QuickStart Guide
C-760 Ultra Zoom

UNPACKING THE BOX CONTENTS
Gather your Digital camera and the parts as shown in the illustration. You'll need these to complete the steps for the camera set-up procedures that follow.

PREPARING THE CAMERA FOR USE
Before you begin using your Olympus Digital camera...

a. Charging the battery (LI-10B)
The battery is not fully charged when purchased. Before use, be sure to charge the battery with the specified provided charger (LI-10C). Make sure that the + and - terminals of the battery shown in the illustration in the right are correctly oriented when loading the battery into the charger.

b. Inserting the battery and xD-Picture card
1) Make sure the camera is turned off.
   • The monitor is off.
   • The viewfinder is off.
   • The lens is not extended.

2) Slide the battery compartment/card cover in the direction of the arrow. As the battery emerges, hold it straight and pull it out completely.

3) Orient the battery correctly, and insert it until it is locked by the battery lock. To remove the battery, slide the battery lock in the direction of the arrow. As the battery emerges, hold it straight and pull it out completely.

4) Close the battery compartment/card cover in the direction of the arrow.

C. Attaching the strap and lens cap string
Attach the lens cap string and strap to the strap eyelets on each side of the camera as illustrated. Attaching the strap to the camera makes it easier to handle.

TURNING ON THE CAMERA
The camera Mode dial is used to select the various operation modes.

a. Turning the camera ON (SHOOTING MODE)
   • Press the tabs on the lens cap to remove it.
   • Set the mode dial to P. Press the power switch to turn the camera on.
   • Set the mode dial to M. Press the power switch to turn the camera off.
   • Press the power switch again.

b. Setting the Date and Time (OPTIONAL)
Set the date and time before using the camera for the first time. This affects the way image file names are created, and will conveniently include this information with each picture.
   • Set the mode dial to P and press the power switch to turn the camera on.
   • Press (2) on the arrow pad to select MODE MENU.
   • Press 0 to select the SETUP tab, then press (2).
   • Press 0 to select (2), then press (2).
   • Use 0 to select the date format.
   • Adjust the date and time in the appropriate fields by using 0 to select the field, and 0 to set the proper value.
   • Repeat this step until all date/time fields have been set.
   • Note: Time is entered using the 24-hour format.
   • Press 0 twice to set the date and time and exit the menu.

C. Camera Diagram and Controls
Now take a moment to familiarize yourself with the key areas of camera controls by reviewing the illustrations.

START HERE
It is strongly recommended that you follow these step-by-step numbered instructions to set up and quickly begin using your new Digital camera.
TAKING PICTURES

There are two ways to compose your subject: using the viewfinder or the monitor. Depending upon the shooting situation, there are advantages to each method. Please refer to the printed Basic Manual for more information.

a. Taking a Picture
   - Set the mode dial to and press the power switch. The monitor turns on.
   - To shoot using the viewfinder, press to turn the viewfinder on.
   - Compose your subject in the monitor or on the viewfinder.

Icons representing camera settings appear on the monitor, telling you important information such as the Flash and record modes, battery life, and the number of frames remaining.

• Press the shutter button halfway.

The Digital camera confirms the focus and exposure are properly set when the green lamp lights steadily. The flash indicator informs you that the flash is recommended and/or recharging (when blinking), or ready to fire (when steady).

• Press the shutter button completely to take the picture. A short beep confirms your picture has been taken.

b. Zooming
   This Digital camera features a zoom lens, allowing you to get closer to action, or capture wide-angle shots and get everything into the picture.

• Pull the zoom lever toward to zoom out and get everything into the picture.
• Push the zoom lever toward to choose telephoto shooting and get closer to the action.

C. Flash Modes
   This Digital camera features multiple flash modes. Please note that not all flash modes are available depending on the shooting mode selected.

• Press the flash button to open the flash and press the button to cycle through the flash modes:

- Auto-flash:
The camera automatically decides if the flash is needed. Reduces incidence of red-eye by emitting pre-flashes.

- Slow-sync:
The flash always fires with every picture. Adjusts the flash for special situations requiring slow shutter speeds.

With the shutter button depressed halfway, the flash is ready to fire when the indicator lights. When indicator blinks, the flash is charging.

To prevent the flash from firing, press down on the top of the flash to retract it.

d. Number of Storable Pictures
   Your digital camera can handle xD-Picture Card from 16 MB to 512 MB. The number of storable pictures depends on the image quality selected. See the Reference Manual for complete descriptions of each recording mode and the storable frame capacity for xD-Picture Card.

- To find out how many frames you have left, look for the counter in the lower right corner of the monitor/viewfinder. Remember you can always delete unwanted pictures to make room for more. (See Step 1.)

VIEWING AND ERASING PICTURES

With a Digital camera, you can easily view the photos you want—and delete the ones you don’t.

a. Viewing Pictures
   There are two ways to access the Playback mode:

   - Set the mode dial to and press the power switch.
   - OR

   - If the camera is in the shooting mode with the lens barrel extended, press QUICK VIEW button.

The last picture taken appears in the monitor. Use to scroll through all the images saved on your xD-Picture Card.

b. Erasing Pictures
   Once erased, pictures cannot be restored.

   The beauty of digital photography is your ability to keep the photos you want, delete the rest, and reuse empty memory space to take new pictures. This Digital camera offers two ways to permanently erase unwanted digital photos:

   Single-Frame Erase: Deletes only the picture currently displayed in the monitor.

   - Set the mode dial to and press the power switch.
   - Use the arrow pad to display the picture you want to erase.
   - Press twice to select YES, then press .

   All-Frame Erase: Deletes all pictures on the xD-Picture Card in one operation, except for pictures you have protected.

   - Set the mode dial to and press the power switch.
   - Press f, then press d to select MODE MENU.
   - Use c+d to select the CARD tab, then press twice to access the CARD SETUP screen.
   - Press e to ALL ERASE should be highlighted. Press f.

   As a safeguard, the Digital camera will ask you to select YES or NO to confirm erasing, as this process permanently deletes all unprotected pictures. Select YES and press .

CONNECTING THE CAMERA TO A COMPUTER

Olympus recommends using the optional AC adapter to ensure a consistent power supply when downloading images.

Make sure that the camera is turned off before connecting it to your computer.

Windows 98 users must install the “USB Driver for Windows 98” software before connecting the Digital camera to the computer. Refer to the Software Installation Guide for complete information.

Olympus makes it simple to connect the Digital camera to your computer.
