Thank you for purchasing this OLYMPUS Digital Photo Printer P-S100. This guide contains instructions for using this printer with other Olympus Dock&Done products. For details on operations and settings, refer to the supplied user’s manual. For inquiries, contact the OLYMPUS service center listed in the user’s manual.

Your new life of photography has begun.

What is Dock&Done?
Dock&Done is a total digital photography system that puts personal imaging into a single process. For example, by simply setting the digital camera on the cradle, new pictures are saved, photo printing is prepared, and the camera’s batteries are recharged.

For printing, a paper-in tray and a ribbon cartridge are required (both supplied, as well as commercially available as replacements).

Connecting the Dock&Done-compatible digital camera to the storage unit

1. Set the print order (DPOF) for the image files to be printed on the digital camera.
2. Connect the printer and the storage unit with the Dock&Done cable KP16 (sold separately), connect the AC adapter and the power cord to the printer, then turn the printer on.
3. Dock the cradle of the digital camera to the storage unit.
4. Turn on the storage unit, then set the Dock&Done/PC mode switch to “Q DOCK.”

Tips
For details on connections, refer to the user’s manual supplied with the storage unit.

Printing
On the digital camera, select the desired item from the “Q DOCK MODE” menu.

1. Press the  or button to select the desired item.
2. Press the button.
   - “STORE → PRINT” Stores only the newly taken image files of the digital camera, and print the image files with the print order.
   - “STORING ONLY” Stores only the newly taken image files of the digital camera.
   - “STORE → SEL. PRINT”* Stores only the newly taken image files of the digital camera, and the print setting screen appears.
   - “EXIT” Closes the “Q DOCK MODE” menu without storing or printing.

* This is for PictBridge mode. For details on the print settings, refer to the reference manual supplied with the digital camera.

Cancel automatic print

Press the button on the digital camera during printing.

The confirmation screen appears.

1. Select “CANCEL,” then press the button. Printing is canceled, and the digital camera turns off automatically.

Tips
If you select “RESTART,” printing will restart.

Printing with a PC

Use a commercially available USB cable (A-B type, less than 3 m (9.8 ft.).)
Connect your PC to the printer.

Tips
For details, refer to the user’s manual supplied with the printer.

Tips
For details on PictBridge, refer to the instruction manual supplied with the digital camera.

Printing with a PictBridge-compatible camera

Use the USB cable supplied with the digital camera for connection.

1. Connect the digital camera to the printer.

Tips
For details on PictBridge, refer to the instruction manual supplied with the digital camera.

Tips
Use a commercially available USB cable (A-B type, less than 3 m (9.8 ft.)).

Connecting the Dock&Done-compatible digital camera to the storage unit

Lift the shutter
Dock&Done storage connector

Press the button.

STORE → PRINT
STORING ONLY
STORE → SEL. PRINT
