**Attaching the strap**

1. Thread the end (small loop) of the strap through the strap eyelet.
2. Thread the rest of the strap through the small loop that you threaded through the eyelet.
3. Pull on the strap to make sure it is securely fastened.

**Loading/Unloading the battery/card**

1. Make sure the camera is turned off.
   - The lens barrier is closed.
   - The green lamp is off.
2. Press to start playback.
3. Slide the battery/card compartment cover in the direction of the arrow. The green lamp turns on.

**Battery basics**

This camera uses an Olympus lithium ion battery (LI-10B). This battery is dedicated to this camera and other batteries do not work. The battery is not fully charged when the camera is purchased. Fully charge the battery on the supplied charger (LI-10C) before first use. Do not use any other chargers. For details, read the charger’s instructions (provided).

- When charging is complete, the charge indicator turns green.
- If the battery is not charged, the “Battery Low” mark blinks on the monitor.

**Loading/Unloading the card**

1. Make sure the camera is turned off:
   - The lens barrier is closed.
   - The green lamp is off.
2. Press to start playback.

The green frame moves to the selected item. Pressing \(<\) returns to the tab selection.

• Press \(<\) to display the top menu. Press \(\uparrow\) or \(\downarrow\) to select a tab and press \(\uparrow\) or \(\downarrow\) again.

Menu functions during shooting

CAMERA

- [WB] Selects self-timer shooting or remote control shooting.
- [DRIVE] Selects a mode from [\(\) (single-frame shooting), \(\) (sequential shooting), \(\) (AF sequential shooting) or \(\) (auto bracketing).
- [PIA/S/MD] Exposure mode can be selected from [P] (Program auto), [A] (Aperture priority auto), [S] (Shutter priority auto), or [M] (Manual mode).
- [P/A/S/M] Digitizes the optical zoom range to a maximum of approximately 12x.
- [PANORAMA] Allows panorama pictures to be taken with Olympus CAMEDIA-brand card.
- [2 IN 1] Combines two pictures taken in succession and stores them as a single picture.

PICTURE

- \(\uparrow\) Sets the record mode resolution.
- \(\downarrow\) Sets the appropriate white balance according to the light source.
- \(\leftarrow\) SHARPNESS Adjusts the sharpness of images.
- \(\rightarrow\) CONTRAST Adjusts the contrast of images.

CARD

- \(\leftarrow\) All RESET Selects whether to keep the current camera settings when you turn off the power.
- \(\rightarrow\) INFO Changes the amount of information displayed on the monitor.
- \(\uparrow\) REC VIEW Displays the beep sound (used for warnings, etc.).
- \(\downarrow\) MY MODE SETUP Selects whether to display the image being recorded on the monitor.
- \(\uparrow\) MY SETUP Sets your favorite camera settings as a custom mode.
- \(\downarrow\) SLEEP Sets the sleep timer.
- \(\uparrow\) FILE NAME Chooses how to name files and folders of images to be saved.
- \(\downarrow\) PIXEL MAPPING Adjusts the monitor brightness.
- \(\uparrow\) SLEEP Sets the time.
- \(\downarrow\) SHORT CUT Sets the date.

Menu functions during playback

- \(\leftarrow\) EDIT (still pictures) Creates black and white pictures.
- \(\rightarrow\) PLAY (still pictures) Creates sepia-toned pictures.
- \(\uparrow\) EDIT (still pictures) Makes the file size smaller and saves it as a new picture.
- \(\downarrow\) CARD Selects the frame.
- \(\uparrow\) CARD Formats the card (FORMAT), or erases all images in the card (ALL ERASE).
- \(\downarrow\) CARD Formats the card (FORMAT), or erases all images in the card (ALL ERASE).

Card functions, such as formatting.

Menu functions vary depending on the mode. (See the Reference Manual for more details.)
