• Wipe gently with a soft cloth.
Using your charger and USB-AC adapter abroad

- The charger and USB-AC adapter can be used in most home electrical sources within the range of 100 V to 240 V AC (50/60Hz) around the world. However, depending on the country or area you are in, the AC wall outlet may be shaped differently and the charger and USB-AC adapter may require a plug adapter to match the wall outlet. For details, ask at your local electrical shop or travel agent.
- Do not use travel voltage converters as they could damage your charger and USB-AC adapter.

Using the card

Cards compatible with this camera
SD/SDHC/SDXC/Eye-Fi card (commercially available) (for compatibility card details, visit the Olympus website.)

SDXC card write-protect switch
The SD/SDHC/SDXC card body has a write-protect switch.
If you set the switch to the “LOCK” side, you will not be able to write to the card, delete data or format. Return the switch to enable writing.

Format
Cards must be formatted with this camera before first use or after being used with other cameras or computers.

Checking the image saving location
The memory indicator shows whether the internal memory or card is being used during shooting and playback.

Current memory indicator
- Internal memory is being used
- Card is being used

Even if [Memory Format]/[Format], [Erase], [Sel. Image], or [All Erase] is performed, the data in the card is not completely erased. When disposing of the card, damage the card to prevent the disclosure of personal data.

Readout/recording process of the card
During shooting, the current memory indicator lights up in red while the camera is writing data. Never open the battery/card cover or unplug the USB cable. This can not only damage the image data but also render the internal memory or card unusable.

This camera can be used without a card by storing images in its internal memory.

Eye-Fi card
- The Eye-Fi card may become hot during use.
- When using an Eye-Fi card, the battery may run out faster.
- When using an Eye-Fi card, the camera may function more slowly.
Number of storable pictures (still images)/Recording length (movies) in the internal memory and cards

The figures for the number of storable still pictures and recording length are approximate. The actual capacity varies with shooting conditions and the card used.

*1 The recording length is up to 29 minutes in the HD quality specified.

The maximum file size of a single movie is 4 GB, regardless of the capacity of the card.

Increasing the number of pictures that can be taken

Either erase unwanted images, or connect the camera to a computer or other device to save the images, and then erase the images in the internal memory or card.
[Erase] (p. 18, 31), [Sel. Image] (p. 31), [All Erase] (p. 31), [Erase Group] (p. 31), [Memory Format]/[Format] (p. 33)

Important information about water and shock resistant features

**Water resistance:** The waterproof feature is warranted*1 to operate at depths up to 5 m (16 feet) for up to one hour. The waterproof feature may be compromised if the camera is subject to substantial or excessive impact.

**Shock resistance:** The anti-shock feature warrants*2 the operation of the camera against accidental impact incurred from everyday use of your digital compact camera. The anti-shock feature does not unconditionally warrant all defective operation or cosmetic damage. Cosmetic damage, such as scratches and dents, are not covered under the warranty.

As with any electronic device, proper care and maintenance are required to preserve the integrity and operation of your camera. To maintain camera performance, please take your camera to the nearest Olympus Authorized Service Center to have it inspected after any major impact. In the event the camera is damaged as a result of negligence or misuse, the warranty will not cover costs associated with the service or repair of your camera. For additional information on our warranty, please visit the Olympus website for your local area.

Please observe the following care instructions for your camera.

*1 As determined by Olympus pressure testing equipment in accordance with IEC Standard Publication 529 IPX8 - This means that the camera can be used normally under water at a specified water pressure.

*2 This anti-shock performance is confirmed by Olympus’ testing conditions in accordance with MIL-STD-810F, Method 516.5, Procedure IV (Transit Drop Test). For more details of Olympus’ testing conditions, please refer to the Olympus website for your local area.

Before Use:

- Check the camera for foreign material including dirt, dust or sand.
- Be sure to close and lock the battery/card cover and connector cover so that the lock makes a clicking sound. (p. 4, 5)
- Do not open the battery/card cover and connector cover with wet hands, while under water, or in a damp or dusty environment (e.g. beach).
**After Use:**
- Be sure to wipe off any excess water or debris after using the camera under water.
- **After the camera is used under seawater,** immerse the camera in a bucket containing fresh water for about 10 minutes (with the battery/card cover and connector cover firmly closed). After that, dry the camera in the shade with good ventilation.
- Water drops may be observed on the inner surface of the battery/card cover and connector cover after you open the cover. If any water drops are found, be sure to wipe them off before using the camera.

