QuickStart Guide
C-765 Ultra Zoom

START HERE
It is strongly recommended that you follow these step-by-step numbered instructions to set up and quickly begin using your new Digital camera.

For more detailed instructions on advanced features, please refer to the printed Basic Manual included in your package, or the Reference Manual on the CD-ROM.

PREPARING THE CAMERA FOR USE
Before you begin using your Olympus Digital camera...

a. Charging the battery (LI-10B)
The battery is not fully charged when purchased. Before use, be sure to charge the battery with the specified provided charger (LI-10C).

b. Inserting the battery and xD-Picture Card

1) Make sure the camera is turned off.
• The lens is retracted.
• The monitor is off.

2) Face the card the correct way and insert it into the card slot.

3) Close the battery compartment/card cover in the direction of the arrow. As the battery emerges, hold it straight and pull it out completely.

b. Setting the Date and Time (OPTIONAL)
Set the date and time before using the camera for the first time. This affects the way image file names are created, and will conveniently include this information with each picture.

• Press the tabs on the lens cap to remove it.
• Press twice to set the date and time and exit the menu.

C. Attaching the strap and lens cap string
Attach the lens cap string and strap to the strap eyelets on each side of the camera as illustrated. Attaching the strap to the camera makes it easier to handle.

UNPACKING THE BOX CONTENTS
Gather your digital camera and the parts as shown in the illustration. You'll need these to complete the steps for the camera setup procedures that follow.

**TAKING PICTURES**

There are two ways to compose your subject: using the viewfinder on the monitor. Depending upon the shooting situation, there are advantages to each method. Please refer to the printed Basic Manual for more information.

### a. Taking a Picture

- Set the mode dial to **Ac** and press the power switch. The monitor turns on.
- To shoot using the viewfinder, press **Q** to turn the viewfinder on.
- Compose your subject in the monitor or on the viewfinder.

The Digital camera confirms the focus and exposure are properly set when the green lamp lights steadily. The **Q** indicator informs you that the flash is recommended and/or recharging (when blinking), or ready to fire (when steady).

- Press the shutter button completely to take the picture. A short beep confirms your picture has been taken.

### b. Zooming

This Digital camera features a zoom lens, allowing you to get closer to action, or capture wide-angle shots and get everything into the picture.

- Push the zoom lever toward **W** to zoom out and get everything into the picture.
- Pull the zoom lever toward **T** to choose telephoto shooting and get closer to the action.

### c. Flash Modes

This Digital camera features multiple flash modes. Please note that not all flash modes are available depending on the shooting mode selected.

- Press the flash button to open the flash and press the **S** button to cycle through the flash modes:
  - Auto-flash
  - Red-eye Reduction Flash
  - Fill-in Flash
  - Slow Synchronization

With the shutter button depressed halfway, the flash is ready to fire when the **S** indicator lights. When **S** indicator blinks, the flash is charging.

To prevent the flash from firing, press down on the top of the flash to retract it.

**VIEWING AND ERASING PICTURES**

With a Digital camera, you can easily view the photos you want—and delete the ones you don’t.

### a. Viewing Pictures

There are two ways to access the Playback mode:

- Set the mode dial to **Ac** and press the power switch. OR
- If the camera is in the shooting mode with the lens barrel extended, press the QUICK VIEW button.

The last picture taken appears in the monitor. Use **Q,G,H,** to scroll through all the images saved on your xD-Picture Card.

### b. Erasing Pictures

**Once erased, pictures cannot be restored.**

The beauty of digital photography is your ability to keep the photos you want, delete the rest, and reuse empty memory space to take new pictures. This Digital camera offers two ways to permanently erase unwanted digital photos:

- **Single-Frame Erase:** Deletes only the picture currently displayed in the monitor.
  - Set the mode dial to **Ac** and press the power switch.
  - Use the arrow pad to display the picture you want to erase.
  - Press **Q**.
  - Press **G,0,0** to select YES, then press **E**.

- **All-Frame Erase:** Deletes all pictures on the xD-Picture Card in one operation, except for pictures you have protected.
  - Set the mode dial to **Ac** and press the power switch.
  - Press **Q**, then press **H** to select MODE MENU.
  - Use **G,0,0** to select the CARD tab, then press **E** twice to access the CARD SETUP screen.
  - Press **E,** ALL ERASE should be highlighted. Press **E**.
  - As a safeguard, the Digital camera will ask you to select YES or NO to confirm erasing, as this process permanently deletes all unprotected pictures. Select YES and press **E**.

**CONNECTING THE CAMERA TO A COMPUTER**

Olympus makes it simple to connect the Digital Camera to your computer.

- Turn the camera off.
- Plug the supplied USB cable into the USB connector on your camera and computer as illustrated on the right.
- Set the mode dial to **Ac** and press the power switch. The camera starts communicating with the PC.
- Press **Q,0,0** to select PC, and then press **E** on the USB screen. The camera starts communicating with the PC.

Make sure that the camera is turned off before connecting it to your computer.

Windows 98 users must install the “USB Driver for Windows 98” software before connecting the Digital camera to the computer. Refer to the Software Installation Guide for complete information. Olympus recommends using the optional AC adapter to ensure a consistent power supply when downloading images.
