UNPACKING THE BOX CONTENTS
Gather your Digital camera and the parts as shown in the illustration. You'll need these to complete the steps for the camera set-up procedures that follow.

PREPARING THE CAMERA FOR USE
Before you begin using your Olympus Digital camera...

a. Charging the battery (LI-10B)
The battery is not fully charged when purchased. Before use, be sure to charge the battery with the specified provided charger (LI-10C).

b. Inserting the battery and xD-Picture card
1) Make sure the camera is turned off.
2) Slide the battery/card cover in the direction of h.
3) Orient the battery correctly, and insert it until it is locked by the battery lock.
4) Face the card the correct way and insert it into the card slot.
5) Close the battery/card cover in direction d then slide it in direction e.

C. Attaching the strap and lens cap string
Attach the lens cap string and strap to the strap eyelets on each side of the camera as illustrated. Attaching the strap to the camera makes it easier to handle.

3 TURNING ON THE CAMERA
The camera Mode dial is used to select the various operation modes.

a. Turning the camera ON (SHOOTING MODE)
• Remove the lens cap.
• Set the mode dial to a. Turn the power switch to the ON position. The lens extends and the monitor turns on.
• To turn the camera off, turn the power switch to the OFF position.

b. Setting the Date and Time (OPTIONAL)
Set the date and time before using the camera for the first time. This affects the way image file names are created, and will conveniently include this information with each picture.
• Set the mode dial to b. and turn the power switch to the ON position.
• Press c. The top menu is displayed.
• Press d to select e.
• Use f and g to select the date format.
• Adjust the date and time in the appropriate fields by using h and i to select the field, and j and k to set the proper value. Repeat this step until all date/time fields have been set.
• Note: Time is entered using the 24-hour format.
• Press l to set the date and time and exit the menu.

C. Camera Diagram and Controls
Now take a moment to familiarize yourself with the key areas of camera controls by reviewing the illustrations.
TAKING PICTURES

There are two ways to compose your subject: using the monitor or with the viewfinder. Depending upon the shooting situation, there may be advantages to each method. Please refer to the print manual for more information.

a. Taking a Picture
- Set the mode dial to and turn the power switch to the ON position. The monitor turns on.
- Compose your subject in the viewfinder or on the monitor.

Icons representing camera settings appear on the monitor, telling you important information such as the flash and record modes, battery charge, and the number of storable still pictures.
- Press the shutter button halfway.

b. Zooming
This Digital Camera features a zoom lens, allowing you to get closer to action, capture wide-angle shots and get everything into the picture.
- Push the zoom lever toward to zoom out and get everything into the picture.
- Pull the zoom lever toward to choose telephoto shooting and get closer to the action.

C. Flash Modes
This Digital Camera features multiple flash modes. Please note that not all flash modes are available depending on the shooting mode selected.
- Press the button to cycle through the flash modes:

<table>
<thead>
<tr>
<th>Flash Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Auto-Flash (AF)</td>
<td>The camera automatically decides if the flash is needed.</td>
</tr>
<tr>
<td>Red-eye</td>
<td>Reduces incidence of red eye by enabling pre-flashes to strike pupil just before firing the main flash. The strobe effect is normal operation for the mode.</td>
</tr>
<tr>
<td>Fill-in</td>
<td>The flash always fires with every picture.</td>
</tr>
<tr>
<td>SLOW1, SLOW2, SLOW3</td>
<td>Adjusts the flash for special situations requiring slow synchronization.</td>
</tr>
<tr>
<td>Flash-Off</td>
<td>Turns the flash off for times when flash photography is prohibited or not desired. The flash never fires.</td>
</tr>
</tbody>
</table>

With the shutter button depressed halfway, the flash is ready to fire when the or the orange lamp next to the viewfinder lights steadily. When the or the orange lamp is blinking, the flash is charging.

d. Number of Storable Pictures
Your digital camera can handle xD-Picture Card from 16 MB to 512 MB. The number of storable pictures depends on the image quality selected.

Viewing Pictures
With a Digital Camera, you can easily view the photos you want—and delete the ones you don’t.

a. Viewing Pictures
There are two ways to access the Playback mode:
- Set the mode dial to (playback mode) and turn the power switch to the ON position.
- If the camera is in the shooting mode with the lens barrel extended, press the QUICK VIEW button.

The last picture taken appears in the monitor. Use (Q) to scroll through all the images saved on your xD-Picture Card.
- Turn the camera off.
- To return to the shooting mode, press the QUICK VIEW button again.

b. Erasing Pictures
The beauty of digital photography is your ability to keep the photos you want, delete the rest, and reuse empty memory space to take new pictures. This Digital Camera offers two ways to permanently erase unwanted digital photos:

Single-Frame Erase: Deletes only the picture currently displayed in the monitor.
- Press to select YES, then press .

Once erased, pictures cannot be restored.
- Set the mode dial to (playback mode) and turn the power switch to the ON position.
- Use the arrow pad to display the picture you want to erase.
- Press .
- Use (Q) to select YES, then press .

All-Frame Erase: Deletes all pictures on the xD-Picture Card in one operation, except for pictures you have protected.
- Press , then press to select MODE MENU.
- Use (Q) to select the CARD tab, then press twice to access the CARD SETUP screen.
- ALL ERASE should be highlighted. Press .
- As a safeguard, the Digital Camera will ask you to select YES or NO to confirm erasing, as this process permanently deletes all unprotected pictures. Select YES and press .

Tips:
- Images can also be erased while in the “QUICK VIEW” mode described in step 5. This makes it easy to quickly erase a picture that you just took.
- To find out how many times you have left, look for the number in the lower right corner. Remember, you can always delete unwanted pictures to make room for more. (See Step 5.)

CONNECTING THE CAMERA TO A COMPUTER

To download pictures from the camera, view, organize, retouch and print your digital photos and movies:
- Olympus recommends using the optional AC adapter to ensure a consistent power supply when downloading images.

Make sure that the camera is turned off before connecting it to your computer.
- Windows 98 users must install the “USB Driver for Windows 98” software before connecting the Digital Camera to the computer.
- Refer to the Software Installation Guide for complete information.

Olympus makes it simple to connect the Digital Camera to your computer.
- Turn the camera off.
- Plug the supplied USB cable into the USB connector on your camera and computer as illustrated at right.
- Set the mode dial to and turn the power switch to the ON position. The camera starts communicating with the PC.
- Open the software before connecting the camera.