**Storage and Maintenance**
- Do not leave the camera in an environment at high temperature (40°C (104°F) or more) or at low temperature (-10°C (14°F) or less). Failure to do so may break down water resistance.
- Do not use chemicals for cleaning, rust prevention, anti-fogging, repairing, etc. Failure to do so may break down water resistance.
- **Do not leave the camera in water for a long time.** Prolonged exposure to water will cause damage to the camera’s appearance and/or deteriorate water resistance.
- In order to preserve the water resistant feature, as with any underwater housing, it is recommended that the waterproof packing (and seals) are replaced annually. For the Olympus distributors or service stations where the waterproof packing can be replaced, visit Olympus website for your local area.

⚠️ The included accessories (e.g. USB-AC adapter) do not offer shock or water resistance.

---

**SAFETY PRECAUTIONS**

⚠️ **DANGER** If the product is used without observing the information given under this symbol, serious injury or death may result.

⚠️ **WARNING** If the product is used without observing the information given under this symbol, injury or death may result.

⚠️ **CAUTION** If the product is used without observing the information given under this symbol, minor personal injury, damage to the equipment, or loss of valuable data may result.

**WARNING!** TO AVOID THE RISK OF FIRE OR ELECTRICAL SHOCK, NEVER DISASSEMBLE, EXPOSE THIS PRODUCT TO WATER OR OPERATE IN A HIGH HUMIDITY ENVIRONMENT.

---

**General Precautions**

**Read All Instructions** — Before you use the product, read all operating instructions. Save all manuals and documentation for future reference.

**Cleaning** — Always unplug this product from the wall outlet before cleaning. Use only a damp cloth for cleaning. Never use any type of liquid or aerosol cleaner, or any type of organic solvent to clean this product.

**Attachments** — For your safety, and to avoid damaging the product, use only accessories recommended by Olympus.
Water and Moisture — For precautions on products with weatherproof designs, read the weatherproofing sections.

Location — To avoid damage to the product, mount the product securely on a stable tripod, stand, or bracket.

Power Source — Connect this product only to the power source described on the product label.

Lightning — If a lightning storm occurs while using a USB-AC adapter, remove it from the wall outlet immediately.

Foreign Objects — To avoid personal injury, never insert a metal object into the product.

Heat — Never use or store this product near any heat source such as a radiator, heat register, stove, or any type of equipment or appliance that generates heat, including stereo amplifiers.

### Handling the Camera

⚠️ **WARNING**

- Do not use the camera near flammable or explosive gases.
- Do not use the flash and LED (including AF illuminator) on people (infants, small children, etc.) at close range.
  - You must be at least 1 m (3 ft.) away from the faces of your subjects. Firing the flash too close to the subject’s eyes could cause a momentary loss of vision.
- Keep young children and infants away from the camera.
  - Always use and store the camera out of the reach of young children and infants to prevent the following dangerous situations which could cause serious injury:
    - Becoming entangled in the camera strap, causing strangulation.
    - Accidentally swallowing the battery, cards or other small parts.
    - Accidentally firing the flash into their own eyes or those of another child.
    - Accidentally being injured by the moving parts of the camera.
- Do not look at the sun or strong lights with the camera.
- Do not use or store the camera in dusty or humid places.
- Do not cover the flash with a hand while firing.
- Use SD/SDHC/SDXC memory cards or Eye-Fi cards only. Never use other types of cards.
  - If you accidently insert another type of card into the camera, contact an authorized distributor or service center. Do not try to remove the card by force.
- If you find that the USB-AC adapter is extremely hot or notice any unusual odors, noise, or smoke around it, unplug the power plug from wall outlet immediately and stop using it. Then, contact an authorized distributor or service center.

