QuickStart Guide
C-5060 Wide Zoom

UNPACKING THE BOX CONTENTS
Gather your Digital camera and all the parts as shown in the illustration. You’ll need these to complete the steps for the camera set-up procedures.

PREPARING THE CAMERA FOR USE
Before you begin using your Olympus Digital camera...

- Charging the battery
  - The battery is not fully charged when purchased. Before use, be sure to charge the battery with the specified provided charger (BCM-2).
  - Hold the battery with its terminals facing the charger and align the battery with the guideline on the charger as shown in the illustration.
  - Close the battery compartment cover and slide the battery compartment lock from the OFF position to the ON position.

- Setting the Date and Time (OPTIONAL)
  - Set the date and time before using the camera for the first time. This affects the way image file names are created, and will conveniently include this information with each picture.
  - Press (2) to select the SETUP tab, then press (3).
  - Use (4) to select the SETTIME tab, then press (3).
  - Use (4) to enter the date format.
  - Adjust the date and time in the appropriate fields by using (4) to select the field, and (2) to set the proper value.
  - Repeat this step until all date/time fields have been set.

- Loading the battery
  - Insert the BLM-1 lithium ion battery into the compartment as indicated with the guideline on the charger as shown in the illustration.
  - Press ac to set the proper value.

- Attaching the strap and lens cap string (OPTIONAL)
  - Attach the lens cap string and strap to the strap eyelets on each side of the camera as illustrated. Attaching the strap to the camera makes it easier to handle.

TURNING THE CAMERA ON
The camera Mode dial is used to select the various operation modes.

- Turning the camera ON (SHOOTING MODE)
  - Remove the lens cap.
  - Pull the monitor out and rotate it.
  - Align P with the red line. Turn the power switch to ON. The lens extends and the monitor turns on.
  - To turn the camera off, turn the power switch to OFF.

- Setting the Date and Time (OPTIONAL)
  - Set the date and time before using the camera for the first time. This affects the way image file names are created, and will conveniently include this information with each picture.
  - Press (2) to select the SETUP tab, then press (3).
  - Use (4) to select the SETTIME tab, then press (3).
  - Use (4) to enter the date format.
  - Adjust the date and time in the appropriate fields by using (4) to select the field, and (2) to set the proper value.
  - Repeat this step until all date/time fields have been set.

- Camera Diagram and Controls
  - Take a moment to familiarize yourself with the key areas of camera controls by reviewing the illustrations.

CAMERA SETTINGS IN SHOOTING MODE as shown in Monitor
CAMERA SETTINGS IN PLAYBACK MODE as shown in Monitor

For more detailed instructions on advanced features, please refer to the printed Basic Manual included in your package, or the Reference Manual on the CD-ROM.
**TAKING PICTURES**

There are a few ways to compose your subject: using the zoom, monitor, or viewfinder. Depending upon the shooting situation, there may be advantages to each method. Please refer to the Printed Basic Manual for more information.

**a. Taking a Picture with the Monitor**

- **Pull the monitor out and rotate it.**
- **Set the mode dial to P and turn the power switch to ON.**
- **Compose your subject on the monitor.**

The Digital camera confirms the focus and exposure are properly set when the green lamp lights steadily. The $\text{\textbullet}$ indicator informs you that the flash is recommended and/or recharging (when blinking); or ready to fire (when steady).

**b. Taking a Picture with the Viewfinder**

- **Set the mode dial to P and turn the power switch to ON.**
- **Compose your subject on the Viewfinder.**

- **Press the shutter button halfway.**
- **Press the shutter button gently (halfway) to adjust the focus.**
- **Press the shutter button completely to take the picture.**

A short beep confirms your picture has been taken.

**c. Zooming**

This Digital camera features a zoom lens, allowing you to get closer to the action, or for taking wide-angle shots that get everything into the picture.

- **Push the zoom lever toward W to zoom out and get everything into the picture.**
- **Push the zoom lever toward T to choose telephoto shooting and get closer to the action.**

**b. Flash Modes**

This Digital camera features multiple flash modes. Please note that not all flash modes are available depending on the shooting mode selected.

Set the flash mode by turning the control dial while holding down $\text{\textbullet}$:

<table>
<thead>
<tr>
<th>Icon</th>
<th>Flash Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>$\text{\textbullet}$</td>
<td>Auto-flash</td>
<td>The camera automatically decides if the flash is needed.</td>
</tr>
<tr>
<td>$\text{\textbullet}$</td>
<td>Red-eye Reduction</td>
<td>Reduces incidence of red-eye by emitting pre-flashes before firing the main flash.</td>
</tr>
<tr>
<td>$\text{\textbullet}$</td>
<td>Fill-in Flash</td>
<td>The flash fires with every picture.</td>
</tr>
</tbody>
</table>

With the shutter button depressed halfway, the flash is ready to fire when the $\text{\textbullet}$ in the monitor or the orange lamp next to the viewfinder lights steadily. When $\text{\textbullet}$ or the orange lamp blinks, the flash is charging.

**e. Number of Storable Pictures**

Your digital camera can handle xD-Picture Card from 16 MB to 512 MB. The number of storable pictures depends on the image quality selected. See the Reference Manual for complete descriptions of each recording mode and the storable frame capacity for the various resolution modes and xD-Picture Card capacities.

**VIEWING AND ERASING PICTURES**

With a Digital camera, you can easily view the photos you want—and delete the ones you don’t.

**a. Viewing Pictures**

There are two ways to access the Playback mode:

- **Set the mode dial to $\text{\textbullet}$ and turn the power switch to ON.**
- **OR**
- **If the camera is in the shooting mode with the lens barrel extended, press the QUICK VIEW button.**

The last picture taken appears in the monitor. Use $\text{\textbullet}$ to scroll through all the images saved on your xD-Picture Card.

When you are finished reviewing your pictures:

- **Turn the power switch to OFF to turn the monitor off.**
- **OR**
- **To return to the shooting mode, press the QUICK VIEW button again.**

**b. Erasing Pictures**

The beauty of digital photography is your ability to keep the photos you want, delete the rest, and reuse memory space to take new pictures. This Digital camera offers two ways to permanently erase unwanted digital photos:

- **Single-Frame Erase**: Deletes only the picture currently displayed in the monitor.
- **All-Frame Erase**: Deletes all pictures on the xD-Picture Card in one operation, except for pictures you have protected.

**Connecting the Camera to a Computer**

Olympus recommends using the optional AC adapter to ensure a consistent power supply when downloading images.

Make sure that the camera is turned off before connecting it to your computer.

Windows 98 users must install the “USB Driver for Windows 98” software before connecting the Digital camera to the computer. Refer to the Software Installation Guide for complete information.

Olympus makes it simple to connect the Digital camera to your computer.

**Installing the Camera Software**

You’ve now mastered the basic functionality of your new Olympus Digital Camera! You are now ready to begin exploring the possibilities that digital photography brings to your computer. Activities such as photo editing, printing, and more are only a few steps away!

About the Olympus CAMEDIA Master CD-ROM

Your Olympus Digital Camera comes bundled with a suite of software and documentation. The CD includes:

- **CAMEDIA Master**: To download pictures from the camera, view, organize, relabel, and print your digital photos and movies.
- **USB Driver for Windows 98**: This utility must be installed to allow the camera to communicate with your computer if you use the Microsoft Windows 98 operating system.

You are now ready to install the computer software.

Open the CAMEDIA Master CD-ROM package and locate the Software Installation Guide in the language you wish to use.

Follow the step-by-step instructions for installing the software, and enjoy your new digital photo processing capabilities.