⚠️ **CAUTION**

- Stop using the camera immediately if you notice any unusual odors, noise, or smoke around it.
  - Never remove the batteries with bare hands, which may cause a fire or burn your hands.
- Do not leave the camera in places where it may be subject to extremely high temperatures.
  - Doing so may cause parts to deteriorate and, in some circumstances, cause the camera to catch fire. Do not use the charger or USB-AC adapter if it is covered (such as a blanket). This could cause overheating, resulting in fire.
- Handle the camera with care to avoid getting a low-temperature burn.
  - When the camera contains metal parts, overheating can result in a low-temperature burn. Pay attention to the following:
    - When used for a long period, the camera will get hot. If you hold on to the camera in this state, a low-temperature burn may be caused.
    - In places subject to extremely cold temperatures, the temperature of the camera’s body may be lower than the environmental temperature. If possible, wear gloves when handling the camera in cold temperatures.
- Be careful with the strap.
  - Be careful with the strap when you carry the camera. It could easily catch on stray objects and cause serious damage.
- Do not touch the metallic parts of the camera for a long period of time at low temperatures.
  - This may damage your skin. At low temperatures, handle the camera while wearing gloves.
- To protect the high-precision technology contained in this product, never leave the camera in the places listed below, no matter if in use or storage:
  - Places where temperatures and/or humidity are high or go through extreme changes. Direct sunlight, beaches, locked cars, or near other heat sources (stove, radiator, etc.) or humidifiers.
  - In sandy or dusty environments.
  - Near flammable items or explosives.
  - In wet places, such as bathrooms or in the rain. When using products with weatherproof designs, read their manuals as well.
  - In places prone to strong vibrations.
  - Never drop the camera or subject it to severe shocks or vibrations.
  - When attaching the camera to or removing it from a tripod, rotate the tripod screw, not the camera.
  - Before transporting the camera, remove a tripod and all other non-OLYMPUS accessories.
  - Do not touch electric contacts on cameras.
• Do not leave the camera pointed directly at the sun. This may cause lens or shutter curtain damage, color failure, ghosting on the image pickup device, or may possibly cause fires.
• Do not push or pull severely on the lens.
• Before storing the camera for a long period, remove the batteries. Select a cool, dry location for storage to prevent condensation or mold from forming inside the camera. After storage, test the camera by turning it on and pressing the shutter button to make sure that it is operating normally.
• The camera may malfunction if it is used in a location where it is subject to a magnetic/electromagnetic field, radio waves, or high voltage, such as near a TV set, microwave, video game, loud speakers, large monitor unit, TV/radio tower, or transmission towers. In such cases, turn the camera off and on again before further operation.
• Always observe the operating environment restrictions described in the camera’s manual.

## Battery Handling Precautions

Follow these important guidelines to prevent batteries from leaking, overheating, burning, exploding, or causing electrical shocks or burns.

⚠️ **DANGER**
- The camera uses a lithium ion battery specified by Olympus. Charge the battery with the specified USB-AC adapter or charger. Do not use any other USB-AC adapters or chargers.
- Never heat or incinerate batteries.
- Take precautions when carrying or storing batteries to prevent them from coming into contact with any metal objects such as jewelry, pins, fasteners, etc.
- Never store batteries where they will be exposed to direct sunlight, or subjected to high temperatures in a hot vehicle, near a heat source, etc.
- To prevent causing battery leaks or damaging their terminals, carefully follow all instructions regarding the use of batteries. Never attempt to disassemble a battery or modify it in any way, solder, etc.
- If battery fluid gets into your eyes, flush your eyes immediately with clear, cold running water and seek medical attention immediately.
- Always store batteries out of the reach of small children. If a child accidentally swallows a battery, seek medical attention immediately.
- If you cannot remove the battery from the camera, contact an authorized distributor or service center. Do not try to remove the battery by force.

Damage to the battery exterior (scratches, etc.) may produce heat or an explosion.

⚠️ **WARNING**
- Keep batteries dry at all times.
- To prevent batteries from leaking, overheating, or causing a fire or explosion, use only batteries recommended for use with this product.
- Insert the battery carefully as described in the operating instructions.
- If rechargeable batteries have not been recharged within the specified time, stop charging them and do not use them.
- Do not use a battery if it is cracked or broken.
- If a battery leaks, becomes discolored or deformed, or becomes abnormal in any other way during operation, stop using the camera.
- If a battery leaks fluid onto your clothing or skin, remove the clothing and flush the affected area with clean, running cold water immediately. If the fluid burns your skin, seek medical attention immediately.
- Never subject batteries to strong shocks or continuous vibration.

⚠️ **CAUTION**
- Before loading, always inspect the battery carefully for leaks, discoloration, warping, or any other abnormality.
- The battery may become hot during prolonged use. To avoid minor burns, do not remove it immediately after using the camera.
- Always unload the battery from the camera before storing the camera for a long period.
- This camera uses one Olympus lithium ion battery (LI-50B). No other type of batteries can be used. There is a risk of explosion if the battery is replaced with the incorrect battery type.
- Power consumption by the camera varies depending on which functions are used.
- During the conditions described below, power is consumed continuously and the battery becomes exhausted quickly.
  - The zoom is used repeatedly.
  - The shutter button is pressed halfway repeatedly in shooting mode, activating the auto focus.
  - A picture is displayed on the monitor for an extended period of time.
  - The camera is connected to a printer.
  - Using an exhausted battery may cause the camera to turn off without displaying the battery level warning.
  - The Olympus lithium ion battery is designed to be used only for the Olympus digital camera. Do not use the battery to other devices.
• If the battery’s terminals get wet or greasy, camera contact failure may result. Wipe the battery well with a dry cloth before use.
• Always charge a battery when using it for the first time, or if it has not been used for a long period.
• When operating the camera with battery power at low temperatures, try to keep the camera and spare battery as warm as possible. A battery that has run down at low temperatures may be restored after it is warmed at room temperature.
• Before going on a long trip, and especially before traveling abroad, purchase extra batteries. A recommended battery may be difficult to obtain while traveling.
• When storing the battery for a long period, select a cool location for storage.
• Please recycle batteries to help save our planet’s resources. When you throw away dead batteries, be sure to cover their terminals and always observe local laws and regulations.

## USB-AC adapter

• The included USB-AC adapter F-2AC is designed to be used only with this camera. Other cameras cannot be charged with this USB-AC adapter.
• Do not connect the included USB-AC adapter F-2AC to equipment other than this camera.
• For plug-in type USB-AC adapter:
The included USB-AC adapter F-2AC is intended to be correctly orientated in a vertical or floor mount position.

## Use Only Dedicated Rechargeable Battery, Battery Charger and USB-AC adapter

We strongly recommend that you use only the genuine Olympus dedicated rechargeable battery, battery charger and USB-AC adapter with this camera. Using a non-genuine rechargeable battery, battery charger and/or USB-AC adapter may result in fire or personal injury due to leakage, heating, ignition or damage to the battery. Olympus does not assume any liability for accidents or damage that may result from the use of a battery, battery charger and/or USB-AC adapter that are not genuine Olympus accessories.

## Monitor

• Do not push the monitor forcibly; otherwise the image may become vague, resulting in a playback mode failure or damage to the monitor.
• A strip of light may appear on the top/bottom of the monitor, but this is not a malfunction.
• When a subject is viewed diagonally in the camera, the edges may appear zigzagged on the monitor. This is not a malfunction; it will be less noticeable in playback mode.
• In places subject to low temperatures, the monitor may take a long time to turn on or its color may change temporarily. When using the camera in extremely cold places, it is a good idea to occasionally place it in a warm place. The monitor exhibiting poor performance due to low temperatures will recover in normal temperatures.
• The monitor of this product is manufactured with high-quality accuracy, however, there may be a stuck or dead pixel on the monitor. These pixels do not have any influence on the image to be saved. Because of the characteristics, the unevenness of the color or brightness may also be found depending on the angle, but this is due to the structure of the monitor. This is not a malfunction.

## Legal and Other Notices

• Olympus makes no representations or warranties regarding any damages, or benefit expected by using this unit lawfully, or any request from a third person, which are caused by the inappropriate use of this product.
• Olympus makes no representations or warranties regarding any damages or any benefit expected by using this unit lawfully which are caused by erasing picture data.

## Disclaimer of Warranty

• Olympus makes no representations or warranties, either expressed or implied, by or concerning any content of these written materials or software, and in no event shall be liable for any implied warranty of merchantability or fitness for any particular purpose or for any consequential, incidental or indirect damages (including but not limited to damages for loss of business profits, business interruption and loss of business information) arising from the use or inability to use these written materials or software or equipment. Some countries do not allow the exclusion or limitation of liability for consequential or incidental damages or of the implied warranty, so the above limitations may not apply to you.
• Olympus reserves all rights to this manual.
Warning

Unauthorized photographing or use of copyrighted material may violate applicable copyright laws. Olympus assumes no responsibility for unauthorized photographing, use or other acts that infringe upon the rights of copyright owners.

FCC Notice

• Radio and Television Interference
• Changes or modifications not expressly approved by the manufacturer may void the user's authority to operate this equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.
• This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.
• However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
  • Adjust or relocate the receiving antenna.
  • Increase the distance between the camera and receiver.
  • Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
  • Consult your dealer or an experienced radio/TV technician for help. Only the OLYMPUS-supplied USB cable should be used to connect the camera to USB enabled personal computers (PC).

Any unauthorized changes or modifications to this equipment would void the user’s authority to operate it.

For customers in North and South America

For customers in USA

Declaration of Conformity
Model Number: TG-625
Trade Name: OLYMPUS
Responsible Party: OLYMPUS IMAGING AMERICA INC.
Address: 3500 Corporate Parkway, P.O. Box 610, Center Valley, PA 18034-0610, U.S.A.
Telephone Number: 484-896-5000

Tested To Comply With FCC Standards
FOR HOME OR OFFICE USE

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference.
(2) This device must accept any interference received, including interference that may cause undesired operation.

For customers in CANADA

This Class B digital apparatus complies with Canadian ICES-003.
OLYMPUS WORLDWIDE LIMITED WARRANTY - IMAGING PRODUCTS

Olympus warrants that the enclosed Olympus® imaging product(s) and related Olympus® accessories (individually a “Product” and collectively the “Products”) will be free from defects in materials and workmanship under normal use and service for a period of one (1) year from the date of purchase. If any Product proves to be defective within the one-year warranty period, the customer must return the defective Product to any of Olympus Service Centers, following the procedure set forth below (See “WHAT TO DO WHEN SERVICE IS NEEDED”).

Olympus, at its sole discretion, will repair, replace, or adjust the defective Product, provided that Olympus investigation and factory inspection disclose that (a) such defect developed under normal and proper use and (b) the Product is covered under this limited warranty. Repair, replacement, or adjustment of defective Products shall be Olympus’s sole obligation and the customer’s sole remedy hereunder.

The customer is liable and shall pay for shipment of the Products to the Olympus Service Center. Olympus shall not be obligated to perform preventive maintenance, installation, deinstallation, or maintenance. Olympus reserves the right to (i) use reconditioned, refurbished, and/or serviceable used parts (that meet Olympus’s quality assurance standards) for warranty or any other repairs and (ii) make any internal or external design and/or feature changes on or to its products without any liability to incorporate such changes on or to the Products.

WHAT IS NOT COVERED BY THIS LIMITED WARRANTY

Excluded from this limited warranty and not warranted by Olympus in any fashion, either express, implied, or by statute, are:

(a) products and accessories not manufactured by Olympus and/or not bearing the “OLYMPUS” brand label (the warranty coverage for products and accessories of other manufacturers, which may be distributed by Olympus, is the responsibility of the manufacturers of such products and accessories in accordance with the terms and duration of such manufacturers’ warranties);

(b) any Product which has been disassembled, repaired, tampered with, altered, changed, or modified by persons other than Olympus’s own authorized service personnel unless repair by others is made with the written consent of Olympus;

(c) defects or damage to the Products resulting from wear, tear, misuse, abuse, negligence, sand, liquids, impact, improper storage, nonperformance of scheduled operator and maintenance items, battery leakage, use of non-“OLYMPUS” brand accessories, consumables, or supplies, or use of the Products in combination with non-compatible devices;

(d) software programs;

(e) supplies and consumables (including but not limited to lamps, ink, paper, film, prints, negatives, cables and batteries); and/or

(f) Products which do not contain a validly placed and recorded Olympus serial number, unless they are a model on which Olympus does not place and record serial numbers.
EXCEPT FOR THE LIMITED WARRANTY SET FORTH ABOVE, OLYMPUS MAKES NO AND DISCLAIMS ALL OTHER REPRESENTATIONS, GUARANTEES, CONDITIONS, AND WARRANTIES CONCERNING THE PRODUCTS, WHETHER DIRECT OR INDIRECT, EXPRESS OR IMPLIED, OR ARISING UNDER ANY STATUTE, ORDINANCE, COMMERCIAL USAGE OR OTHERWISE, INCLUDING BUT NOT LIMITED TO ANY WARRANTY OR REPRESENTATION AS TO THE SUITABILITY, DURABILITY, DESIGN, OPERATION, OR CONDITION OF THE PRODUCTS (OR ANY PART THEREOF) OR THE MERCHANTABILITY OF THE PRODUCTS OR THEIR FITNESS FOR A PARTICULAR PURPOSE, OR RELATING TO THE INFRINGEMENT OF ANY PATENT, COPYRIGHT, OR OTHER PROPRIETARY RIGHT USED OR INCLUDED THEREIN.

IF ANY IMPLIED WARRANTIES APPLY AS A MATTER OF LAW, THEY ARE LIMITED IN DURATION TO THE LENGTH OF THIS LIMITED WARRANTY.

SOME STATES MAY NOT RECOGNIZE A DISCLAIMER OR LIMITATION OF WARRANTIES AND/OR LIMITATION OF LIABILITY SO THE ABOVE DISCLAIMERS AND EXCLUSIONS MAY NOT APPLY.

THE CUSTOMER MAY ALSO HAVE DIFFERENT AND/OR ADDITIONAL RIGHTS AND REMEDIES THAT VARY FROM STATE TO STATE.

THE CUSTOMER ACKNOWLEDGES AND AGREES THAT OLYMPUS SHALL NOT BE RESPONSIBLE FOR ANY DAMAGES THAT THE CUSTOMER MAY INcur FROM DELAYED SHIPMENT, PRODUCT FAILURE, PRODUCT DESIGN, SELECTION, OR PRODUCTION, IMAGE OR DATA LOSS OR IMPAIRMENT OR FROM ANY OTHER CAUSE, WHETHER LIABILITY IS ASSERTED IN CONTRACT, TORT (INCLUDING NEGLIGENCE AND STRICT PRODUCT LIABILITY) OR OTHERWISE. IN NO EVENT SHALL OLYMPUS BE LIABLE FOR ANY INDIRECT, INCIDENTAL, CONSEQUENTIAL OR SPECIAL DAMAGES OF ANY KIND (INCLUDING WITHOUT LIMITATION LOSS OF PROFITS OR LOSS OF USE), WHETHER OR NOT OLYMPUS SHALL BE OR SHOULD BE AWARE OF THE POSSIBILITY OF SUCH POTENTIAL LOSS OR IMPAIRMENT.

Representations and warranties made by any person, including but not limited to dealers, representatives, salespersons, or agents of Olympus, which are inconsistent or in conflict with or in addition to the terms of this limited warranty, shall not be binding upon Olympus unless reduced to writing and approved by an expressly authorized officer of Olympus.

This limited warranty is the complete and exclusive statement of warranty which Olympus agrees to provide with respect to the Products and it shall supersede all prior and contemporaneous oral or written agreements, understandings, proposals, and communications pertaining to the subject matter hereof.

This limited warranty is exclusively for the benefit of the original customer and cannot be transferred or assigned.

WHAT TO DO WHEN SERVICE IS NEEDED

The customer must transfer any image or other data saved on a Product to another image or data storage medium and/or remove any film from the Product prior to sending the Product to Olympus for service.

IN NO EVENT SHALL OLYMPUS BE RESPONSIBLE FOR SAVING, KEEPING OR MAINTAINING ANY IMAGE OR DATA SAVED ON A PRODUCT RECEIVED BY IT FOR SERVICE, OR ON ANY FILM CONTAINED WITHIN A PRODUCT RECEIVED BY IT FOR SERVICE, NOR SHALL OLYMPUS BE RESPONSIBLE FOR ANY DAMAGES IN THE EVENT ANY IMAGE OR DATA IS LOST OR IMPAIRED WHILE SERVICE IS BEING PERFORMED (INCLUDING, WITHOUT LIMITATION, DIRECT, INDIRECT, INCIDENTAL, CONSEQUENTIAL OR SPECIAL DAMAGES, LOSS OF PROFITS OR LOSS OF USE), WHETHER OR NOT OLYMPUS SHALL BE OR SHOULD BE AWARE OF THE POSSIBILITY OF SUCH POTENTIAL LOSS OR IMPAIRMENT.

Package the Product carefully using ample padding material to prevent damage in transit and either deliver it to the Authorized Olympus Dealer that sold you the Product or ship it postage prepaid and insured to any of our Olympus Service Centers.

When returning Products for service, your package should include the following:

1. Sales receipt showing date and place of purchase.
2. Copy of this limited warranty bearing the Product serial number corresponding to the serial number on the Product (unless it is a model on which Olympus does not place and record serial numbers).
3. A detailed description of the problem.
4. Sample prints, negatives, digital prints (or files on disk) if available and related to the problem.

When service is completed, the Product will be returned to you postage prepaid.
WHERE TO SEND PRODUCT FOR SERVICE
See “WORLDWIDE WARRANTY” for the nearest service center.

INTERNATIONAL WARRANTY SERVICE
International warranty service is available under this warranty.

For customers in Europe

“CE” mark indicates that this product complies with the European requirements for safety, health, environment and customer protection. “CE” mark cameras are intended for sales in Europe.

This symbol [crossed-out wheeled bin WEEE Annex IV] indicates separate collection of waste electrical and electronic equipment in the EU countries.
Please do not throw the equipment into the domestic refuse.
Please use the return and collection systems available in your country for the disposal of this product.

This symbol [crossed-out wheeled bin Directive 2006/66/EC Annex II] indicates separate collection of waste batteries in the EU countries.
Please do not throw the batteries into the domestic refuse. Please use the return and collection systems available in your country for the disposal of the waste batteries.

Provisions of warranty
1. If this product proves to be defective, although it has been used properly (in accordance with the written Handling Care and Operating instructions supplied with it), during the applicable national warranty period and has been purchased from an authorized Olympus distributor within the business area of Olympus Europa Holding GmbH as stipulated on the website: http://www.olympus.com this product will be repaired, or at Olympus’s option replaced, free of charge. To claim under this warranty the customer must take the product before the end of the applicable national warranty period to the dealer where the product was purchased or any other Olympus service station within the business area of Olympus Europa Holding GmbH as stipulated on the website: http://www.olympus.com. During the one year period of the World Wide Guarantee the customer may turn the product in at any Olympus service station. Please notice that not in all countries such Olympus service station exists.

2. The customer shall transport the product to the dealer or Olympus authorized service station at his own risk and shall be responsible for any costs incurred in transporting the product.

Provisions of Guarantee
1. “OLYMPUS IMAGING CORP., Shinjuku Monolith, 2-3-1 Nishi-Shinjuku, Shinjuku-ku, Tokyo 163-0914, Japan grants a one year World Wide Guarantee. This worldwide Guarantee must be presented at an Olympus authorized repair service station before any repair can be made under conditions of this Guarantee. This Guarantee is valid only if the Guarantee Certificate and proof of purchase are presented at the Olympus repair service station. Please note that this Guarantee is in addition to and does not affect the customer’s legal warranty rights under the applicable national legislation governing the sale of consumer goods mentioned above.

2. This Guarantee does not cover the following and the customer will be required to pay repair charge, even for defects occurring within the Guarantee period referred to above.
   a. Any defect that occurs due to mishandling (such as an operation performed that is not mentioned in the Handling Care or other sections of the instructions, etc.)
   b. Any defect that occurs due to repair, modification, cleaning, etc. performed by anyone other than Olympus or an Olympus authorized service station.
   c. Any defect or damage that occurs due to transport, a fall, shock, etc. after purchase of the product.
   d. Any defect or damage that occurs due to fire, earthquake, flood damage, thunderbolt, other natural disasters, environmental pollution and irregular voltage sources.
e. Any defect that occurs due to careless or improper storage (such as keeping the product under conditions of high temperature and humidity, near insect repellents such as naphthalene or harmful drugs, etc.), improper maintenance, etc.
f. Any defect that occurs due to exhausted batteries, etc.
g. Any defect that occurs due to sand, mud, etc. entering the inside of the product casing.
h. When the Guarantee Certificate is not returned with the product.
i. When any alterations whatsoever are made to the Guarantee Certificate regarding the year, month and date of purchase, the customer’s name, the dealer’s name, and the serial number.
j. When proof of purchase is not presented with this Guarantee Certificate.

3 This Guarantee applies to the product only; the Guarantee does not apply to any other accessory equipment, such as the case, strap, lens cap and batteries.

4 Olympus’s sole liability under this Guarantee shall be limited to repairing or replacing the product. Any liability under the Guarantee for indirect or consequential loss or damage of any kind incurred or suffered by the customer due to a defect of the product, and in particular any loss or damage caused to any lenses, films, other equipment or accessories used with the product or for any loss resulting from a delay in repair or loss of data, is excluded. Compelling regulations by law remain unaffected by this.

Notes regarding Guarantee maintenance
1 This Guarantee will only be valid if the Guarantee Certificate is duly completed by Olympus or an authorized dealer or other documents contain sufficient proof. Therefore, please make sure that your name, the name of the dealer, the serial number and the year, month and date of purchase are all completed or the original invoice or the sales receipt (indicating the dealer’s name, the date of purchase and product type) is attached to this Guarantee Certificate. Olympus reserves the right to refuse free-of-charge service if neither Guarantee Certificate is completed nor the above document is attached or if the information contained in it is incomplete or illegible.

2 Since this Guarantee Certificate will not be re-issued, keep it in a safe place.

* Please refer to the list on the web site: http://www.olympus.com for the authorized international Olympus service network.

For customers in Asia

Provisions of warranty
1 If this product proves to be defective, although it has been used properly (in accordance with the written Handling Care and Operating instructions supplied with it), during a period of up to one year from the date of purchase this product will be repaired, or at Olympus’s option replaced, free of charge. To claim under warranty the customer must take the product and this Warranty certificate before the end of the one year warranty period to the dealer where the product was purchased or any Olympus authorized service station listed in the instructions and request the necessary repairs.

2 The customer shall transport the product to the dealer or Olympus authorized service station at his own risk and shall be responsible for any costs incurred in transporting the product.

3 This warranty does not cover the following and the customer will be required to pay repair charge, even for defects occurring within the one year period referred to above.

a. Any defect that occurs due to mishandling (such as an operation performed that is not mentioned in the Handling Care or other sections of the instructions, etc.)
b. Any defect that occurs due to repair, modification, cleaning, etc. performed by anyone other than Olympus or an Olympus authorized service station.
c. Any defect or damage that occurs due to transport, a fall, shock, etc. after purchase of the product.
d. Any defect or damage that occurs due to fire, earthquake, flood damage, thunderbolt, other natural disasters, environmental pollution and irregular voltage sources.
e. Any defect that occurs due to careless or improper storage (such as keeping the product under conditions of high temperature and humidity, near insect repellents such as naphthalene or harmful drugs, etc.), improper maintenance, etc.
f. Any defect that occurs due to exhausted batteries, etc.
g. Any defect that occurs due to sand, mud, etc. entering the inside of the product casing.
h. When this Warranty Certificate is not returned with the product.
i. When any alterations whatsoever are made to the Warranty Certificate regarding the year, month and date of purchase, the customer’s name, the dealer’s name, and the serial number.
j. When proof of purchase is not presented with this Warranty Certificate.
This Warranty applies to the product only; the Warranty does not apply to any other accessory equipment, such as the case, strap, lens cap and batteries.

Olympus' sole liability under this warranty shall be limited to repairing or replacing the product and any liability for indirect or consequential loss or damage of any kind incurred or suffered by the customer due to a defect in the product, and in particular any loss or damage caused to any film or lenses or other equipment or accessories used with the product or for any loss resulting from delay in repair, is excluded.

Notes:
1. This Warranty is in addition to and does not affect the customer’s statutory right.
2. If you have any queries regarding this Warranty, call any of the Olympus authorized service stations listed in the instructions.

Notes regarding warranty maintenance
1. This Warranty will only be valid if the Warranty Certificate is duly completed by Olympus or the dealer. Make sure that your name, the name of the dealer, the serial number and the year, month and date of purchase are all completed.
2. Since this Warranty Certificate will not be re-issued, keep it in a safe place.
3. Any request for repair by a customer in same country where the product was purchased shall be subject to the terms of the warranty issued by the Olympus distributor in that country. Where the local Olympus distributor does not issue a separate warranty or where the customer is not in the country where the product was purchased the terms of this worldwide warranty shall apply.
4. Where applicable, this Warranty is valid worldwide. The Olympus authorized service stations listed in this Warranty will gladly honor it.

* Please refer to the appended list for the authorized international Olympus service network.

Disclaimer of Warranty
Olympus makes no representations or warranties, either expressed or implied, by or concerning any content if these written materials or software, and in no event shall be liable for any implied warranty of merchantability or fitness for any particular purpose or for any consequential, incidental or indirect damages (including but not limited to damages for loss of business profits, business interruption and loss of business information) arising from the use of inability to use these written materials or software. Some states do not allow the exclusion or limitation of liability for consequential or incidental damages, so the above limitations may not apply to you.
